Risk Media And Stigma Understanding Public Challenges To Modern Science And Technology:

Risk, Media and Stigma Paul Slovic, 2013-11-05 The benefits of modern technology often involve health safety and environmental risks that produce public suspicion of technologies and aversion to certain products and substances Amplified by the pervasive power of the media public concern about health and ecological risks can have enormous economic and social impacts such as the stigmatization experienced in recent years with nuclear power British beef and genetically modified plants This volume presents the most current and comprehensive examination of how and why stigma occurs and what the appropriate responses to it should be to inform the public and reduce undesirable impacts Each form of stigma is thoroughly explored through a range of case studies Theoretical contributions look at the roles played by government and business and the crucial impact of the media in forming public attitudes Stigma is not always misplaced and the authors discuss the challenges involved in managing risk and reducing the vulnerability of important products industries and institutions while providing the public with the relevant information they need about risks

The Ethics of Technological

Risk Lotte Asveld, Sabine Roeser, 2012-05-04 A comprehensive and important collection that includes essays by some of the leading figures in the field Essential reading for anyone interested in risk assessment Professor Kristin Shrader Frechette University of Notre Dame The editors are to be congratulated for bringing together a distinguished international group of theorists to reflect on the issues This volume will be sure to raise the level of debate while at the same time showing the importance of philosophical reflection in approaches to the problems of the age Professor Jonathan Wolff University College London This volume brings together top authors from the fields of risk philosophy social sciences and psychology to address the issue of how we should decide how far technological risks are morally acceptable or not The underlying principles are examined along with methodological challenges public involvement and instruments for democratization A strong theoretical basis is complemented by a range of case studies from some of the most contentious areas including medical ethics and GM crops This book is a vital new resource for researchers students and anyone concerned that traditional approaches to risk management don't adequately address ethical considerations

Risk in Extreme Environments Vicki M. Bier, 2017-10-19

Risk in Extreme Environments presents a wide ranging discussion of approaches for assessing and managing extreme risks Extreme events are not only severe but also outside the normal range of experience of the system in question and can include environmental catastrophe engineering failure financial or business meltdown and nuclear or other extreme terrorism The book focuses on synthesizing research results in a way that provides insights useful to decision makers and enables them to ask probing questions about the risks faced by their organizations identify creative solutions and minimize the neglect of extreme risks that can come from a focus on mundane or ordinary management challenges The book details case studies on nuclear power infectious diseases and global catastrophic risks in addition to sections on risk assessment risk management and risk perceptions Since effective management benefits from an interdisciplinary perspective the chapter authors include

experts in economics engineering geography law political science psychology sociology and science in addition to risk analysis Risk in Extreme Environments is an accessible and valuable resource for risk managers and other decision makers responsible for large complex business and government decisions while also providing enough detail and references to be informative for risk analysts interested in learning more about technical aspects of the various methods **Deep Disposal**

William Leiss,2024-09-10 Canada is one of many countries around the world that use nuclear reactors to generate electrical power in part to reduce our carbon footprint Yet this energy produces hazardous long lived waste that emits dangerous radioactivity for tens of thousands of years Nuclear waste stored temporarily for decades must be safely disposed of so it will not pose a serious threat to human health and the environment This means placing it in locations deep underground in granite sedimentary rock or clay Canada s ideal location is somewhere on the Canadian Shield the 2 5 billion year old crystalline rock that undergirds much of the country Beginning in 2010 some twenty two communities most in Ontario volunteered to host the repository In Deep Disposal William Leiss explains the challenges that have arisen in the evaluation of potential sites over the last decade High level nuclear waste is the most hazardous byproduct of an energy source that is incredibly useful and increasingly in demand Finding the ideal place to store it permanently is an urgent policy crisis facing our country Deep Disposal reveals the nature of this crisis and how we might overcome it **Nanotechnology, Risk and Communication**

A. Anderson,A. Petersen,C. Wilkinson,S. Allan,2009-02-17 Drawing together insights from media studies sociology and science and technology studies this book is one of the first major studies of media coverage policy debates and public perceptions of nanotechnologies and makes a fascinating and timely contribution to debates about the public communication of science *Encyclopedia of Technological Hazards and Disasters in the Social Sciences* Duane A.

Gill,Liesel A. Ritchie,Nnenia M. Campbell,2024-11-08 The Encyclopedia of Technological Hazards and Disasters in the Social Sciences brings together an array of global experts to investigate explore and analyse human caused disaster events Providing insights into both the origins and aftermaths of disaster events it offers advanced understanding of a broad range of disaster events facing society during the Anthropocene **Wildfire Risk** Wade E. Professor Martin,Carol Professor Raish,Brian Professor Kent,2010-09-30 The continuing encroachment of human settlements into fire prone areas and extreme

fire seasons in recent years make it urgent that we better understand both the physical and human dimensions of managing the risk from wildfire Wildfire Risk follows from our awareness that increasing public knowledge about wildfire hazard does not necessarily lead to appropriate risk reduction behavior Drawing heavily upon health and risk communication and risk modeling the authors advance our understanding of how individuals and communities respond to wildfire hazard They present results of original research on the social economic and psychological factors in responses to risk discuss how outreach and education can influence behavior and consider differences among ethnic racial groups and between genders with regard to values views and attitudes about wildfire risk They explore the role of public participation in risk assessment

and mitigation as well as in planning for evacuation and recovery after fire Wildfire Risk concludes with a dedicated section on risk modeling with perspectives from decision sciences geography operations research psychology experimental economics and other social sciences

SARS Unmasked Michael G. Tyshenko, Cathy Paterson, 2010-03-19 Will SARS or another pandemic influenza reoccur and if it does have we learned how to manage pandemics more effectively In *SARS Unmasked* risk communication expert Michael Tyshenko offers answers to this and other questions Cathy Paterson who worked as a nurse clinician during the Toronto SARS crisis adds an important view from the frontlines Their analysis reveals an out of control situation with mixed risk communication messages a lack of leadership and an overwhelmed health care system that was unable to both cope with the crisis in Toronto and provide adequate support for their most valuable employees at the time health care workers

The Feeling of Risk Paul Slovic, 2013-03-07 *The Feeling of Risk* brings together the work of Paul Slovic one of the world's leading analysts of risk to describe the extension of risk perception research into the first decade of this new century In this collection of important works Paul Slovic explores the conception of risk as feelings and examines the interaction of feeling and cognition in the perception of risk He also examines the elements of knowledge cognitive skill and communication necessary for good decisions in the face of risk The first section of the book looks at the difficulty of understanding risk without an emotional component for example that disaster statistics lack emotion and thus fail to convey the true meaning of disasters and fail to motivate proper action to prevent them The book also highlights other important perspectives on risk arising from cultural worldviews and concerns about specific hazards pertaining to blood transfusion biotechnology prescription drugs smoking terrorism and nanotechnology Following on from *The Perception of Risk* 2000 this book presents some of the most significant research on risk perception in recent years providing essential lessons for all those involved in risk perception and communication

Environmental Policymaking in an Era of Climate Change Matthew C. Nowlin, 2019-05-08 As the world considers how to deal with the impacts of a changing climate it's vital that we understand the ways in which the United States policymaking process addresses environmental issues A mix of existing theory and original analysis *Environmental Policymaking in an Era of Climate Change* applies recent policy scholarship to questions of environmental governance with a particular focus on climate change The book examines how competing political actors influence policies within and across institutions focusing on both a macro level where formal bodies set the agenda and a meso level where issues are contained within policy subsystems Divided into two sections the book incorporates insights from political science and public policy to provide the reader with a better understanding of how environmental policy decisions are made Part I offers a framework for understanding environmental policymaking exploring the history of environmental policy and discussing the importance of values in environmental policy Part II applies the framework to the issue of climate change focusing on agenda setting and the role of formal institutions in the policymaking process covering topics that include Congress the Executive and Judicial branches and how climate change

cuts across policy subsystem boundaries By placing specific climate change case studies in a broader context Environmental Policymaking in an Era of Climate Change will help students enrolled in political science public administration public policy and environmental studies courses as well as all those interested in the impacts of policy on climate change to understand what is and will likely continue to be one of the most pressing policy issues of our time

Those Damned Immigrants Ediberto Román, Michael A. Olivas, 2013-07-31 This data driven and massively documented study replaces rhetoric with analysis myth with fact and apocalyptic predictions with sane and realizable proposals Stanley Fish Florida International University The election of Barack Obama prompted people around the world to herald the dawning of a new postracial era in America Yet a scant one month after Obama's election Jose Oswaldo Sucuzhanay a 31 year old Ecuadorian immigrant was ambushed by a group of white men as he walked with his brother Yelling anti Latino slurs the men beat Sucuzhanay into a coma He died 5 days later The incident is one of countless attacks that Latino immigrants have confronted for generations in America And these attacks are accepted by a substantial number of American citizens and elected officials Quick to cast all Latino immigrants as illegal opponents have placed undocumented workers at the center of their anti immigrant movement targeting them as being responsible for increasing crime rates a plummeting economy and an erosion of traditional American values and culture In *Those Damned Immigrants* Ediberto Román takes on critics of Latino immigration using government statistics economic data historical records and social science research to provide a counter narrative to what he argues is a largely one sided public discourse on Latino immigration Ediberto Román is Professor of Law and Director of Citizenship and Immigration Initiatives at Florida International University Michael A Olivas is the William B Bates Distinguished Chair in Law at the University of Houston Law Center and Director of the Institute for Higher Education Law and Governance at UH In the Citizenship and Migration in the Americas series Media, Environment and the Network Society A. Anderson, 2014-09-18 The news media has become a key arena for staging environmental conflicts Through a range of illuminating examples ranging from climate change to oil spills *Media Environment and the Network Society* provides a timely and far reaching analysis of the media politics of contemporary environmental debates

The Social Contours of Risk Roger E. Kasperson, Jeanne Kasperson, 2022-02-15 We live in a risk society where the identification distribution and management of risks from new technology environmental factors or other sources are crucial to our individual and social existence In *The Social Contours of Risk* Volumes 1 and 2 two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide ranging field Volume II centres on the analysis and management of risk in society in international business and multinationals and globally The acceptability of risk to an individual depends on the context whether the larger society or in for example a corporate framework Their work clarifies the structures and processes for managing risks in the private sector and the factors that produce or impede effective decisions The authors demonstrate that corporate culture is crucial in determining risk

management They analyse the transfer of corporate risk management systems from industrial to developing countries and how globalization is spreading and creating new kinds of risk the combination of traditional and modern hazards presented by climate change technology transfer and economic growth They describe the new priorities and capacities needed to deal with these enhanced vulnerabilities around the globe *Social Contours of Risk* Roger E Kasperson, 2014-07-30 We live in a risk society where the identification distribution and management of risks from new technology environmental factors or other sources are crucial to our individual and social existence In *The Social Contours of Risk* Volumes I and II two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide ranging field Volume II centres on the analysis and management of risk in society in international business and multinationals and globally The acceptability of risk to an individual depends on the context whether the larger society or in for example a corporate framework Their work clarifies the structures and processes for managing risks in the private sector and the factors that produce or impede effective decisions The authors demonstrate that corporate culture is crucial in determining risk management They analyse the transfer of corporate risk management systems from industrial to developing countries and how globalization is spreading and creating new kinds of risk the combination of traditional and modern hazards presented by climate change technology transfer and economic growth They describe the new priorities and capacities needed to deal with these enhanced vulnerabilities around the globe The Psychology of Risk Glynis M. Breakwell, 2014-09-15 Since the first edition of *The Psychology of Risk* there have been enormous macro economic and socio political changes globally the chaos in the world banking system and the financial crisis and recessions that it presaged the Arab Spring and the revolutionary shifts in power in the Middle East with rippled consequences around the world the development of ever more sophisticated cyber terrorism that can strike the private individual or the nation state with equal ease Amidst these changes in the face of hazard do the psychological models built to explain human reactions to risk still apply Has the research over the last few years resulted in an improvement in our understanding of how people perceive and act in relation to risk In this second edition Professor Dame Breakwell uses illustrations and current examples to address these questions and provide a totally up to the minute review of what is known about the psychology of risk *The Social Contours of Risk: Risk analysis, corporations and the globalization of risk* Jeanne X. Kasperson, Roger E. Kasperson, 2005 *The Social Contours of Risk* Volume I Publics Risk Communication and the Social Amplification of Risk We live in a risk society where the identification distribution and management of risks from new technology environmental factors or other sources are crucial to our individual and social existence In *The Social Contours of Risk* Volumes I and II two of the world's leading and most influential analysts of the social dimensions of risk bring together their most important contributions to this fundamental and wide ranging field Volume I collects their fundamental work on how risks are communicated among different publics and stakeholders including local communities corporations and the

larger society It analyses the problems of lack of transparency and trust and explores how even minor effects can be amplified and distorted through media and social responses preventing effective management The final section investigates the difficult ethical issues raised by the unequal distribution of risk depending on factors such as wealth location and genetic inheritance with examples from worker and public protection facility siting conflicts transporting hazardous waste and widespread impacts such as climate change

Medicine, Risk, Discourse and Power John Martyn

Chamberlain,2015-11-19 This book critically explores from a comparative international perspective the role medicine plays in constructing and managing natural and social risks including those belonging to modern medical technology and expertise Drawing together chapters written by professional practitioners and social scientists from the UK South America Australia and Europe the book offers readers an insightful and thought provoking analysis of how modern medicine has transformed our understanding of both ourselves and the world around us but in so doing has arguably failed to fully recognize and account for its unintended and negative effects This is an essential read for social scientists practitioners and policymakers who want to better understand how they can develop new ways of thinking about how modern medicine can promote social goods and enhance public health

Health, Risk and Vulnerability Alan Petersen,Iain Wilkinson,2007-10-30 Focusing on the connections between health risk and insecurity this book reflects upon the meaning and significance of risk across a broad range of social and institutional contexts offering new perspectives on an important field of contemporary debate
