Navigating Right and Wrong Daniel E. Lee,2002-10-09 How should I live my life Is there really anything that is inherently right or wrong These may sound like simple questions but finding answers to them is anything but simple particularly in an age of ethical pluralism In our multicultural multiethnic world is there any meaningful way to talk about moral obligations Daniel Lee says yes In Navigating Right and Wrong this long time ethicist and teacher helps us begin to reconcile our personal moral commitments with an openness to alternatives with an eye to responsibly negotiating ethics and morality in our pluralistic age Through concise thoughtful prose and engaging anecdotes Lee introduces readers to various philosophical and theological moral theories ultimately arguing that we must embrace a faith based ethics or succumb to the alternative ethical subjectivism In the final analysis Lee asserts we can do no more than acknowledge that the value claims we make are part of the faith we affirm be it one that is explicitly religious or entirely secular in nature Assuming no prior philosophical knowledge Navigating Right and Wrong will be of use to general readers students and anyone else who has ever earnestly asked the question Is there really anything that is right or wrong **How Good People Make Tough**

features One The American Creed is a civic nationalism which espouses liberty democracy and the rule of law It is our greatest legacy to the world But our almost religious belief in the Creed creates a tendency toward a dangerously messianic element in American nationalism the desire to extend American values and American democracy to the whole world irrespective of the needs and desires of others The other feature populist or what is sometimes called Jacksonian nationalism has its roots in an aggrieved embittered and defensive White America centered largely in the American South Where the Creed is optimistic and triumphalist Jacksonian nationalism is fed by a profound pessimism and a sense of personal social religious and sectional defeat Lieven examines how these two antithetical impulses have played out in recent US policy especially in the Middle East and in the nature of U S support for Israel He suggests that in this region the uneasy combination of policies based on two contradictory traditions have gravely undermined U S credibility and complicated the war against terrorism It has never been more vital that Americans understand our national character This hard hitting critique directs a spotlight on the American political soul and on the curious mixture of chauvinism and idealism that has driven the Bush administration

to the two opposing sides of this battle for the high moral ground morality and immorality are neither possible nor desirable to the extent that their respective ideologues would like us to believe But one should not misunderstand this challenge as a suggestion that ethics is a worthless field of study or that other fields of study related to ethics like political philosophy moral psychology social studies theology or even international relations should be dismissed Needless to stress neither of these two extreme views is reasonable either Instead this book provides an alternative better way to understand the nature of ethics especially in relation to morality and immorality while learning from different approaches in the literature but without favoring any one of them nor integrating them since they are not necessarily compatible with each other This book offers a new theory to transcend the existing approaches in the literature on ethics in a way not thought of before This seminal project is to fundamentally alter the way that we think about ethics from the combined perspectives of the mind nature society and culture with enormous implications for the human future and what I originally called its post human fate

Utilitarian Theories This book is a monograph on moral philosophy and social philosophy particularly the part of the philosophy of economics that is related to the general distribution problem It presents a comprehensive ethical theory together with an application of the theory to distributive justice The viewpoint of this theory is utilitarian However this theory is different in some crucial points as well as in minor details from all existing forms of utilitarianism Moral philosophy deals essentially with the moral judgment of actions i e whether a moral action is right or wrong good or bad The judgment is usually based on a line of logical reasoning which can be traced to a final reason called the justification or ultimate principle An ethical theory is a self consistent system built upon a basic or ultimate principle An ultimate principle can never be rigorously proven and is not unique Different philosophers establish different ethical theories upon different principles Therefore in the history of development of moral philosophy there have been a large number of ethical theories and schools Even within the same school having the same ultimate principle different philosophers may have different versions of the theory because of small variations in the interpretation of the ultimate principle or in the elaboration of the details
