1989 is an essay on human nature an attempt to make a just assessment of a species often presented as predominantly and

unavoidably violent grasping selfish and stupid Likening human beings to animals is a traditional method of influencing

attitudes on morals and politics But in this book Professor Barnett shows that modern ethology experimental psychology

genetics and evolutionary theory give the now fashionable misanthropy no authentic support In doing so he asks whether the

theory of evolution has any bearing on Machiavellianism in politics or the concept of original sin and whether laboratory

experiments on the effects of reward and punishment tell us anything about the enigma of free will Combining the findings of

biology with logic and humour Professor Barnett gives a lucid alternative portrait of humanity in which he stresses the

questions that the complexities of human existence will raise long after current myths have faded This book is for all

interested in human nature and the future of human society **Evolution Education Around the Globe** Hasan Deniz, Lisa
