## **Risk Society Vol 17 Towards A New Modernity:**

**Risk Discourse and Responsibility** Annelie Ädel, Jan-Ola Östman, 2023-07-15 The widespread view that risk is highly relevant in late modern societies has also meant that the very study of risk has become central in many areas of social studies. The key aim of this book is to establish Risk Discourse as a field of research of its own in language studies. Risk Discourse is introduced as a field that not only targets elements of risk safety and security but crucially requires aspects of responsibility for in-depth analysis. Providing a rich illustration of ways in which risk and responsibility can serve as analytical tools, the volume brings together scholars from different disciplines within the study of language. An Introduction and an Epilogue highlight the intricate relationship between risk and responsibility. Part 1 deals with expert and lay perspectives on risk. Part 2 with emerging genres for risk discourse. Part 3 with risk and technology and Part 4 with ways of managing risk. The topics covered such as COVID 19, nuclear energy, machine translation, terrorism are socially pertinent and timely. **Responsible Innovation** Richard Owen, John R. Bessant, Maggy Heintz, 2013-03-21 Science and innovation have the power to transform our lives and the world we live in for better or worse in ways that often transcend borders and generations. From the innovation of complex financial products that played such an important role in the recent financial crisis to current proposals to intentionally engineer our Earth's climate, the promise of science and innovation brings with it ethical dilemmas and impacts which are often uncertain and unpredictable. It is often only once these have emerged that we feel able to control them. How do we undertake science and innovation responsibly under such conditions towards not only socially acceptable but socially desirable goals and in a way that is democratic, equitable and sustainable? Responsible innovation challenges us all to think about our responsibilities for the future as scientists, innovators and citizens and to act upon these. This book begins with a description of the current landscape of innovation and in subsequent chapters offers perspectives on the emerging concept of responsible innovation and its historical foundations including key elements of a responsible innovation approach and examples of practical implementation. Written in a constructive and accessible way, Responsible Innovation includes chapters on innovation and its management in the 21st century, a vision and framework for responsible innovation, concepts of future-oriented responsibility as an underpinning philosophy, values-sensitive design, key themes of anticipation, reflection, deliberation and responsiveness, multi-level governance and regulation, perspectives on responsible innovation in finance, ICT, geoengineering and nanotechnology. Essentially multidisciplinary in nature, this landmark text combines research from the fields of science and technology, studies, philosophy, innovation, governance, business studies and beyond to address the question: How do we ensure the responsible emergence of science and innovation in society? **Experience on the Edge: Theorizing Liminality** Brady Wagoner, Tania Zittoun, 2021-10-19 Liminality has become a key concept within the social sciences with a growing number of publications devoted to it in recent years. The concept is needed to address those aspects of human experience and social life that fall outside of ordered structures. In contrast to the clearly defined roles and routines

that define so much of industrial work and economic life it highlights spaces of transition indefiniteness ambiguity play and creativity Thus it is an indispensable concept and a necessary counterweight to the overemphasis on structural influences on human behavior This book aims to use the concept of liminality to develop a culturally and experientially sensitive psychology This is accomplished by first setting out an original theoretical framework focused on understanding the liminal sources of cultural experience and second an application of concept to a number of different domains such as tourism pilgrimage aesthetics children s play art therapy and medical diagnosis Finally all these domains are then brought together in a concluding commentary chapter that puts them in relation to an overarching theoretical framework This book will be useful for graduate students and researchers in cultural psychology critical psychology psychosocial psychology developmental psychology health psychology anthropology and the social sciences cultural studies among others

**The Fragility of Responsibility** Giovanni De Grandis, Anne Blanchard, 2024-12-02 Attempts to steer research innovation and business in desirable directions have failed to meet expectations Corporate social responsibility CSR and responsible research and innovation RRI seem to be losing ground while the challenges they sought to address remain Despite their shortcomings these concepts remind us of the need to take responsibility for what we as researchers and entrepreneurs bring into the world and to keep questioning the given framework Drawing from the experience of the AFINO project a unique attempt to bring together RRI and CSR and to promote networks learning and skills building in Norway this book contextualises and explores the practical challenges of actualising responsible practices even in the propitious Norwegian context Readers interested in RRI CSR transdisciplinarity and in the governance of research and innovation will find extensive information and insights about the challenges of steering research and business practices towards desirable ends and how to address them

Genomics and Society Martin W. Bauer, 2013-06-17 The impact of genomics on society has been the focus of debate and conflict across the world Contrasting views of risks and benefits trust in science and regulation the understanding of science media coverage and mobilization of the public by civil society groups all have been cited as drivers of public opinion The long running controversy is a signal that the public s view cannot be ignored in the development and implementation of new technologies arising out of genomics such as agricultural biotechnologies genetic testing and the uses of genetic information the cloning of human cells and tissues and transgenic animals Written by a progressive international group of social scientists from Europe North America and Japan this volume presents a series of comparative perspectives on the social ethical and legal implications of genomics The result is a book which encapsulates the lessons to be learned from the controversies of the 1990s and raises the level of debate on the societal implications of new developments in genomics

**Contemporary Muslim Girlhoods in India** Saba Hussain, 2019-06-06 Based on empirical research in India this book presents a post colonial feminist analysis of subjectivities available to Muslim girls and the ways in which they are inhabited and negotiated Examining government education policies together with the narratives of teachers and parents the author

explores the manner in which gender class ethnicity and religion intersect both to confer certain subjectivities and to challenge or reinforce the conferred subjectivities A study of the imposition of subjectivities that label Muslim girls as economically subordinate and culturally different Contemporary Muslim Girlhoods in India analyses Muslim girls reconstructions of self through a combination of reflexivity resilience and agency and conformity Drawing on the thought of Pierre Bourdieu and Nancy Fraser this volume offers an original contribution to the study of gendered minorities institutions and relationships in post colonial contexts and an alternative to identitarian politics or cultural explanations of Muslim women s educational deprivation in India As such it will appeal to scholars of sociology and gender studies with interests in education class religion and identity

**Targeting Domestic Abuse with Police Data** Matthew P. Bland, Barak Ariel, 2020-09-29 This book explores the potential of domestic abuse data to assess the level of harm caused to victims and the amount of resources required to respond to it Policing domestic abuse has become a major activity for the police service in England and Wales Part of the police strategy is to gather hundreds of thousands of detailed records about victims and suspects the single largest set of domestic abuse records available but one that to date has largely unexplored by researchers In this volume Matthew Bland and Barak Ariel analyse three substantial datasets taken from police forces across the country and ask Can police data be used to derive meaningful insight How should we use these data to measure harm Just how much domestic abuse involves a repeat victim Does abuse get more serious over time Can serious domestic abuse be predicted before it occurs This volume illustrates the scale of the challenge the police and other agencies face with reducing domestic abuse A small proportion of individuals generate a majority of harm this book argues that police records offer opportunities to identify these individuals before the harm occurs Demonstrating that statistical techniques can be used to profile domestic abuse to target harm reduction strategies more precisely and even identify a sizable proportion of serious cases before they occur this volume will be of interest to law enforcement officials policing researchers and policy makers interested in reducing the phenomenon of domestic abuse

**Women and Evacuation in the Second World War** Maggie Andrews, 2019-08-08 Groups of young evacuees standing on railway stations with gas masks and cardboard suitcases have become an iconic image of wartime Britain but their histories have eclipsed those of women whose domestic lives were affected This book explores the effects of this unparalleled interference in the domestic lives of women looking at the impact on everyday experience and on ideas of femininity domesticity and motherhood Maggie Andrews argues that wartime evacuation is important for understanding the experience and the contested meanings of domesticity and motherhood in the 20th century As this book shows evacuation represents a significant and unrecognised area of women s war work and precipitated the rise of competing public discourses about domestic labour and motherhood
