Rise Of Urbanization And The Decline Of Citizenship:

Urbanization Without Cities Murray Bookchin, 1992 The city at its best is an eco community Urbanization is not only a social and cultural fact of historic proportions it is a tremendous ecological fact as well We must explore modern urbanization and its impact on the natural environment as well as the changes urbanization has produced in our sensibility towards society and toward the natural world If ecological thinking is to be relevant to the modern human condition we need a social ecology of the city

The Rise of Urbanization and the Decline of Citizenship Murray Bookchin, 1987 Examines the ecological impact of urbanization argues that citizens are allowing themselves to be disenfranchised and suggests ways to encourage active participation in politics

The Paradox of Citizenship in American Politics Mehnaaz Momen, 2017-08-28 This remarkable book does the unusual it embeds its focus in a larger complex operational space The migrant the refugee the citizen all emerge from that larger context The focus is not the usual detailed examination of the subject herself but that larger world of wars grabs contestations and importantly the claimers and resisters Saskia Sassen Professor of Sociology Columbia University USA This thought provoking book begins by looking at the incredible complexities of American identity and ends with the threats to civil liberties with the vast expansion of state power through technology A must read for anyone interested in the future of the promise and realities of citizenship in the modern global landscape Kevin R Johnson Dean UC Davis School of Law USA Momen focuses on the basic paradox that has long marked national identity the divide between liberal egalitarian self conception and persistent practices of exclusion and subordination The result is a thought provoking text that is sure to be of interest to scholars and students of the American experience Aziz Rana Professor of Law Cornell Law School USA This book is an exploration of American citizenship emphasizing the paradoxes that are contained normalized and strengthened by the gaps existing between proposed policies and real life practices in multiple arenas of a citizen s life The book considers the evolution of citizenship through the journey of the American nation and its identity its complexities of racial exclusion its transformations in response to domestic demands and geopolitical challenges its changing values captured in immigration policies and practices and finally its dynamics in terms of the shift in state power vis vis citizens While it aspires to analyze the meaning of citizenship in America from the multiple perspectives of history politics and policy it pays special attention to the critical junctures where rhetoric and reality clash allowing for the production of certain paradoxes that define citizenship rights and shape political discourse

The Politics of the Encounter Andy Merrifield, 2013-04-15 The Politics of the Encounter is a spirited interrogation of the city as a site of both theoretical inquiry and global social struggle The city writes Andy Merrifield remains important virtually and materially for progressive politics And yet he notes more than forty years have passed since Henri Lefebvre advanced the powerful ideas that still undergird much of our thinking about urbanization and urban society Merrifield rethinks the city in light of the vast changes to our planet since 1970 when Lefebvre s seminal *Urban Revolution* was first

published At the same time he expands on Lefebvre's notion of the right to the city which was first conceived in the wake of the 1968 student uprising in Paris We need to think less of cities as entities with borders and clear demarcations between what's inside and what's outside and emphasize instead the effects of planetary urbanization a concept of Lefebvre's that Merrifield makes relevant for the ways we now experience the urban The city from Tahrir Square to Occupy Wall Street seems to be the critical zone in which a new social protest is unfolding yet dissenters' aspirations are transcending the scale of the city physically and philosophically Consequently we must shift our perspective from the right to the city to the politics of the encounter says Merrifield We must ask how revolutionary crowds form where they draw their energies from what kind of spaces they occur in and what kind of new spaces they produce *Culture and Social Change* Marguerite Mendell, 1992

Global Canons in an Age of Contestation, 2024-07-12 Comparative constitutionalism emerged in its current form against the backdrop of the fall of the Berlin Wall and the end of the Cold War As that backdrop recedes into the past it is being replaced by a more multi polar and confusing world and the current state of the discipline of comparative constitutionalism reflects this fragmentation and uncertainty This has opened up space for new more varied and increasingly critical voices seeking to improve the project of democratic constitutionalism But it also raises questions What of the past if anything is worth preserving Which more recent parts should be defining of the field In this context this book asks which are or should be the canonical texts of comparative constitutionalism The theoretical scope of the contributions is broad and ambitious selecting primary material from beyond the existing textbooks to engage the concept of a canon This framework provides significant insights about inclusion and exclusion and proposes candidates for canonical and anti canonical materials The result is a wide ranging discussion among many voices of how particular judgments and other primary texts have shaped or should shape our understanding of central elements of democratic constitutionalism from a comparative law perspective This book is not a prescription of one universal understanding but a broader conversation about the field and the future of constitutional democracy **The Murray Bookchin Reader** Janet Biehl, Murray Bookchin, 1999 This collection

provides an overview of the thought of the foremost social theorist and political philosopher of the libertarian left today Best known for introducing ecology as a concept relevant to radical political thought in the early 1960s Murray Bookchin was the first to propose in the innovative and coherent body of ideas that he has called social ecology that a liberatory society would also have to be an ecological one His writings span five decades and encompass subject matter of remarkable breadth Bookchin's writings on revolutionary philosophy politics and history are far less known than the specific controversies that have surrounded him but deserve far greater attention Despite Bookchin's critical engagement with both Marxism and anarchism his political philosophy known as libertarian municipalism draws on the best of both for the emancipatory tools to build a democratic libertarian alternative His nature philosophy is an organic outlook of generation development and evolution that grounds human beings in natural evolution yet contrary to today's fashionable anti humanism places them

firmly at its summit Bookchin's anthropological writings trace the rise of hierarchy and domination out of egalitarian societies while his historical writings cover important chapters in the European revolutionary tradition Consistent throughout Bookchin's work is a search for ways to replace today's capitalist society which disenfranchises most of humanity for the benefit of the few and is poisoning the natural world with a more rational and humane alternative The selections in this reader constitute a sampling from the writings of one of the most pivotal thinkers of our era Enlightenment and Ecology Tarinski Yavor Tarinski,2021-02-20 Throughout his life prophetic American philosopher Murray Bookchin created social ecology as a comprehensive social program for the challenges of our present era Through tireless teaching speaking organizing and writing Bookchin presented a humanist vision of ecology based on community direct democracy and the better promises of the Enlightenment showing how we could transform our society into one that is free and egalitarian Enlightenment and Ecology is an international collection of commemorative essays by scholars and activists who have each incorporated the ideas of social ecology into their own work This book also examines how the Kurdish freedom movement is using the Bookchin's utopian ideas In a time of urgent need for radical change these essays provide both precious historical lessons and a transformative road map *Current Challenges of Environmental Philosophy* ,2023-09-04 It is extremely difficult to seek new paths in the twilight of our former idols ideals and visions of a happy and successful life The authors of the book invite the reader to embark on this journey in a free spirited manner and to look at the challenges posed by the new climate regime from different perspectives Whether one accepts the concept of the Anthropocene as a starting point or rather as an opportunity for constructive criticism readers will be fully engaged by thinking through historical philosophical scientific political social as well as educational problems *Future Survey Annual 1987* Michael Marien,1988-01-01

Environmental Challenges in the Mediterranean 2000-2050 Antonio Marquina Barrio,2004-02-29 This book addresses six key factors that will affect environmental policies in the Mediterranean region during the next fifty years population growth climate change soil erosion and desertification water scarcity food production and urbanization and pollution The authors assess these as potential sources of violent conflict The interdisciplinary approach makes this a relevant and useful reference for a broad range of professionals specialists and researchers *Reconstructing biotechnologies* Guido Ruivenkamp,Shuji Hisano,Joost Jongerden,2023-08-28 The main subject of this publication is the co creation of society and biotechnology The authors do not treat society and biotechnology as separate domains instead they consider technologies as socially constructed The main focus of this publication is on agro biotechnologies and the contributors present perspectives for reconstruction both from and in the North and the South Reconstructing biotechnologies offers a range of critical social analyses confronting the actuality of biotechnology with the potentialities of its social reconstruction In doing that the book develops and merges literature from four different disciplines namely i critical theory and its analyses of technology and power ii political economy critically assessing the interrelationship between

economy politics and technology iii social constructivism which holds that technology is the product of agency and knowledge systems and iv the analysis of rural society and agrarian technologies in rural sociology Reconstructing biotechnologies introduces exciting approaches and examples into the social reshaping of biotechnologies It brings together critical examinations of contemporary biotechnology development and puts forward possible alternatives written by critical scholars The contributions in this publication are for students and scholars in a wide range of disciplines such as social and political sciences science and technology studies and development studies The editors of the book are associated with the Social Sciences Department of Wageningen University in the Netherlands and the Graduate School of Economics of Kyoto University in Japan They have published extensively on social and political theory and biotechnology

Local Self-Government and the Right to the City Warren Magnusson, 2015-06-01 Despite decades of talk about globalization democracy still depends on local self government In Local Self Government and the Right to the City Warren Magnusson argues that it is the principle behind claims to personal autonomy community control and national self determination and holds the promise of more peaceful politics Unfortunately state centred thinking has obscured understanding of what local self government can mean and hindered efforts to make good on what activists have called the right to the city In this collection of essays Magnusson reflects on his own efforts to make sense of what local self government can actually mean using the old ideal of the town meeting as a touchstone Why cannot communities govern themselves Why fear direct democracy As he suggests putting more trust in the proliferating practices of government and self government will actually make cities work better and enable us to see how to localize democracy appropriately He shows that doing so will require citizens and governments to come to terms with the multiplicity indeterminacy and uncertainty implicit in politics and steer clear of sovereign solutions The culmination of a life's work by Canada's leading political theorist in the field Local Self Government and the Right to the City ranges across topics such as local government social movements constitutional law urban political economy and democratic theory

Environmental Challenges in the Mediterranean 2000-2050 Antonio Marquina,2012-12-06 This book collects most of the contributions prepared for the NATO Advanced Research Workshop ARW on Environmental Challenges in the Mediterranean 2000 2050 The ARW took place in Madrid from 2 to 5 of October 2002 Scholars and researchers from North and South of the Mediterranean and other countries from NATO gathered in Madrid for discussing several important factors that could affect Mediterranean security in the next 50 years In this regard the first chapter presents the different debates regarding environmental security that took place in the last decade This chapter is an introductory chapter and takes into account the possible audience in the Southern Mediterranean and the wishes of some contributors For this reason the chapter deals in extenso with the question of human security and the different approaches The ARW dealt with issues that may affect the supply of fundamental goods for human living To this end the complex question of climate change its impact in the Mediterranean the predicted increase in temperatures and predictions about rainfall are analysed As part of this approach a chapter about solar variability and climate change is also added *Ideology in a Global Age* R.

Soborski,2013-06-11 This book challenges the popular view that established ideologies no longer make sense in today's globalizing world Considered from a broad historical perspective major ideological traditions have not become destabilized and incoherent by globalization but remain meaningful political beliefs that shape the globalization debate **The Next**

Revolution Murray Bookchin,2015-01-06 From Athens to New York recent mass movements around the world have challenged austerity and authoritarianism with expressions of real democracy For more than forty years Murray Bookchin developed these democratic aspirations into a new left politics based on popular assemblies influencing a wide range of political thinkers and social movements With a foreword by the best selling author of *The Dispossessed* Ursula K Le Guin *The Next Revolution* brings together Bookchin's essays on freedom and direct democracy for the first time offering a bold political vision that can move us from protest to social transformation Global Green Politics Peter Newell,2019-12-12 In

light of growing urgency in tackling the global environmental crisis there is a need for new visions and strategies to ensure a more sustainable and just world This book provides a comprehensive overview of Green perspectives on a range of global issues including security the economy the state global governance development and the environment Drawing on academic literature on Green political theory combined with insights from real world practice and the author's own extensive personal experience it provides a timely and accessible account of why we need to embrace Green politics in order to tackle the

multiple crises facing the world today Presenting alternative visions and concrete strategies for achieving change this book will be of interest to activists and policy makers as well as students of environment development and politics *Ecocritique* Timothy W. Luke,1997 *Bookchin* Damian F. White,2008-10-20 This is the first comprehensive overview of the work of Murray Bookchin the left libertarian social theorist and political ecologist who is widely regarded as the visionary precursor of anti corporate politics Bookchin s writing spans fifty years and engages with a wide variety of issues from ecology to urban planning from environmental ethics to debates about radical democracy Weaving insights from Hegel and Marx Kropotkin and Mumford Bookchin presents a critical theory whose central utopian message is things could be other than they are This accessible introduction maps the evolution of Bookchin s project It traces his controversial engagements with Marxism anarchism critical theory postmodernism and eco centric thought It evaluates his attempt to develop a social ecology Finally it considers how his thinking relates to current debates in social theory and environmentalism critical theory and philosophy political ecology and urban theory Offering a clear account of Bookchin s key themes this book provides a critical but sympathetic account of the strengths and weaknesses of Bookchin s writing
