## **Long Road Called Goodbye:**

**Over Streams and Squirrel Woods...** Alys Williams, 2011 I wanted to write about people who have a disease which destroys the ability to communicate or recognise anyone causes the loss of bodily functions forces dependency and dehumanises the sufferer as Lewy body dementia did to my Mum Some form of dementia affects 1 in 20 of the over 65 s and 1 in 5 of over 80 s so many of us how does it feel if you know that it is happening to you Some sufferers have said that it enriches awareness and acts as a prism through which life is viewed differently I could see that fantasy and reality merged in my Mum s mind and often wondered if she had an alternative world where her insecurities and fears manifested themselves as monsters and where she was powerful resourceful and a leader in contrast to her claustrophobic trapped and deteriorating reality Hopefully there is still power and creativity in the human mind even when it is damaged by plaques and tangles I have imagined her thoughts based on what she said to me and from what I observed and have described factually and honestly the journey we took together Recording my experience of her illness treatment and life in two nursing homes led me to question how we treat our elderly our shocking lack of effort to communicate with those with dementia and what constitutes identity self and the soul Over Streams and Squirrel Woods explores what can happen when reality becomes too painful and the disconnection between people when they see and hear differently from one another It is about boundless love frustration guilt and the inexorable inevitability of aging This is a valuable addition to the dementia literature rewriting our expectation of what those with dementia can think John Suchet *Sorrow's Long Road* Barbara Blatchley, 2025-09-16 After the research psychologist Barbara Blatchley s husband and partner of thirty six years passed away her life changed utterly Seeking to understand the pain and confusion she felt Blatchley began exploring the psychology and neuroscience of bereavement Why does grief last so long and hurt so much How do we come to terms with loss In Sorrow s Long Road Blatchley interweaves an engaging and reader friendly look at the research on grief with her powerful personal narrative Beginning with the day of her husband s death she traces the questions that loss raised and the answers that science provides Blatchley examines the psychology of love and attachment detailing how we bond with others and what happens when those bonds are broken She considers the storm of emotions that the bereaved experience as well as both the physical and psychological effects of grieving Blatchley maps out how we adapt to the changes that loss brings and find a new identity afterward In addition to her own experiences she shares the stories of other people who have suffered a loss and struggled to recover illustrating how grief changes over time Accessibly written and deeply empathetic Sorrow s Long Road humanizes the science showing how psychology and neuroscience can help us make sense of the darkest times in our lives **Ethical Foundations of Palliative Care for Alzheimer Disease** Ruth B. Purtilo, Henk A.M.J. ten Have, 2010-09-01 Alzheimer disease afflicts more than twelve million people worldwide and its incidence is increasing at a staggering rate People with the disorder are living longer than have those in previous generations and they require interventions for quality of life issues

associated with palliative care. However, the symptoms of Alzheimer disease often fail to place such persons into settings where palliative care resources are available to them. Indeed, clinicians and other caregivers may be unsure about what constitutes effective palliation in these cases. At the same time, the ethical issues involved in providing end of life care to persons with Alzheimer disease remain on the margins of mainstream bioethics. In *Ethical Foundations of Palliative Care for Alzheimer Disease*, leading ethicists and clinicians from the United States and Europe explore ethical and scientific concerns about the diagnosis and prognosis of Alzheimer disease, challenges arising from applying palliative procedures to its symptoms, key philosophical and theological concepts central to our understanding of the disease and to end of life decisions, and the changing patterns of relevant medical, social, and economic policies. Cross-cultural, multidisciplinary, and state of the art, this volume is a unique and important resource for bioethicists, clinicians, and policy makers everywhere.
