Warford, 2017-10-05 This book investigates the interrelationship between educational reforms and pedagogical and technological innovations as well as the implications of this relationship for the quality of human capital By analyzing recent educational reforms in Russia and the US the authors shed new light on how these reforms may help or hinder innovations such as the introduction of computer technologies into classrooms new methods of teacher evaluation constructivist teaching methods and governance in public schools Taking labor economics as a useful lens for conceptualizing the diffusion of innovation in the first part of the book the authors analyze how certain power arrangements can block educational innovations in schools In the second part they examine recent educational reforms in the US and Russia The final part presents a vision of the next generation of educational reforms which may enable innovation diffusion rather than hamper it      *China's Economic Reforms: Successes And Challenges* Peter Koveos, Yimin Zhang, 2023-01-19 In the last 40 years of China's economic reforms the country has made unprecedented progress in its economic development and its position in the global stage As a result interest in China has resulted in numerous books focusing on the world's second largest economy A single volume however cannot possibly explain the complex nature of China's economic system and its relationship with the rest of the world China's Economic Reforms Successes and Challenges contributes to the understanding of China's reforms by offering a detailed analysis of critical components of the country's economic architecture Within the context of the global economy the book illustrates the performance of the Chinese economy at both the aggregate and individual sector levels before and after reforms Comparisons and contrasts are made with the economies of the US Japan South Korea India and Russia The book presents the challenges facing the Chinese reform process and explain how these challenges affect the domestic economy the rest of the world and the overall success of China's reforms      **Reform of the nation's banking and financial systems** United States. authorities in the field to analyse and investigate post crisis regulation and reform Representing the wide spectrum of non mainstream economics and finance topics range widely from financial innovation to misconduct in banking varieties of Eurozone banking to reforming dysfunctional global banking as well as topical issues such as off shore financial centres Libor fixing corporate governance and the Dodd Frank Act Bringing together an authoritative range of international experts and perspectives this invaluable body of heterodox research work provides a comprehensive compendium for researchers and academics of banking and finance as well as regulators and policy makers concerned with the global impact of financial institutions

*Institutional Diversity and Innovation* Cornelia Storz, Sebastian Schäfer, 2011-05-27 The concept of innovation systems has gained considerable attention from scholars and politicians alike The concept promises not only to serve as a tool to explain sustained economic development but also to provide policy makers with scientifically grounded policy options to advance the growth of economies The thrust of much recent literature has been to review existing empirical findings in order to deduce best practice models which are assumed to benefit all countries in a similar fashion However as this book argues such universal models often fail in both analysis and policy prescriptions as they do not take into account sufficiently the circumstances and development trajectories of particular countries With a foreword by Richard Whitley this book discusses the extent to which the diagnoses and reform recommendations of recent work on innovation theory and the related policy recommendations actually apply to Japan and China Making links between behavioural economics and institutional analysis the book covers their regulatory framework legal and science system the labour and capital market and intra firm relations It examines the present design and reasons underlying the Japanese and Chinese innovation systems and based on those findings emphasises the necessity for reform to secure the future competitiveness of both countries The book is introduced by a foreword by Richard Whitley Professor of Organisational Sociology at Manchester Business School

**Secured Transactions Reform and Access to Credit** Frederique Dahan, John Simpson, 2009-01-01 The book is unique It brings together articles on the economics and the law of property rights and combines these with case studies observations of what works and what does not and a checklist of things to watch for This is a very useful book that should appeal to reformers working in the field whether they are governmental officials trying to modernize their economies or economists and lawyers working in developmental agencies There are few other books or publications that bring together the views of experts working in this important albeit somewhat neglected area of financial sector plumbing

William P Armstrong Banking and Finance Law Review a well presented collection of interesting papers within which one finds a rich resource of information and perspectives on secured transactions reform from parts of the world which are often overlooked in comparative commercial law scholarship

Noel McGrath Journal of Business Law with its insightful analysis interesting empirical studies and knowledgeable team of contributors the book will be illuminating and useful not just for those interested in development but also anyone who has anything to do with granting credit and taking security

Dora S Neo Singapore Journal of Legal Studies This is an excellent unique book The material is very well written and presented in a carefully thought out coherent way It tells us a legal story of our own unique time Any lawyer working in transition economies whether or not directly on reform projects would find it of great interest Even economists should perhaps take a look at it

Roger McCormick Law and Financial Markets Review Secured transactions reform also known as collateral or pledge law reform is increasingly seen as an important building block for economic development The commonly held view is that the availability and cost of credit as well as the efficiency of the market for secured credit are directly influenced by the laws affecting secured transactions and their implementation However there is still a lot of confusion about this relatively complex and technical area of the law and its role in promoting access to credit and economic growth The chapters presented here provide for the first time a comprehensive and cutting edge view of the subject from both a legal and economic perspective They start at the macro level of financial systems moving towards the behaviours of lenders commercial banks and micro lenders policy options for government and the mechanisms of collateral law reform By approaching the subject from different angles and experiences the work advocates an inclusive approach to the subject where all stakeholders interests can be taken into account It addresses the question of what role laws and institutions can play to encourage access to credit This book will be of primary interest to those involved in economic development and the

interaction between law and economics either for practical reasons for example working on reform or providing advice on investment in transition economies or for research purposes

It also examines Bank support for financial sector reforms in countries under crisis.

**Reform and Recovery in East Asia** Peter Drysdale, 2003-09-02 This exciting sequel to *East Asia in Crisis* offers a completely up-to-date assessment of the progress of East Asian recovery and provides a detailed review of the experience of the region's economies.

Local Governance Innovation in China Jessica C. Teets, William Hurst, 2014-10-30 Despite a centralized formal structure, Chinese politics and policy making have long been marked by substantial degrees of regional and local variation and experimentation. These trends have, if anything, intensified as China's reform matures. Though often remarked upon, the politics of policy formation, diffusion, and implementation at the subnational level have not previously been comprehensively described, let alone satisfactorily explained. Based on extensive fieldwork, this book explores how policies diffuse across China today, the mechanisms through which local governments actually arrive at specific solutions, and the implications for China's political development and stability in the years ahead. The chapters examine how local-level institutions solve governance challenges such as rural development, enterprise reform, and social service provision. Focusing on diverse policy areas that include land use, state-owned enterprise reform, and house churches, the contributors all address the same overarching question: how do local policymakers innovate in each issue area to address governance challenges, and how, if at all, do these innovations diffuse into national politics? As a study of local governance in China today, this book will appeal to both students and scholars of Chinese politics, comparative politics, governance and development studies, and also to policy makers interested in authoritarianism and governance.
