War and the World Jeremy Black, 2008-10-01 In this brilliant history of warfare Jeremy Black is the first to approach the entire modern era from a comprehensive global perspective He provides a wide ranging account of the nature purpose and experience of war over the past half millennium and argues the importance of viewing the rise of European power within a wider international context Investigating both land and sea warfare Black examines weaponry tactics strategy and resources as well as the political social and cultural impact of conflict The book takes issue with established interpretations not least those that emphasize technology and challenges the view that European military and naval forces were dominant throughout the period European mastery at sea did not always translate into equivalent success on land says Black and many non European military systems the Ottomans in their expansionist years Babur and the Mughals in sixteenth century India and the Manchu in China in the following century for example were formidable in their own right The author contends that in the nineteenth century the focal period of Europe s military revolution the international military balance shifted decisively Black shows how military developments combined with political economic and ideological shifts influenced the nature and success of European imperialism Linking debates on early modern history with those of more recent centuries he offers a fundamental reexamination of the role of war in the progress of nations

Bondage Alessandro Stanziani, 2015-11 For the first time this book provides the global history of labor in Central Eurasia Russia Europe and the Indian Ocean between the sixteenth and the twentieth centuries It contests common views on free and unfree labor and compares the latter to many Western countries where wage conditions resembled those of domestic servants This gave rise to extreme forms of dependency in the colonies not only under slavery but also afterwards in form of indentured labor in the Indian Ocean and obligatory labor in Africa Stanziani shows that unfree labor and forms of economic coercion were perfectly compatible with market development and capitalism proven by the consistent economic growth that took place all over Eurasia between the seventeenth and the nineteenth centuries This growth was labor intensive commercial expansion transformations in agriculture and the first industrial revolution required more labor not less Finally Stanziani demonstrates that this world did not collapse after the French Revolution or the British industrial revolution as is commonly assumed but

instead between 1870 and 1914 with the second industrial revolution and the rise of the welfare state
