Managing Environmental and Public Policy Conflicts Gordon Meeks, 1985      **River of Promise, River of Peril** John E. Thorson, 1994 Snaking 2 540 miles from Montana to the Mississippi River the Missouri is the longest waterway in the nation Its basin stretching 530 000 square miles extends broadly into ten states and twenty five Indian reservations For millions of years the river and its tributaries meandered untamed But that irrevocably changed with the passage of the Pick Sloan Plan part of the Flood Control Act of 1944 In *River of Promise River of Peril* John Thorson takes the first comprehensive look at how and why the Missouri River basin now with six major dams and hundreds of miles of navigation canals has become one of the most significantly altered drainage systems in the country He also looks at the consequences The Pick Sloan Plan he argues has not fared well over time particularly in its failure to provide an effective blueprint for regional river management Persistent conflicts over the river he contends illuminate important weaknesses of federalism in dealing with regional resources the most glaring being the exclusion of any proactive role for Indian tribal governments To support his argument Thorson examines the physical demographic and political features of the river basin analyzes the comprehensive river development that gave birth to the Pick Sloan Plan reveals why the original goals of the legislature were never achieved explores the deep seated and continuing tensions between basin governments and investigates how Indian tribes the river s ecology and federalism have been damaged as the river has been developed He also describes the various associations created and later abandoned from the sixties to the eighties and assesses their virtues and limitations Thorson sees in the story of the Missouri River Basin the vertical and horizontal strains of federalism the states chafing against federally mandated and controlled projects exacerbated by the lack of constitutional guidance for handling conflicts among neighboring states and with Indian nations Not just bent on spotlighting problems Thorson also evaluates different approaches for improved river system management and recommends a Missouri River management institution based on environmentally sensitive policies a strong state role and full participation by the basin s tribal governments      Responding to Environmental Conflicts: Implications for Theory and Practice Eileen Petzold-Bradley, Alexander Carius, Árpád Vincze, 2012-12-06 A comprehensive tour d horizon of the debate on the environment and security focusing on the various policy options for building peace and preventing environmental conflict Experts from the areas survey the key environmental challenges in Eastern and Central European states and those of the former Soviet Union extending the debate to such regions as the Balkans the Black Sea and Central Europe This is the first time such extensive case study research has been reported for these regions Both practical and theoretical approaches to the debate are presented within a multi disciplinary framework the contributors ranging from academic experts involved with peace and conflict research to actual policy makers active in the fields of environmental and security policy Readership Experts already working in the relevant disciplines both academic and governmental as well as those seeking an introduction to the various policy fields A graduate level study text
