Rise Of Bucknell University:

The Rise of Bucknell University James Orin Oliphant, 1965 **The Rise of Bucknell University Press** James Orin Oliphant, 1962 The Rise of Bucknell University James Orin Oliphant, 1965 **The Campus and a Nation in Crisis** Willis Rudy, 1996

This book demonstrates how colleges and universities have played a vital role during times of great crisis in American history responding actively and helpfully to all the major challenges confronting their country. The colleges of the land became politicized repeatedly by such momentous developments as the American Revolution, the Civil War between the North and the South, the two vast global conflicts of the twentieth century and America's controversial involvement in Southeast Asia. Campus life became intensely fractious during these difficult and turbulent periods. Violence sometimes accompanied the campus activism. While there were significant differences in the response of groups on the campuses, students and professors reacted differently for example to the crises of earlier times as compared to those in more recent years. There is an element of continuity. That thread of continuity from the Revolutionary era to Vietnam was the fact that time after time the members of the academic communities sought to resolve the nation's crises constructively. They rallied to the cause of colonial rights and ultimately political independence. They supported the aims of their embattled sections North and South. They sought to influence their nation's responses to the global crises of the twentieth century. And they campaigned to extricate the nation from an increasingly costly military entanglement in Southeast Asia. In all five of these tests of national purpose, the colleges and universities while not the ultimate decision makers helped shape the eventual patterns of America's response in an important way.

Gentlemen and Scholars W. Bruce Leslie, 2018-01-16

Historians have dubbed the period from the Civil War to World War I the age of the university, suggesting that colleges in contrast to universities were static institutions out of touch with American society. Bruce Leslie challenges this view by offering compelling evidence for the continued vitality of colleges using case studies of four representative colleges from the Middle Atlantic region: Bucknell, Franklin and Marshall, Princeton, and Swarthmore. A new introduction to this classic reflects on his work in light of recent scholarship, especially that on southern universities, the American college in the international context, the experience of women, and liberal Protestantism's impact on the research university. According to Leslie, nineteenth-century colleges were designed by their founders and supporters to be instruments of ethnic, denominational, and local identity. The four colleges Leslie examines in detail here were representative of these types, each serving a particular religious denomination or lifestyle. Over the course of this period, however, these colleges like many others were forced to look beyond traditional sources of financial support toward wealthy alumni and urban benefactors. This development led to the gradual reorientation of these schools toward an emerging national urban Protestant culture. Colleges that responded to and exploited the new currents prospered. Those that continued to serve cultural distinctiveness and localism risked financial sacrifice. Leslie develops his argument from a close study of faculties, curricula, financial constituencies, student bodies, and campus life. The book will be

valuable to those interested in American history higher education as well as the particular institutions studied This book continues the story started by Veysey s *Emergence of the American University* Its innovative approach should encourage scholars to study colleges and universities as parts of local communities rather than as freestanding entities Leslie s findings will substantially revise currently accepted accounts of the history of education in the late nineteenth century Louise L. On the Make Brian P Luskey,2010-01-01 This fascinating portrait of American striving locates the origins of white collar culture in the precarious world of the antebellum clerk Timothy B Spears author of Chicago Dreaming In the mid nineteenth century ambitious young men found a path to wealth and respect by working as clerks in the bustling cities of the American Northeast At stores and commercial offices these strivers and counter jumpers also found opportunities for self gratification in their new identities as independent men But being on the make in a volatile capitalist economy and fluid urban society was fraught with uncertainty In *On the Make* Brian P Luskey illuminates at once the power of the ideology of self making and the important contests over the meanings of respectability manhood and citizenship that helped to determine who clerks were and who they would become Drawing from a rich array of archival materials including clerks diaries newspapers credit reports census data advice literature and fiction Luskey argues that a better understanding of clerks and clerking helps make sense of the culture of capitalism and the society it shaped in this pivotal era

Man in the Northeast ,1990 Intersections of Gender, Class, and Race in the Long Nineteenth Century and Beyond Barbara Leonardi,2018-12-29 This book explores the intersections of gender with class and race in the construction of national and imperial ideologies and their fluid transformation from the Romantic to the Victorian period and beyond exposing how these cultural constructions are deeply entangled with the family metaphor For example by examining the re signification of the angel in the house and the deviant woman in the context of unstable or contingent masculinities and across discourses of class and nation the volume contributes to a more nuanced understanding of British cultural constructions in the long nineteenth century The central idea is to unearth the historical roots of the family metaphor in the construction of national and imperial ideologies and to uncover the interests served by its specific discursive formation The book explores both male and female stereotypes enabling a more perceptive comparison enriched with a nuanced reflection on the construction and social function of class

Stars and Stripes Across the Pacific William Nimmo,2001-09-30 In the late 19th century the United States began a period of increased engagement in the Western Pacific a situation that continues to this day Nimmo provides a study of U S diplomatic economic and military relations with the nations of East Asia and the Pacific from the late 1800s to 1945 In addition to interaction with China Korea and Japan the book includes U S involvement in Hawaii American Samoa Guam and the Philippines This one volume treatment ranging from the Spanish American War to the Second World War examines the continuity in U S policy during this crucial period Particular attention is devoted to the U S response to

Japan's territorial aggression during this period primarily its undeclared wars against China in Manchuria in 1931 and in North and Central China from 1937 to 1945. This examination counters revisionist claims that the United States led Japan into war in 1941 and that war could have been avoided by the pursuit of a more conciliatory policy on the part of the U.S. It explores why it was necessary for the U.S. to demand unconditional surrender and refutes claims that Japan was a victim of the war. The acquisition of U.S. territory in the Pacific initially began with the annexation of Hawaii and continued with the former possessions of Spain ceded in the Spanish American War. Nimmo follows this story through the Philippine War, efforts to promote Philippine independence, the Commonwealth era, and finally independence in 1946.

The Dominion and the Rising Sun John D. Meehan, 2004. *The Dominion and the Rising Sun* is the first major study of Canada's diplomatic arrival in Japan and by extension East Asia. It examines the political, economic and cultural relations forged during this seminal period between the foremost power in Asia and the young dominion tentatively establishing itself in world affairs. An overview of Canada's initial foray into Pacific affairs, it begins with the opening in 1929 of the Canadian legation in Tokyo, Canada's third such office overseas, and concludes with the outbreak of hostilities in 1941. Primarily a diplomatic history, the book also explores the impact of traders, interest groups and missionaries on Canadian attitudes toward Japan during the interwar years. More fundamentally, it examines Canada's diplomatic coming of age, closely revealing its important Pacific dimension, a fact overlooked by historians until now, as well as the disjunct between Canada's commitment to peace and its trade with an aggressor. Meehan suggests that Canada's initially benign view of Japan, its reluctance to adopt positions in advance of its Anglo-American allies and its lucrative Pacific trade led to a credibility gap in its policies towards East Asia. *The Dominion and the Rising Sun* charts Canada's relationship with Japan and is essential reading for those interested in Canadian history, international relations and Asia-Pacific studies.

The Epistolary Novel Joe Bray, 2003-08-29. The epistolary novel is a form which has been neglected in most accounts of the development of the novel. This book argues that the way that the

eighteenth century epistolary novel represented consciousness had a significant influence on the later novel Critics have drawn a distinction between the self at the time of writing and the self at the time at which events or emotions were experienced This book demonstrates that the tensions within consciousness are the result of a continual interaction between the two selves of the letter writer and charts the oscillation between these two selves in the epistolary novels of amongst others Aphra Behn Eliza Haywood Samuel Richardson Fanny Burney and Charlotte Smith The Story of a Rising Race James Jefferson Pipkin, 1902 An attempt by a Southerner to rise above deep breed prejudices and objectively list the known accomplishments of African Americans following the end of slavery **Religion on the Margins** Benjamin M. Pietrenka, 2024-09-30 In the eighteenth century missionaries of the radical Pietist Moravian Church wandered from Germanic Europe to the edges of the known world in search of tolerance and a closer relationship to God This open minded cosmopolitan undertaking led to unintended consequences however both for the Moravians and for the other persecuted peoples European African and Indigenous they sought to convert Religion on the Margins examines the complexities of early modern Moravians as a cosmopolitan community focused on an eschatological global vision while having to negotiate diverse cultures and most importantly the institution of slavery Drawing on a transatlantic archive of teachings letters and diaries Benjamin M Pietrenka sheds light on how a professedly anti colonial cast of characters navigated and found themselves taking part in a deeply colonial narrative Ultimately Pietrenka shows how the Moravians operating from within the constraints of mission work became complicit in the European imperial project in spite of their stated values and their own experience of marginalization For scholars of early modern religion empire and politics Pietrenka s book challenges tendencies in the field to equate modernity with secularization and invites us to consider how non elite actors understood religion and ethnicity through each other in ways that contributed to the emergence of modern scientific racism and white supremacy
