Reforming Health Sectors:

Health Sector Reforms in Orissa Subrata Kundu, 2010-07-12 In analysing the phenomenon of health sector reforms this book proposes a new conceptual framework of analysis and ethnography as a methodological tool which could be used effectively in various country contexts compared to what the existing theoretical frameworks do. Thus apart from generating new knowledge in health sector this study has significance for policy makers across the world. When the states themselves accept the fact that increasing private participation in health care in the form of health sector reforms is happening because of deliberate state policy they will be better positioned to take decisions which ensure effective private sector regulation and universal access to quality health care within a democratic or participatory framework of governance. Increasing privatisation of health care has also led toward citizens losing their democratic spaces with regard to decisions on universal access to quality health care. This has wider implications not only for improved health status in general but also about how we live in a modern society with our values of liberty equality and justice intact. The book would be a useful guide for policy makers researchers students and layman across the world.

Reforming Health Sectors Anne Mills, 2000 The 1990s have seen a fundamental questioning of the nature form and content of health systems. Evidence has accumulated that in terms of efficiency and equity no country can be satisfied with the performance of its health system. Concerns include the extent to which health systems are responsive to health needs as opposed to professional preferences the need to ration access to care and how best to do it how to make services more responsive to users and how to ensure that the needs of the poorest and most disadvantaged are met. Countries across the world whether rich or poor are attempting to change how health systems are financed organized and managed. Proposed reforms are often radical progress in implementing reforms is often slow consensus is notably absent. These papers by leading academics and practitioners shed light on reform ideologies strategies and experiences.

Reforming Health Care in the United States, Germany, and South Africa Susan Giaimo, 2016-04-29 As countries confront new health care challenges in the 21st century their health care systems reflect the problems and political settlements of an earlier age. Meeting these new challenges requires reform of existing health care system arrangements while reconciling the goals of equitable access to quality care at an affordable price. This book compares health care reforms in industrialized nations and the Global South to uncover the similarities and differences in their problems and solutions. It examines the struggle over the Affordable Care Act and its alternatives in the United States major health care reforms in Germany in the new century and South Africa's efforts to combat AIDS and construct a comprehensive health care system for all.
