Ripples From The Zambezi Passion Entrepreneurship And The Rebirth Of Local Economies:

Ripples from the Zambezi Ernesto Sirolli, 1999-04-01 After six years of economic development work in Africa Ernesto Sirolli witnessed how little most foreign aid programs were actually doing for the people they hoped to help from creating a communal tomato field on the banks of the Zambezi river only to be demolished by the river's hippos at harvest time to donating snow plows to African nations However well intentioned Sirolli points out inappropriate development often creates more problems than it solves Thus was the genesis of this exciting and unique alternative to traditional economic development termed Enterprise Facilitation where depressed communities can build hope and prosperity by first helping individuals to recognize their talents and business passion and then providing the skills to transform their dreams into meaningful and rewarding work **Ripples from the Zambezi** Ernesto Sirolli, 1999 *How to Start a Business & Ignite Your Life* Ernesto Sirolli, 2012-10-11 Have you ever wondered why companies such as Apple Disney eBay and Starbucks succeeded What common factors did they and most other successful startups share Dr Ernesto Sirolli one of the world's leading consultants on the topic of economic development has the answer None of the entrepreneurs who founded the world's greatest companies did it on their own They put together an effective team that allowed their ventures to get off the ground flourish and grow And in his new book *How to Start a Business Ignite Your Life* Ernesto Sirolli has written down an easy to follow formula for success so that passionate people can transform their ideas into thriving businesses Ernesto Sirolli's approach to entrepreneurship is guided by the Trinity of Management a business model and philosophy based on the idea that there are three key areas in all companies product marketing and financial management A business has the greatest chance of achieving long term success when there is a team with the talent and knowledge needed to manage each area effectively The first half of the book provides an overview of this concept before delving more deeply into the three areas highlighting various personality traits and skills required for each role In the second half Dr Sirolli explains how these ideas can be practically applied to your startup enabling you to turn it into a prosperous enterprise Whether you are an aspiring entrepreneur or a current business owner looking to revitalize your company *How to Start a Business Ignite Your Life* will give you the tools you need to make a living by simply doing what you love **The Local Economy Solution** Michael Shuman, 2015 Reinventing economic development as if small business mattered In cities and towns across the nation economic development is at a crossroads A growing body of evidence has proven that its current cornerstone incentives to attract and retain large globally mobile businesses is a dead end Even those programs that focus on local business through buy local initiatives for example depend on ongoing support from government or philanthropy The entire practice of economic development has become ineffective and unaffordable and is in need of a makeover The Local Economy Solution suggests an alternative approach in which states and cities nurture a new generation of special kinds of businesses that help local businesses grow These cutting edge companies which Shuman calls pollinator businesses are creating jobs and the

conditions for future economic growth and doing so in self financing ways Pollinator businesses are especially important to communities that are struggling to lift themselves up in a period of economic austerity when municipal budgets are being slashed They also promote locally owned businesses that increase local self reliance and evince high labor and environmental standards The book includes nearly two dozen case studies of successful pollinator businesses that are creatively facilitating business and neighborhood improvements entrepreneurship local purchasing local investing and profitable business partnerships Examples include Main Street Genome which provides invaluable data to improve local business performance Supportland which is developing a powerful loyalty card for local businesses and Fledge a business accelerator that finances itself through royalty payments It also shows how the right kinds of public policy can encourage the spread of pollinator businesses at virtually no cost *Tribal Administration Handbook* Rebecca M. Webster, Joseph Bauerkemper, 2022-07-01

A direct response to the needs and ambitions articulated by tribal administrators and leaders this handbook seeks to serve practitioners students researchers and community members alike It grew out of an ongoing collaboration among scholars and practitioners from tribal nations universities tribal colleges and nonprofit organizations who are developing practical and teaching resources in the field of tribal administration and governance Designed as a readable accessible volume it focuses on three key areas tribal management funding and delivering core services and sovereign tribes engaging settler governments While the chapters complement one another by presenting a coherent and unified constellation of voices that illuminates a shared terrain of practical Indigenous governance each chapter ultimately stands alone to accommodate a variety of needs and interests with specific best practices quick reference executive summaries and practitioner notes to aid lesson applications This humble collection of remarkable voices initiates a conversation about tribal administration that will hopefully continue to grow in service to Native nations **If You Could Live Anywhere** Melody Warnick, 2022-07-26

Even when your job can be done from anywhere the place you call home still matters a lot By the old rules of work your dream career determines where you live If you want to make movies move to Los Angeles If you want to work in publishing you must be in New York And if you're launching a start up you'll only succeed in Silicon Valley But with the meteoric rise of remote and freelance work more people than ever are becoming location independent Even doctors teachers and other people in more traditional occupations have to make tough choices about where they settle because living in the right place can still make all the difference for your success and happiness So if work won't dictate where you live how will you ever decide If You Could Live Anywhere answers that question Melody Warnick unpacks the big picture concerns that we often miss when we're writing pros and cons lists about potential destinations Because the secret to being happy isn't moving it's aligning your location with your values You'll learn how to craft a personal location strategy that will make the most of your money your community and your life with success stories from people who flexed their location independence to find homes and work they love The future of work is clear it can happen wherever you are So where do you really want to be

Immigrant Entrepreneurship in Cities Cathy Yang Liu, 2020-08-01 This book draws on evidence from global cities around the world and explores various dimensions of immigrant entrepreneurship and urban development. It provides a substantive contribution to the existing literature in several ways. First of all, it pursues a comparative approach with case studies from both the global north and global south so as to broaden the theoretical framework in this area, especially as pertinent to emerging economies. Second, it covers multiple scales from local community place making to urban contexts of reception to transnational networks and connections. Third, it combines approaches and research methods from numerous disciplines investigating entry dynamics, trends and patterns, business performance, challenges, and the impact of immigrant entrepreneurship in urban areas. Finally, it pays particular attention to current international experiences regarding urban policies on immigrant entrepreneurship. Given its scope, the book will be an enlightening read for anyone interested in immigration, entrepreneurship, and urban development issues around the globe. As global cities around the world continue to attract both domestic migrants and international migrants to their bustling metropolises, immigrant entrepreneurship is emerging as an important urban phenomenon that calls for careful examination. From Chinatown in New York to Silicon Valley in San Francisco to Little Africa in Guangzhou, immigrant-owned businesses are not only changing the business landscape in their host communities but also transforming the spatial, economic, social, and cultural dynamics of cities and regions.

Local Economic and Employment Development (LEED) Local Innovations for Growth in Central and Eastern Europe OECD, 2007-11-07 Demonstrates that the success of local development strategies depends on the capacity of the government and its partners to accelerate change within the policy and governance aspects of economic and social development.

Cities as Sustainable Ecosystems Peter Newman, Isabella Jennings, 2012-09-26 Modern city dwellers are largely detached from the environmental effects of their daily lives. The sources of the water they drink, the food they eat, and the energy they consume are all but invisible, often coming from other continents, and their waste ends up in places beyond their city boundaries. *Cities as Sustainable Ecosystems* shows how cities and their residents can begin to reintegrate into their bioregional environment and how cities themselves can be planned with nature's organizing principles in mind. Taking cues from living systems for sustainability strategies, Newman and Jennings reassess urban design by exploring flows of energy, materials, and information along with the interactions between human and non-human parts of the system. Drawing on examples from all corners of the world, the authors explore natural patterns and processes that cities can emulate in order to move toward sustainability. Some cities have adopted simple strategies such as harvesting rainwater, greening roofs, and producing renewable energy. Others have created biodiversity parks for endangered species, community gardens that support a connection to their foodshed, and pedestrian-friendly spaces that encourage walking and cycling. A powerful model for urban redevelopment, *Cities as Sustainable Ecosystems* describes aspects of urban ecosystems from the visioning process to achieving economic security to fostering a sense of place.

Revising Smart Cities with Regenerative Design

Zaheer Allam, Peter Newman, 2023-04-12 This book presents a road map to urban regeneration through the contemporary concept of smart cities. It investigates why the concept has gained adoption as it has but until now it has been geared towards a profit making venture by large corporations and ignoring the economic aspirations of smaller companies and city councils. The technologies can provide enhanced liveability levels if the concept is redefined. This work will be of interest to academics and policy makers looking at exploring how to drive urban regeneration in a sustainable and inclusive fashion while supporting local economies. It presents a case study of Port Louis Mauritius with unique insights and data. Academics, policy makers and urban developers could potentially adopt the model and calibrate it to various cities and quantify the economic and social benefits. Better Spending for Localizing Global Sustainable Development Goals Fayyaz Baqir, Nipa

Banerjee, Sanni Yaya, 2019-11-05 This book centers around an intense debate among donors, policymakers, development practitioners and academics on the efficacy of aid in eradicating poverty while promoting human development. It seeks to fill the gap in present literature by presenting stories of better spending through implementing Sustainable Development Goals and addressing Agenda 2030 via indigenization of global development goals with initiatives at local and national levels. The book adopts an innovative approach to dealing with aid effectiveness by highlighting the relevance of better spending rather than excessive spending. It does so with real life examples of interventions made in the Global South to realize the vision of thinking globally and acting locally. These case studies speak to the significance of communities' role in shouldering responsibility for planning, financing, operating and maintaining local developmental initiatives. The examples also demonstrate how aid serves its purpose when used as an investment in communities and enterprising individuals in order to realize the strategic impact of giving and build a local receiving mechanism for indigenizing and achieving global development goals. The book references cases of better spending by governments, philanthropists and civil society organizations, CSOs from across Asia, Africa and Latin America on a range of issues and will thus be of interest to development practitioners, policymakers, donors, philanthropists, civil society organizations and academics and students of international development studies. **An Introduction to Community Development** Rhonda Phillips, Robert
