Reforming Suburbia:

Reforming Suburbia Ann Forsyth, 2005-03-14 The new community movement of the 1960s and 1970s attempted a grand experiment in housing It inspired the construction of innovative communities that were designed to counter suburbia's cultural conformity social isolation ugliness and environmental problems This richly documented book examines the results of those experiments in three of the most successful new communities Irvine Ranch in Southern California Columbia in Maryland and The Woodlands in the suburbs of Houston Texas Based on new research and interviews with developers designers and residents Ann Forsyth traces the evolution the successes and the shortcomings of these experiments in urban innovation Where they succeeded in areas such as community identity and open space preservation they provide support for current smart growth proposals Where they did not in areas such as housing affordability and transportation choices they offer important insights for today's planners designers developers civic leaders and others interested in incorporating new forms of development into their designs *New City Upon a Hill* Joseph Rocco Mitchell, David L. Stebenne, 2007-03-31 Published in anticipation of Columbia's fortieth anniversary in 2007 this book showcases the history of one of the nation's leading new towns Built from the brilliant plan developed by visionary designer James Rouse Columbia's innovative design is the foundation for a unique community that has thrived for decades and flourishes today **The Death and Life of Main Street** Miles Orvell, 2012-10-01 For more than a century the term Main Street has conjured up nostalgic images of American small town life Representations exist all around us from fiction and film to the architecture of shopping malls and Disneyland All the while the nation has become increasingly diverse exposing tensions within this ideal In *The Death and Life of Main Street* Miles Orvell wrestles with the mythic allure of the small town in all its forms illustrating how Americans continue to reinscribe these images on real places in order to forge consensus about inclusion and civic identity especially in times of crisis Orvell underscores the fact that Main Street was never what it seemed it has always been much more complex than it appears as he shows in his discussions of figures like Sinclair Lewis Willa Cather Frank Capra Thornton Wilder Margaret Bourke White and Walker Evans He argues that translating the overly tidy cultural metaphor into real spaces as has been done in recent decades especially in the new urbanist planned communities of Elizabeth Plater Zyberk and Andres Duany actually diminishes the communitarian ideals at the center of this nostalgic construct Orvell investigates the way these tensions play out in a variety of cultural realms and explores the rise of literary and artistic traditions that deliberately challenge the tropes and assumptions of small town ideology and life **Desert Visions and the Making of Phoenix, 1860-2009** Philip VanderMeer, 2010-12-16 Whether touted for its burgeoning economy affordable housing and pleasant living style or criticized for being less like a city than a sprawling suburb Phoenix by all environmental logic should not exist Yet despite its extremely hot and dry climate and its remoteness Phoenix has grown into a massive metropolitan area This exhaustive study examines the history of how Phoenix came into being and how it has sustained itself from its origins in the

1860s to its present status as the nation's fifth largest city. From the beginning, Phoenix sought to grow, and although growth has remained central to the city's history, its importance, meaning, and value have changed substantially over the years. The initial vision of Phoenix as an American Eden gave way to the Cold War Era vision of a High Tech Suburbia, which in turn gave way to rising concerns in the late twentieth century about the environmental, social, and political costs of growth. To understand how such unusual growth occurred in such an improbable location, Philip VanderMeer explores five major themes: the natural environment, urban infrastructure, economic development, social and cultural values, and public leadership. Through investigating Phoenix's struggle to become a major American metropolis, his study also offers a unique view of what it means to be a desert city.

Prairie Crossing John Scott Watson, 2016-01-30. Carved out of century-old farmland near Chicago, the Prairie Crossing development is a novel experiment in urban public policy that preserves 69 percent of the land as open space. The for-profit project has set out to do nothing less than use access to nature as a means to challenge America's failed culture of suburban sprawl. The first comprehensive look at an American conservation community, *Prairie Crossing* goes beyond windmills and nest boxes to examine an effort to connect adults to the land while creating a healthy and humane setting for raising a new generation attuned to nature. John Scott Watson places *Prairie Crossing* within the wider context of suburban planning, revealing how two first-time developers implemented a visionary new land ethic that saved green space by building on it. The remarkable achievements include a high rate of resident civic participation, the reestablishment of a thriving prairie ecosystem, the reintroduction of endangered and threatened species, and improved water and air quality. Yet, as Watson shows, considerations like economic uncertainty, lack of racial and class diversity, and politics have challenged and continue to challenge *Prairie Crossing* and its residents.

Flights of Imagination Sonja Dümpelmann, 2014-09-19. In much the same way that views of the earth from the Apollo missions in the late 1960s and early 1970s led indirectly to the inauguration of Earth Day and the modern environmental movement, the dawn of aviation ushered in a radically new way for architects, landscape designers, urban planners, geographers, and archaeologists to look at cities and landscapes. As icons of modernity, airports facilitated the development of a global economy during the twentieth and early twenty-first centuries, reshaping the way people thought about the world around them. Professionals of the built environment awoke to the possibilities offered by the airports themselves as sites of design and by the electrifying new aerial perspective on landscape. In *Flights of Imagination*, Sonja Dümpelmann follows the evolution of airports from their conceptualization as landscapes and cities to modern-day plans to turn decommissioned airports into public urban parks. The author discusses landscape design and planning activities that were motivated, legitimized, and facilitated by the aerial view. She also shows how viewing the earth from above redirected attention to bodily experience on the ground and illustrates how design professionals understood the aerial view as simultaneously abstract and experiential, detailed and contextual, harmful and essential. Along the way, Dümpelmann traces this multiple dialectic from the 1920s to the land camouflage activities during World War II and

from the environmental and landscape planning initiatives of the 1960s through today

California Exposures:

Envisioning Myth and History Richard White, 2020-03-17 Winner of the 2021 California Book Award Californiana category
A brilliant California history in word and image from an award winning historian and a documentary photographer This is the West sir When the legend becomes fact print the legend This indelible quote from The Man Who Shot Liberty Valance applies especially well to California where legend has so thoroughly become fact that it is visible in everyday landscapes Our foremost historian of the West Richard White never content to print the legend collaborates here with his son a talented photographer in excavating the layers of legend built into California s landscapes Together they expose the bedrock of the past and the history they uncover is astonishing Jesse White s evocative photographs illustrate the sites of Richard s historical investigations A vista of Drakes Estero conjures the darkly amusing story of the Drake Navigators Guild and its dubious efforts to establish an Anglo Saxon heritage for California The restored Spanish missions of Los Angeles frame another origin story in which California s native inhabitants civilized through contact with friars gift their territories to white settlers But the history is not so placid A quiet riverside park in the Tulare Lake Basin belies scenes of horror from when settlers in the 1850s transformed native homelands into American property Near the lake bed stands a small marker commemorating the Mussel Slough massacre the culmination of a violent struggle over land titles between local farmers and the Southern Pacific Railroad in the 1870s Tulare is today a fertile agricultural county but its population is poor and unhealthy The California Dream lives elsewhere The lake itself disappeared when tributary rivers were rerouted to deliver government subsidized water to big agriculture and cities But climate change ensures that it will be back the only question is when

Building Home Eric John Abrahamson, 2013-02-28 This book is not only a biography of Howard F Ahmanson but also the story of the financing of the postwar housing boom and the tremendous growth of Los Angeles Americans have long believed that homeownership is fundamental to the strength of our democracy and the character of our people Victory in World War II combined with new government policies designed to stimulate mortgage lending sparked a tremendous surge in rates of homeownership in the 1950s With savings and loans providing more than half of the mortgages for these homes the industry enjoyed a golden era in its history especially in southern California Among its peers Home Savings Loan Association of Los Angeles was a giant By 1954 it had more customers and assets than any other thrift in America Through its real estate development entities the company played a leading role in the postwar suburban explosion that made LA the quintessential postmodern city As the crown jewel among a handful of mortgage related businesses launched and controlled by Howard F Ahmanson the company generated philanthropic capital to build L A s cultural centers and finance the campaigns of the region s leading politicians As a sun tanned yachtsman and a cigar smoking financier the Omaha born Ahmanson was both unique and representative of many of the business leaders of his era Like many elites Ahmanson shared a fundamental confidence in his ability to lead the nation to prosperity His death in 1968 came just as the era of deregulation

was beginning In this new era the central role of the savings and loan in financing the American dream diminished and Home Savings was sold to help create one of the biggest branch banks in America Washington Mutual

Geiger, 2017-07-05 This work provides a critical reexamination of the origin and development of America s land grant colleges and universities created by the most important piece of legislation in higher education The story is divided into five parts that provide closer examinations of representative developments Part I describes the connection between agricultural research and American colleges Part II shows that the responsibility of defining and implementing the land grant act fell to the states which produced a variety of institutions in the nineteenth century Part III details the first phase of the conflict during the latter decades of the nineteenth century about whether land colleges were intended to be agricultural colleges or full academic institutions Part IV focuses on the fact that full fledged universities became dominant institutions of American

higher education The final part shows that the land grant mission is alive and well in university colleges of agriculture and in fact is inherent to their identity Including some of the best minds the field has to offer this volume follows in the fine tradition of past books in Transaction s Perspectives on the History of Higher Education series Landscape Performance Bo Yang,2018-10-26 Ian McHarg s ecological planning approach has been influential since the 20th century However few empirical studies have been conducted to evaluate the performance of his projects Using the framework of landscape performance assessment this book demonstrates the long term benefits of a renowned McHargarian project The Woodlands town development through quantitative and qualitative methods Including 44 black and white illustrations Landscape Performance systematically documents the performance benefits of the environmental social and economic aspects of The Woodlands project It delves into McHarg s planning success in The Woodlands in comparison with adjacent Houston developments which demonstrated urban resilience after Hurricane Harvey in 2017 Lastly it identifies the ingredients of McHarg s ability to do real and permanent good Yang also includes a number of appendices which provide valuable information on the methods of assessing performance in landscape development This book would be beneficial to academics and students of landscape architecture and planning with a particular interest in Ian McHarg *Critical Urban Studies* Jonathan S. Davies,David L. Imbroscio,2010-11-03 This volume revisits the tradition of critical scholarship characteristic of the urban studies field Urban scholarship has had detractors of late particularly in mainstream political science where it has been accused of parochialism and insularity Critical Urban Studies offers a sharp repudiation of this critique reasserting the need for critical urban scholarship and demonstrating the fundamental importance of urban studies for understanding and changing contemporary social life Contributors to the volume identify an orthodox perspective in the field subject it to critique and map out a future research agenda for the field The result is a series of inventive essays pointing scholars and students to the major theoretical and policy challenges facing urbanists and other critical social scientists The Religious Dimensions of Shared Spaces Paul D. Numrich,2023-02-28 Space sharing by groups and organizations is widespread in the United States from commercial partnerships to government and private sector joint use agreements to the use of public facilities and commons and more Drawing upon a variety of historical examples and contemporary cases The Religious Dimensions of Shared Spaces offers a focused and systematic analysis of space sharing involving religious groups or organizations All space sharing arrangements are similar in most respects so what difference does it make when religious groups or organizations are involved How do they invest meaning in the spaces they use and share including sacred space When and why do they enter into space sharing arrangements with other parties religious and or secular How do religious space sharers structure and maintain their arrangements including handling tensions that arise What can secular space sharers learn from their religious counterparts and vice versa The book also teases out when religion does not matter in space sharing even when religious groups or organizations are involved Case studies include internal congregational groups

that negotiate the use of shared facilities arrangements between congregations and external groups or organizations
multifaith partnerships and shared spaces in secular venues

Urban Design and Human Flourishing Tim G.

Townshend,2021-04-12 The built environment influences health and well being in a myriad of ways Some neighbourhoods are plagued by busy roads that are a constant source of danger noise and air pollution In some cities there is inadequate green space for children to play and socialise safely Yet this book argues it does not have to be this way With focus on human health well being and flourishing this book explores the ways in which people s lives are impacted by the built environment and how we can create adapt and design healthy and inclusive places The volume explores the relationship between urban design and human flourishing and initiates broad discussions around relevant questions such as What is a healthy place What influences our perceptions of built environment more Is it our age or our cultural background The book includes six chapters from internationally renowned authors who attempt to unpack some of the key aspects that urban designers need to consider in order to create places that enable rather than constrain individuals and communities to live rich fulfilling lives This book will be of great value to students scholars and researchers interested in urban design planning and in exploring how built environment impacts health and happiness The chapters in this book were originally published as a special issue of the Journal of Urban Design

The Wealth of the Elite Stamatios Tsigos, Kevin Daly,2020-06-01 This book analyses the

processes through which the modern forms of large fortunes are amassed Despite the recent spate of governmental and non governmental interest in inequality be it wealth or income the most privileged and fortunate have not generated much interest in mainstream economics As the issue of wealth accumulation is multifaceted the proposed book will not merely be an exercise in business history but deals with the issue from multiple perspectives accordingly employing alternative research methods Broadly the trends and dynamics in high tier wealth accumulation are coupled to the economic political and social mechanisms that have been in play for at least half a century or more in some parts of the world This approach leads to potential policy implications since much of the debate on wealth distribution centres on the extent to which wealth has been justly attained Further how wealth is distributed in the capitalist system can have an impact upon economic growth This book offers an alternative perspective on why we have witnessed the growth of a new social class of ultra rich This book will be of interest to academics and researchers in international economic bodies

Practicing Utopia Rosemary Wakeman,2016-04-01 The typical town springs

up around a natural resource a river an ocean an exceptionally deep harbor or in proximity to a larger already thriving town Not so with new towns which are created by decree rather than out of necessity and are often intended to break from the tendencies of past development New towns aren t a new thing ancient Phoenicians named their colonies Qart Hadasht or New City but these utopian developments saw a resurgence in the twentieth century In Practicing Utopia Rosemary

Wakeman gives us a sweeping view of the new town movement as a global phenomenon From Tapiola in Finland to Islamabad in Pakistan Cergy Pontoise in France to Irvine in California Wakeman unspools a masterly account of the golden age of new towns exploring their utopian qualities and investigating what these towns can tell us about contemporary modernization and urban planning She presents the new town movement as something truly global defying a Cold War East West dichotomy or the north south polarization of rich and poor countries Wherever these new towns were located whatever their size whether famous or forgotten they shared a utopian lineage and conception that in each case reveals how residents and planners imagined their ideal urban future
