**Created Equal: Reflections On The Unalienable Right To Life** Thomas A. Glessner, J.D., 2016-07-22

**On Human Rights** James Griffin, 2008-02-14 What is a human right How can we tell whether a proposed human right really is one How do we establish the content of particular human rights and how do we resolve conflicts between them These are pressing questions for philosophers political theorists jurisprudents international lawyers and activists James Griffin offers answers in his compelling new investigation of the foundations of human rights First On Human Rights traces the idea of a natural right from its origin in the late Middle Ages when the rights were seen as deriving from natural laws through the seventeenth and eighteenth centuries when the original theological background was progressively dropped and natural law emptied of most of its original meaning By the end of the Enlightenment the term human rights *droits de l homme* appeared marking the purge of the theological background But the Enlightenment in putting nothing in its place left us with an unsatisfactory incomplete idea of a human right Griffin shows how the language of human rights has become debased There are scarcely any accepted criteria either in the academic or the public sphere for correct use of the term He takes on the task of showing the way towards a determinate concept of human rights based on their relation to the human status that we all share He works from certain paradigm cases such as freedom of expression and freedom of worship to more disputed cases such as welfare rights for instance the idea of a human right to health His goal is a substantive account of human rights an account with enough content to tell us whether proposed rights really are rights Griffin emphasizes the practical as well as theoretical urgency of this goal as the United Nations recognized in 1948 with its Universal Declaration the idea of human rights has considerable power to improve the lot of humanity around the world We can t do without the idea of human rights and we need to get clear about it It is our job now the job of this book to influence

and develop the unsettled discourse of human rights so as to complete the incomplete idea      *The Human Right to Health* Eduardo Arenas Catalán, 2021-06-25 This timely book offers a fresh perspective on how to effectively address the issue of unequal access to healthcare It analyses the human right to health from the underexplored legal principle of solidarity proposing a non commercial understanding of the positive obligations inherent in the right to health      **J. M. Coetzee's Politics of Life and Late Modernism in the Contemporary Novel** Marc Farrant, 2024-03-05 Surveying the full breadth of J M Coetzee s career as both academic and novelist this book argues for the necessity of rethinking his profound indebtedness to literary modernism in terms of a politics of life Isolating a particular strain of late modernism epitomised by Kafka and Beckett Farrant claims that Coetzee s writings consistently demonstrate an agonistic engagement with the concept of life that involves an entanglement of politics and ethics which supersedes the singular theoretical frameworks often applied to Coetzee such as postcolonialism posthumanism and animal studies Running throughout his engagement with questions of modernity and colonialism storytelling and life writing human and non human life religion and post Enlightenment subjectivity Coetzee s politics of life yield a new literary cosmopolitanism for the twenty first century a powerful commentary on our interrelatedness that emphasises finitude and contingency as fundamental to the way we live together      *China and International Human Rights* Na Jiang, 2013-12-12 This book is designed to introduce law students legal actors and human rights activists particularly participants in human rights dialogues with China to the process and reality of a newly confident China s participation in the international human rights system albeit with inherent challenges From an international and comparative perspective one of the key findings of the author s research is that progress towards human rights depends more on judges than on legislators Chinese legislators have enacted a series of reforms in order to better protect human rights Unfortunately these reforms have not led to greater adherence to China s international human rights obligations in practice The reforms failed because they have generally been misunderstood by Chinese judges who often have a limited understanding of international human rights norms Specifically this book will examine how judicial misunderstandings have blocked reforms in one specific area the use of severe punishments based on international human rights theory and case studies and data analyses This examination has several purposes The first is to suggest that China ratify the ICCPR as the next step for its substantive progress in human rights and as a good preparation for its re applying to be a member of the UN Human Right Council in the future The second is to explain how judges could be better educated in international human rights norms so as to greatly reduce the use of severe punishments and better comply with China s human rights obligations The third is to demonstrate how the international community could better engage with China in a manner that is more conducive to human rights improvements The author s ultimate goal is to enhance dialogue on human rights in China between judges and the Chinese government between Chinese judges and their foreign counterparts and between China s government and the international community Another significant aim of this book is to clarify the

controversial question of what obligations China should undertake before its ratification of the ICCPR and to re examine trends in its developing human rights policy after standing down from the Council in late 2012 The tortuous progress of China s criminal law and criminal justice reforms has confirmed that Chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards Judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the ICCPR In order to better educate and train judges this book contains introductory chapters that examine the severe punishments currently available to Chinese judges from an international human rights perspective To illustrate how Chinese justice currently falls short of international norms this paper also examines several cases that are considered to be indicative of China s progress towards greater respect for human rights and the rule of law These cases demonstrate that China still has a long way to go to achieve its goals at least before abolishing the death penalty forced labor and torture
