 John Mack, 2013-09-15 There is nothing more enticing disenchanting and enslaving than the life at sea wrote Joseph Conrad And there is certainly nothing more integral to the development of the modern world In The Sea A Cultural History John Mack considers those great expanses that both unite and divide us and the ways in which human beings interact because of the sea from navigation to colonization to trade Much of the world s population lives on or near the coast and as Mack explains in a variety of ways people actually inhabit the sea The Sea looks at the characteristics of different seas and oceans and investigates how the sea is conceptualized in various cultures Mack explores the diversity of maritime technologies especially the practice of navigation and the creation of a society of the sea which in many cultures is

all male often cosmopolitan and always hierarchical He describes the cultures and the social and technical practices characteristic of seafarers as well as their distinctive language and customs As he shows the separation of sea and land is evident in the use of different vocabularies on land and on sea for the same things the change in a mariner s behavior when on land and in the liminal status of points uniting the two realms like beaches and ports Mack also explains how ships are deployed in symbolic contexts on land in ecclesiastical and public architecture Yet despite their differences the two realms are always in dialogue in symbolic and economic terms Casting a wide net The Sea uses histories maritime archaeology biography art history and literature to provide an innovative and experiential account of the waters that define our worldly existence
