Looking Through Images Emmanuel Alloa, 2021-10-05 Images have always stirred ambivalent reactions Yet whether eliciting fascinated gazes or iconoclastic repulsion from their beholders they have hardly ever been seen as true sources of knowledge They were long viewed as mere appearances placeholders for the things themselves or deceptive illusions Today the traditional critique of the spectacle has given way to an unconditional embrace of the visual However we still lack a persuasive theoretical account of how images work Emmanuel Alloa retraces the history of Western attitudes toward the visual to propose a major rethinking of images as irreplaceable agents of our everyday engagement with the world He examines how ideas of images and their powers have been constructed in Western humanities art theory and philosophy developing a novel genealogy of both visual studies and the concept of the medium Alloa reconstructs the earliest Western media theory Aristotle's concept of the diaphanous milieu of vision and the significance of its subsequent erasure in the history of science Ultimately he argues for a historically informed phenomenology of images and visual media that explains why images are not simply referential depictions windows onto the world Instead images constantly reactivate the power of appearing As media of visualization they allow things to appear that could not be visible except in and through these very material devices

Jesus Philip E. Dotson, 2024-04-15 A creative yet biblically based examination of the person and life of Jesus Christ The Home of Jesus A Conversational Tour journeys through Jesus earthly home from the entrance gate onto the front porch into and through the rooms in the home and exiting onto a pathway for life s travels Readers are led to reflect upon the historicity of Jesus the birth of Jesus the deity of Jesus and the love and incarnate nature of Jesus Did He exist in history Does He exist today Will He exist in the future Along the way the author holds an engaging and thought provoking conversation with readers making this a unique and meaningful reading experience Phil Dotson a skillful tour guide challenges readers to form their own beliefs based on their examination of the evidence for Christ without total reliance on others to tell them what to believe Readers are asked to challenge their own beliefs as well as the beliefs of others to include the author s Accompanying readers on the tour are the voices of other authors poets and even hymn writers including John Bunyan L M Montgomery and John Milton adding to the rich narrative of the journey The first in a series this intriguing book will appeal to believers and nonbelievers alike An excellent addition to personal and church libraries Supreme Court, *Paranormal Drivers* Stephen Keck, 2018-04-17 A J O Conner and J J O Conner just graduated from Ohio University Intrigued by the hauntings at Ohio University they go on a round country trip in search of the most haunted road in each of the 48 contiguous states Not convinced that they will find much of anything they find out that they bit off more than they can chew when they realize that the stories myths and legends behind each of these roads are anything but mythical Their objective is to venture down the most haunted road in each state Their goal is simple survive In the Supreme Court of the State of New York, *The Imperfect and Unfinished Math Teacher [Grades K-12]* Chase Orton, 2022-02-24 The system won t do it for us But we have each other In *The Imperfect and Unfinished Math Teacher A Journey to Reclaim Our Professional Growth* master storyteller Chase Orton offers a vulnerable and courageous grassroots guide that leads K 12 math teachers through a journey to cultivate a more equitable inclusive and cohesive culture of professionalism for themselves what he calls professional flourishing The book builds from two bold premises First that as educators we are all naturally imperfect and unfinished and growth should be our constant goal Second that the last 40 years of top down PD efforts in mathematics have rarely supplied teachers with what they need to equitably grow their practice and foster classrooms that are likewise empowered inclusive and cohesive With gentle humanity this book inspires teachers to break down silos observe each others classrooms interrogate their own biases and put students at the center of everything they do in the math classroom This book Weaves raw and authentic stories both personal and those from other educators into a relatable and validating narrative Offers interactive opportunities to self reflect build relationships seek new vantage on our teaching by observing others classrooms and students and share and listen to other s stories and experiences Asks teachers to give and accept grace as they work collaboratively to better themselves and the system from within so that they can truly serve each of their students authentically and equitably Implementing the beliefs and actions in this book will position teachers to become more active

partners in each other's professional growth so that they can navigate the obstacles in their professional landscape with renewed focus and a greater sense of individual and collective efficacy. It equips teachers and by extension their students to chart their own course and author their own equitable and joyful mathematical and professional stories.
