Daniel S. Bromberg, William T. O'Donohue, 2013-01-28 Adolescent and child sexuality is studied by developmental psychologists from a research perspective and is of interest to forensic psychologists dealing with abuse and custody issues as well as rape cases In many cases it is of interest whether the child in question was sexually active to understand the extent to which an underage minor might have voluntarily participated in sexual activity as opposed to having been coerced Previously researchers interested in the applications of
