Costambeys, Andrew J. Hamer, Martin Heale, 2007-01-01 Liverpool was founded in the Middle Ages and as the city approaches its eight hundredth anniversary this book takes stock of Liverpool s scholarly contributions to modern understanding of the period From the eighteenth century to the twenty first scholars from Liverpool have made pioneering advances in fields as diverse as Celtic philology and manuscript collecting By focusing on a local perspective this volume presents a microcosmic view of the different building blocks of the modern construction of the Middle Ages while offering fresh insights into more

universal elements of medieval culture such as pageantry and mystery plays **The Making of Middle Ages** R. W. Southern, 1981 *The Making of Memory in the Middle Ages* Lucie Doležalová, 2009-11-17 Memory in the Middle Ages has received particular attention in recent decades yet the topic remains difficult to grasp and the research on it rather fragmented This book gathers particular case studies on memory in different parts of medieval Europe and in a variety of fields including literatures languages manuscript studies history history of ideas philosophy social history and art history The studies address on the one hand memory as means of storing and recuperating knowledge arts of memory and memory aids and on the other hand memory as remembering and constructing the past including the subject of forgetting It should be useful to all interested in medieval culture literature and history Contributors are Milena Bartlov Bergsveinn Birgisson Irene Bueno Vincent Challet Greti Dinkova Bruun Lucie Dolealov D vid Falvay Carmen Florea C dric Giraud Laura Iseppi de Filippis Farkas G bor Kiss R diger Lorenz Else Mundal El d Nemerki William J Purkis Slavica Rankovi Lucia Raspe Kimberly Rivers Victoria Smirnova Francesco Stella P ter T th Tam s Visi Jon Whitman and Rafa W jcik *The Making of the Middle Ages* ,1965 **The Modern Making of the Middle Ages** Walter Kudrycz, 1997 *The Making of the Medieval Middle East* Jack Tannous, 2018-12-04 A bold new religious history of the late antique and medieval Middle East that places ordinary Christians at the center of the story In the second half of the first millennium CE the Christian Middle East fractured irreparably into competing churches and Arabs conquered the region setting in motion a process that would lead to its eventual conversion to Islam Jack Tannous argues that key to understanding these dramatic religious transformations are ordinary religious believers often called the simple in late antique and medieval sources Largely agrarian and illiterate these Christians outnumbered Muslims well into the era of the Crusades and yet they have typically been invisible in our understanding of the Middle East s history What did it mean for Christian communities to break apart over theological disagreements that most people could not understand How does our view of the rise of Islam change if we take seriously the fact that Muslims remained a demographic minority for much of the Middle Ages In addressing these and other questions Tannous provides a sweeping reinterpretation of the religious history of the medieval Middle East This provocative book draws on a wealth of Greek Syriac and Arabic sources to recast these conquered lands as largely Christian ones whose growing Muslim populations are properly understood as converting away from and in competition with the non Muslim communities around them **Making a Living in the Middle Ages** Christopher Dyer, 2002-01-01 The period covered here saw dramatic alterations in the state of the economy and this account begins with the forming of villages towns networks of exchange and the social hierarchy in the ninth and tenth centuries and ends with the inflation and population rise of the sixteenth century *The Making of Middle English, 1765-1910* David Matthews, 1999 Before the 1760s with the major exception of Chaucer nearly all of Middle English literature lay undiscovered and ignored Because established scholars regarded later medieval literature as primitive and barbaric the study of this rich literary heritage was relegated to

antiquarians and dilettantes In *The Making of Middle English* 1765 1910 David Matthews chronicles the gradual rediscovery of this literature and the formation of Middle English as a scholarly pursuit Matthews details how the careers class positions and ambitions of only a few men gave shape and direction to the discipline Mostly from the lower middle class they worked in the church or in law and hoped to exploit medieval literature for financial success and social advancement Where Middle English was concerned Matthews notes these scholars were self taught and their amateurism came at the price of inaccurately edited and often deliberately improved texts intended for a general public that sought appealing rather than authentic reading material This study emphasizes the material history of the discipline examining individual books and analyzing introductions notes glossaries promotional materials lists of subscribers and owners annotations to assess the changing methodological approaches of the scholars and the shifts in readership Matthews explores the influence of aristocratic patronage and the societies formed to further the editing and publication of texts And he examines the ideological uses of Middle English and the often contentious debates between these scholars and organizations about the definition of Englishness itself A thorough work of scholarship *The Making of Middle English* presents for the first time a detailed account of the formative phase of Middle English studies and provides new perspectives on the emergence of medieval studies canon formation the politics of editing and the history of the book

The Making of Politics John Watts, 2009-05-07 This major survey of political life in late medieval Europe provides a framework for understanding the developments that shaped this turbulent period Rather than emphasising crisis decline disorder or the birth of the modern state this account centres on the mixed results of political and governmental growth across the continent The age of the Hundred Years War schism and revolt was also a time of rapid growth in jurisdiction taxation and representation of spreading literacy and evolving political technique This mixture of state formation and political convulsion lay at the heart of the making of polities Offering a full introduction to political events and processes from the fourteenth century to the sixteenth this book combines a broad comparative account with discussion of individual regions and states including eastern and northern Europe alongside the more familiar west and south

Making Money in the Early Middle Ages Rory Naismith, 2023-07-11 An examination of coined money and its significance to rulers aristocrats and peasants in early medieval Europe Between the end of the Roman Empire in the fifth century and the economic transformations of the twelfth coined money in western Europe was scarce and high in value difficult for the majority of the population to make use of And yet as Rory Naismith shows in this illuminating study coined money was made and used throughout early medieval Europe It was he argues a powerful tool for articulating people's place in economic and social structures and an important gauge for levels of economic complexity Working from the premise that using coined money carried special significance when there was less of it around Naismith uses detailed case studies from the Mediterranean and northern Europe to propose a new reading of early medieval money as a point of contact between economic social and institutional history Naismith examines

structural issues including the mining and circulation of metal and the use of bullion and other commodities as money and then offers a chronological account of monetary development discussing the post Roman period of gold coinage the rise of the silver penny in the seventh century and the reconfiguration of elite power in relation to coinage in the tenth and eleventh centuries In the process he counters the conventional view of early medieval currency as the domain only of elite gift givers and intrepid long distance traders Even when there were few coins in circulation Naismith argues the ways they were used to give gifts to pay rents to spend at markets have much to tell us

Merovingian Mortuary Archaeology and the Making of the Early Middle Ages Bonnie Effros, 2003-03-03 Clothing jewelry animal remains ceramics coins and weaponry are among the artifacts that have been discovered in graves in Gaul dating from the fifth to eighth century Those who have unearthed them from the middle ages to the present have speculated widely on their meaning This authoritative book makes a major contribution to the study of death and burial in late antique and early medieval society with its long overdue systematic discussion of this mortuary evidence Tracing the history of Merovingian archaeology within its cultural and intellectual context for the first time Effros exposes biases and prejudices that have colored previous interpretations of these burial sites and assesses what contemporary archaeology can tell us about the Frankish kingdoms Working at the intersection of history and archaeology and drawing from anthropology and art history Effros emphasizes in particular the effects of historical events and intellectual movements on French and German antiquarian and archaeological studies of these grave goods Her discussion traces the evolution of concepts of nationhood race and culture and shows how these concepts helped shape an understanding of the past Effros then turns to contemporary multidisciplinary methodologies and finds that we are still limited by the types of information that can be readily gleaned from physical and written sources of Merovingian graves For example since material evidence found in the graves of elite families and particularly elite men is more plentiful and noteworthy mortuary goods do not speak as directly to the conditions in which women and the poor lived The clarity and sophistication with which Effros discusses the methods and results of European archaeology is a compelling demonstration of the impact of nationalist ideologies on a single discipline and of the struggle toward the more pluralistic vision that has developed in the post war years

The Making of Europe Robert Bartlett, 1993 This provocative book shows that Europe in the Middle Ages was as much a product of a process of conquest and colonization as it was later a colonizer Will be of great interest to those interested in cultural transformation colonialism racism the Crusades or holy wars in general William C Jordan Princeton University 12 halftones 12 maps 6 diagrams
