Right To Learn Educational Strategies For Socially Excluded Youth In Europe:

The right to learn Nicaise, Ides, 2000-11-08 Evidence has shown that individuals leaving school without qualifications are four times more likely to be unemployed than those with qualifications Preventing and combating unemployment therefore requires active measures both in the labour market and in the institutions responsible for preparing the future workforce educational institutions Attempts to remedy this problem have so far largely neglected children from socially excluded families one of the most vulnerable groups in education The right to learn explores a wide range of strategies both at the policy level and in the field to improve educational success among such disadvantaged children taking stock of good practice in a selection of EU member states chosen to reflect the diversity in systems and policies that currently exist The book suggests that a number of strategies are effective and feasible The authors recommend that a sufficiently powerful opinion movement is needed to promote the transfer of experience and action on different levels They conclude with several suggestions for good practice not just equal opportunity and equal treatment but also equal outcomes strategies The right to learn is important reading for teachers school administrators educational researchers policy makers NGOs parents associations those engaged in youth services and teacher training and in formulating policies to secure the social integration of the young generation *Educational Policies and Inequalities in Europe* M. Demeuse, D. Frandji, D. Greger, J.

Rochex, 2012-12-15 This book analyzes policies in eight European countries that aim to intervene in the reproduction of social and educational inequalities In order to understand why some policies succeed and others fail it is necessary to look at education systems through cross national comparison **Poverty Today Issue 53 (January 2002)** , *Young people and contradictions of inclusion* López Blasco, Andreu, McNeish, Wallace, 2003-12-22

Young people and contradictions of inclusion critically assesses policies addressing young people's transitions from school to employment It presents and discusses the findings of seven EU funded projects involving 13 countries Belgium Denmark France Germany Greece Ireland Italy The Netherlands Portugal Spain Sweden and the United Kingdom **Equalities and Education in Europe** Melinda

Dooly, Nanny Hartsmar, Alistair Ross, 2012-01-17 This book is about inequities in education in Europe The authors have worked together on an analysis of educational inequalities in Europe which they draw on through the book they suggest that the countries of Europe through the European Union are beginning to address issues of educational disadvantage on a systematic continent wide basis Because of this policy concern this book is timely in the way that it addresses social and education inequities on the scale of Europe This is not simply an account of practices and policies The authors analysis of individual country and European Union policy documents will be of practical and theoretical use to the policy community and the community of practitioners who are concerned with inequities in society and in education in particular The authors want to do more than simply add to the literature and theory they aspire to make an impact on how education can contribute to positively improving the lives of disadvantaged groups While some suggest that education is doomed to simply reproduce

existing social patterns and replicate social inequities the authors believe that educational policies have the potential to challenge inequalities and to transform lives

Educational Research for Social Justice Alistair Ross, 2021-06-22 This book presents a series of analyses of educational policies largely in the UK but some also in Europe researched by a team of social scientists who share a commitment to social justice and equity in education We explore what social justice means in educational policy and practice and how it impacts on our understanding of both educational science and the public good Using a social constructivist approach the book argues that social justice requires a particular and critical analysis of the meaning of meritocracy and of the way this term turns educational policies towards treating learning as a competition in which many young people are constructed as losers We discuss how many terms in education are essentialised and have specific and different meanings for particular social groups and how this may create issues in both quantitative survey methods and in determining what is the public good We discuss social justice across a range of intersecting social characteristics including social class ethnicity and gender as they are applied across the educational policy spectrum from early years to postgraduate education We examine the ways that young people construct their identities and the implications of this for understanding the public good in educational practice We consider the responsibilities of educational researchers to acknowledge these issues and offer examples of researching with such a commitment We conclude by considering how educational policy might contribute to a socially just equitable and inclusive public good

The Routledge International Handbook of Equity and Inclusion in Education Paul Downes, Guofang Li, Lore Van Praag, Stephen Lamb, 2024-05-13 Providing a cornerstone to the global debate on equity and inclusion within education this handbook explores equity issues pertaining to poverty and social class race ethnicity sociocultural sociolinguistic exclusion in education and recognises intersectionality

and gender across these dimensions This carefully curated collection of essays written by international experts promotes inclusive systems in education that explicitly recognise the voices of learners who may be at risk of marginalisation exclusion or underachievement Developing a multilayered innovative conceptual framework involving spatial emotional relational and dialogical turns for education it emphasises key system points for reform including building strategic bridges between health and education for vulnerable groups and shifts in focus for initial teacher education and the wider curriculum The handbook is organised into the following key parts Theoretical Frameworks Funding Models and Structures for Equity and Inclusive Systems Exclusion and Discrimination Bridging Health and Education Agency and Empowerment Outreach and Engagement The Routledge International Handbook of Equity and Inclusion in Education will be of great value to academics operating in the areas of education psychology sociology social policy ethnography cultural studies researchers in university research centres and in policy institutes pertaining to education poverty social inclusion as well as international organisations involved with inclusion in education

Childhood poverty and social exclusion Ridge, Tess, 2002-10-02 Childhood poverty has moved from the periphery to the centre of the policy agenda following New Labour's pledge to end it within twenty years However whether the needs and concerns of poor children themselves are being addressed is open to question The findings raise critical issues for both policy and practice in particular the finding that children are at great risk of experiencing exclusion within school School has been a major target in the drive towards reducing child poverty However the policy focus has been mainly about literacy standards and exclusion from school This book shows that poor children are suffering from insufficient access to the economic and material resources necessary for adequate social participation and academic parity Childhood poverty and social exclusion will be an invaluable teaching aid across a range of academic courses including social policy sociology social work and childhood studies All those who are interested in developing a more inclusive social and policy framework for understanding childhood issues from a child centred perspective including child welfare practitioners and policy makers will want to read this book Studies in poverty inequality and social exclusion series Series Editor David Gordon Director Townsend Centre for International Poverty Research Poverty inequality and social exclusion remain the most fundamental problems that humanity faces in the 21st century This exciting series published in association with the Townsend Centre for International Poverty Research at the University of Bristol aims to make cutting edge poverty related research more widely available For other titles in this series please follow the series link from the main catalogue page

Education, Social Justice and Inter-Agency Working Sheila Riddell, Lyn Tett, 2003-08-27 This book explores policy and practice in a range of areas where education and other agencies interact Its theme is central to those interested in promoting social justice for adults and children experiencing the effects of exclusion
