The Mystery and the World Maria Clara Bingemer, 2017-02-23 In *The Mystery and the World* Maria Clara Bingemer explores how the place of religion in society has dramatically shifted since the Enlightenment The modern era is characterised by a major change in humanity's fundamental desires that means that reason has taken the place of faith Human beings in their ongoing search for a scientific understanding of the world have drifted away from seeking any essence of transcendence in their lives Bingemer examines this transition and how especially in the postmodern era it has led to technology and superficial happiness becoming all important as opposed to the more sacred sense of contentment that governed us for centuries prior to the Enlightenment In her discussion however Bingemer demonstrates that we as humans have not lost our innate desire to believe in a higher power and that even in our world of instant satisfaction we still need to fill the void left by religion Through well researched analysis of the modern era and discussion of some of the mystics of more recent times she reveals to readers how our religious belief whilst changed is not dead and is still an important aspect of our existence

Mystic Chords Manish Soni, 2001 Citing baby boomer favorites including Bob Dylan Bob Marley the Beatles and other rock greats the author shows that they have drawn on the same primal source from which mythology dreams and poetic insight arise Music

Roxburgh, Martin Robinson, 2018-05-15 Speaks to the bewilderment and helplessness many churches feel in the face of current events Practical new interpretation of changes in the West Throughout its history the church has faced crises of meaning and identity in all kinds of changing contexts The crises facing the churches of the western hemisphere today are no different At their best churches have recognized that their challenge is not their own fixing or even reformation but a deep engagement with the ways the gospel transforms society This book explores how this can happen again in a radically changing western world *Economic Life Beyond Economists* Abderrazak Belabes, 2024-08-12 Through an examination of the work of great scholars from fields including philosophy literature philology semiology quantum physics history and anthropology this book argues that building on the contribution of non economists can open new areas of reflection in economics beyond the usual schools of thought The purpose of the book is twofold First it offers a critique and discussion of the limits of contemporary economic discourse both mainstream and self styled alternative theories The central theme on which the book is built is that the discipline of economics fails to examine the nature of social reality in a systematic way This prompts the economists to become fully aware of the methodology on which they base their representation analysis and argumentation in a way that economists currently are not Second the book proposes alternative ways of thinking that can help readers of economics to overcome the current limitations of their discipline This means going beyond various dominant dualities orthodox heterodox micro macro epistemology ontology because it is not a question of doing the economy differently but of overcoming the economy as a representation of the world that strives to submit everything to its realm Thus the book does not simply propose a broader conceptual framework than that portrayed by mainstream economists or those who propose an alternative approach but raises questions that do not usually come from the minds of economists at all The book will be of particular interest to readers of economic methodology and pluralism philosophers of science and other social scientists interested in methodological issues **New Testament for Everyone Complete Eighteen-Volume Set** N.
