Fostering Research on the Economic and Social Impacts of Information Technology National Research

Council, Division on Engineering and Physical Sciences, Commission on Physical Sciences, Mathematics, and Applications, Steering Committee on Research Opportunities Relating to Economic and Social Impacts of Computing and Communications, 1998-10-15 The tremendous growth in use of information technology IT has led to an increased interest in understanding its social and economic impacts This book presents examples of crosscutting research that has been conducted to understand the impact of information technology on personal community and business activities It explores ways in which the use of methodology from economics and social sciences contributes to important advances in understanding these impacts The book discusses significant research issues and concerns and suggests approaches for fostering increased interdisciplinary research on the impacts of information technology and making the results of this research more accessible to the public and policymakers This volume is expected to influence funding priorities and levels of support for interdisciplinary research of this kind

Energy Justice in a Changing Climate Karen Bickerstaff, Gordon Walker, Harriet Bulkeley, 2013-10-10 Energy justice is one of the most critical and yet least developed concepts associated with sustainability Much has been written about the sustainability of low carbon energy systems and policies with an emphasis on environmental economic and geopolitical issues However less attention has been directed at the social and equity implications of these dynamic relations between energy and low carbon objectives the complexity of injustice associated with whole energy systems from extractive industries through to consumption and waste that transcend national boundaries and the social political economic and material processes driving the experience of energy injustice and vulnerability Drawing on a substantial body of original research from an international collaboration of experts this unique collection addresses energy poverty just innovation aesthetic justice and the justice implications of low carbon energy systems and technologies The book offers new thinking on how interactions between climate change energy policy and equity and social justice can be understood and develops a critical agenda for energy justice research

Rethinking Rights and Responsibilities Arthur J. Dyck, 2005-02-08 As members of various and often conflicting communities how do we reconcile what we have come to understand as our human rights with our responsibilities toward one another With the bright thread of individualism woven through the American psyche where can our sense of duty toward others be found What has happened to our love even our concern for our neighbor In this revised edition of his magisterial exploration of these critical questions renowned ethicist Arthur Dyck revisits and profoundly hones his call for the moral bonds of community In all areas of contemporary life be it in business politics health care religion and even in family relationships the right of individuals to consider themselves first has taken precedence over our responsibilities toward others Dyck contends that we must recast the language of rights to take into account our once natural obligations to all the communities of which we are a part Rethinking Rights and Responsibilities at the nexus of ethics political theory public policy and law traces how the peculiarly American formulations of the rights of the individual have assaulted our connections with and responsibilities for those

around us Dyck critically examines contemporary society and the relationship between responsibilities and rights particularly as they are expressed in medicine and health care to maintain that while indeed rights and responsibilities form the moral bonds of community we must begin with the rudimentary task of taking better care of one another Municipal Management Annelise Venter, 2007 Book the constitutional dispensation as it affects municipalities the strategic orientation of municipalities within the global and national contexts the capacities and resources available best practices as far as management processes procedures and methods are concerned The book explores the multifaceted nature of municipal management in South Africa and focuses the readers attention on selected key strategic issues such as local economic development local democracy disaster risk reduction **COVID-19: Individual Rights and Community Responsibilities** J. Michael Ryan, 2023-01-31 COVID 19 Individual Rights and Community Responsibilities provides critical insights into the tensions between individual rights and community responsibilities during the COVID 19 pandemic Questions about mandates lockdowns priorities and broader questions related to neighborly responsibilities and human rights have been central to debates about how to confront the pandemic The scholarship presented in this volume adds to those debates by confronting such issues as the role of social media in spreading misinformation mask mandates pandemic politics and the very ethos of what is meant by human and individual rights Drawing on the expertise of scholars from around the world the work presented here represents a remarkable diversity and quality of impassioned scholarship on the impact of COVID 19 and is a timely and critical advance in knowledge related to the pandemic **Culture of the Internet** Sara Kiesler, 2014-02-04 As we begin a new century the astonishing spread of nationally and internationally accessible computer based communication networks has touched the imagination of people everywhere Suddenly the Internet is in everyday parlance featured in talk shows in special business technology sections of major newspapers and on the covers of national magazines If the Internet is a new world of social behavior it is also a new world for those who study social behavior This volume is a compendium of essays and research reports representing how researchers are thinking about the social processes of electronic communication and its effects in society Taken together the chapters comprise a first gathering of social psychological research on electronic communication and the Internet The authors of these chapters work in different disciplines and have different goals research methods and styles For some the emergence and use of new technologies represent a new perspective on social and behavioral processes of longstanding interest in their disciplines Others want to draw on social science theories to understand technology A third group holds to a more activist program seeking guidance through research to improve social interventions using technology in domains such as education mental health and work productivity Each of these goals has influenced the research questions methods and inferences of the authors and the look and feel of the chapters in this book Intended primarily for researchers who seek exposure to diverse approaches to studying the human side of electronic communication and the Internet this volume has three purposes to illustrate how scientists are thinking

about the social processes and effects of electronic communication to encourage research based contributions to current debates on electronic communication design applications and policies and to suggest by example how studies of electronic communication can contribute to social science itself
