Hellenism in Late Antiquity Polymnia Athanassiadi, 2017-07-05 The 21 studies in this volume which deal with issues of social and intellectual history religion and historical methodology explore the ways whereby over the course of a few hundred years roughly between the second and the fifth centuries A D an anthropocentric culture mutated into a theocentric one Rather than underlining the differences between a revamped paganism and the emergent Christian traditions the essays in the volume focus on the processes of osmosis interaction and acculturation which shaped the change in priorities among the newly created textual communities that were spreading across the entire breadth of the late antique oecumene The main issues considered in this connection include the phenomena of textuality and holy scripture canonicity and exclusion truth and error prophecy and tradition authority and challenge faith and salvation holy places and holy men in the context of the construction of new orthodox readings of the Greek philosophical heritage Moreover the volume suggests that intolerant attitudes which form a characteristic trait of monotheisms were not an exclusive preserve of Christianity as the Enlightenment tradition would insist but were progressively espoused by pagan philosophers and divine men as part of the theory and practice of Hellenism s theological koine Efforts to establish the monopoly of a revealed truth against any rival claims were transversal to the textual communities which emerged in late antiquity and remodelled the intellectual and spiritual landscape of the Greater Mediterranean **Octobre 1970** William Tetley, 2011-03-02T00:00:00-05:00 Les mythes

History as a Profession Pim den Boer, 2014-07-14 This is a vivid portrait of the French historical profession in the nineteenth and early twentieth centuries concluding just before the emergence of the famous Annales school of historians. It places the profession in its social, academic and political context and shows that historians of the period have been unfairly maligned as amateurish and primitive in comparison to their more celebrated successors. Pim den Boer begins by sketching the contours of French historiography in the nineteenth century, examining the quantity of historical writing, its subject matter and who wrote it. He traces the growing influence of professional historians. He shows the increasing involvement of the national government in historical studies, paying special attention to the impact of political factions ranging from ultraroyalists to radical republicans. He explores how historical research and teaching changed at schools and universities. And he shows how nineteenth century historians' keen understanding of the past and of historical methodology laid the foundations for historiography in the twentieth century, archives including official documents, confidential reports and personal letters. Den Boer makes use of statistical, biographical and methodological analysis and demonstrates comprehensive knowledge of both minor historians and leading scholars including Charles Seignobos and Charles Victor Langlois. On sait l'ampleur des débats nord-américains sur le sujet et les oppositions entre libéraux, communautariens et républicains ou républicanistes. Ces discussions ont jusqu'à maintenant moins vives sur le continent et notamment en France où la reconnaissance des droits individuels a coïncidé avec la mise entre parenthèse des appartenances. Cependant les interrogations sur les critères de la citoyenneté, la remise en cause de l'État nation et le développement du modèle français d'intégration ont provoqué d'importantes réflexions qui viennent aujourd'hui nourrir des controverses nationales. Les études qui ont profondément renouvelé le sujet depuis le bicentenaire de la Révolution nous aident à trouver des sources de réflexion et des éléments de réponse.
