*Minas Gerais in the Brazilian Federation, 1889-1937* John D. Wirth, 1977 One of three independent but coordinated studies on Brazilian regionalism this book examines the complex dynamics of state level and political structures in the politically important state of Minas Gerais

Portuguese Brazil James Lang, 2013-09-11

*The Colombian Caribbean* Eduardo Posada Carbó, 1996 This is a study of the role of regions in the development of modern nations in Latin America Eduardo Posada Carbo focuses on the Colombian Caribbean between 1870 and 1950 He examines the achievements and shortcomings of arable agriculture and the significance of the livestock industry the links between town and countryside the influence of foreign migrants and foreign capital the relationship between local and national politics and the extent to which regionalism represented a challenge to the consolidation of the national state in Colombia This original study opens up the area to scholarly scrutiny and has wider implications for Latin American historiography

*For Social Peace in Brazil* Barbara Weinstein, 2000-11-09 This book is the first major study of industrialists and social policy in Latin America Barbara Weinstein examines the vast array of programs sponsored by a new generation of Brazilian industrialists who sought to impose on the nation their vision of a rational hierarchical and efficient society She explores in detail two national agencies founded in the 1940s SENAI and SESI that placed vocational training and social welfare programs directly in the hands of industrialist associations Assessing the industrialists motives Weinstein also discusses how both men and women in Brazil s working class received the agencies activities Inspired by the concepts of scientific management rational organization and applied psychology Sao Paulo s industrialists initiated wide ranging programs to raise the standard of living increase productivity and at the same time secure lasting social peace According to Weinstein workers initially embraced many of their efforts but were nonetheless suspicious of employers motives and questioned their commitment to progressivism By the 1950s industrial leaders notion of the working class as morally defective and their insistence on stemming civil unrest at all costs increasingly diverged from populist politics and led to the industrialists active support of the 1964 military coup

**The Political Economy of the Brazilian State, 1889-1930** Steven Topik, 1987-07-01 In this first overview of

the Brazilian republican state based on extensive primary source material Steven Topik demonstrates that well before the disruption of the export economy in 1929 the Brazilian state was one of the most interventionist in Latin America This study counters the previous general belief that before 1930 Brazil was dominated by an export oligarchy comprised of European and North American capitalists and that only later did the state become prominent in the country's economic development Topik examines the state's performance during the First Republic 1889-1930 in four sectors finance the coffee trade railroads and industry By looking at the controversies in these areas he explains how domestic interclass and international struggles shaped policy and notes the degree to which the state acted relatively independently of civil society Topik's primary concern is the actions of state officials and whether their decisions reflected the demands of the ruling class He shows that conflicting interests of fractions of the ruling class and foreign investors gradually led to far greater state participation than any of the participants originally desired and that the structure of the economy and of society not the intentions of the actors best explains the state's economic presence

**The Political Economy of Brazil** Lawrence S. Graham, Robert H. Wilson, 2014-07-03 The transition from authoritarian to democratic government in Brazil unleashed profound changes in government and society that cannot be adequately understood from any single theoretical perspective The great need say Graham and Wilson is a holistic vision of what occurred in Brazil one that opens political and economic analysis to new vistas This need is answered in *The Political Economy of Brazil* a groundbreaking study of late twentieth century Brazilian issues from a policy perspective The book was an outgrowth of a year long policy research project undertaken jointly by the Lyndon B Johnson School of Public Affairs and the Teresa Lozano Long Institute of Latin American Studies both at the University of Texas at Austin In this book several noted scholars focus on specific issues central to an understanding of the political and economic choices that were under debate in Brazil Their findings reveal that for Brazil the break with the past the authoritarian regime could not be complete due to economic choices made in the 1960s and 1970s and also the way in which economic resources committed at that time locked the government into a relatively limited number of options in balancing external and internal pressures These conclusions will be important for everyone working in Latin American and Third World development

**The Politics of Social Security in Brazil** James Malloy, 2010-11-23 Brazil has one of the most elaborate social security systems in Latin America This study follows the progressive evolution of social insurance policy from 1889 to 1979 through four alternating

periods of democratic and authoritarian governments oligarchic democracy organic authoritarianism populist democracy and bureaucratic authoritarianism      The Patrimonial Foundations of the Brazilian Bureaucratic State Fernando Uricoechea,1980-01-01      *Vargas and Brazil* J. Hentschke,2006-12-11 This volume unites scholars from Brazil the U S and Europe who draw on a close re reading of the Vargas literature hitherto unavailable or unused sources and a wide array of methodologies to shed new light on the political changes and cultural representations of Vargas s regimes realising why he meant different things to different people      **The Color of Modernity** Barbara Weinstein,2015-04-05 In *The Color of Modernity* Barbara Weinstein focuses on race gender and regionalism in the formation of national identities in Brazil this focus allows her to explore how uneven patterns of economic development are consolidated and understood Organized around two principal episodes the 1932 Constitutionalist Revolution and 1954 s IV Centen rio the quadricentennial of S o Paulo s founding this book shows how both elites and popular sectors in S o Paulo embraced a regional identity that emphasized their European origins and aptitude for modernity and progress attributes that became and remain associated with whiteness This racialized regionalism naturalized and reproduced regional inequalities as S o Paulo became synonymous with prosperity while Brazil s Northeast a region plagued by drought and poverty came to represent backwardness and S o Paulo s racial Other This view of regional difference Weinstein argues led to development policies that exacerbated these inequalities and impeded democratization      *Race and Regionalism in the Politics of Taxation in Brazil and South Africa* Evan S. Lieberman,2003-09-01 Nationally specific definitions of citizenship proved decisive for the development of the Tax State in Brazil and South Africa in the twentieth century Although both countries had been divided along racial and regional lines in the late nineteenth century watershed constitutions addressed these political problems in very different ways South Africa s institutionalized white supremacy created a level of political solidarity that contributed to the development of a highly progressive and efficient tax system In Brazil federalism and official non racialism proved more divisive making the enactment and collection of progressive taxes much more difficult The legacy of these divergent state building processes remains evident at the beginning of the twenty first century Lieberman extends this analysis to a wider group of country cases and finds similar patterns and causal relationships between the politics of race region and taxation The findings are based on field research large scale national surveys macroeconomic data and various archival sources
