Strategic Entrepreneurial Finance Darek Klonowski, 2014-11-27 Entrepreneurial finance is a discipline that studies financial resource mobilization, resource allocation, risk moderation, optimization in financial contracting, value creation and value monetization within the context of entrepreneurship. However, without proper strategic consideration, the discipline is incomplete. This book examines how the activity of entrepreneurial finance can be enhanced via a concentration on value creation and through improved strategic decision making. The most unique feature of the book is its focus on value creation. For entrepreneurs, value creation is not a one-off activity but rather a continuous cycle of incremental improvements across a wide range of business activities. Entrepreneurial value creation is described in four comprehensive stages: value creation, value measurement, value enhancement and value realization, referred to as the C-MER model. This book focuses on what creates value rather than merely presenting value creation in a straight accounting framework. At the same time, deliberate and tactical planning and implementation ensure that the firm does not ignore the components necessary for it to survive and flourish. Vigorous strategic deliberations maximize the entrepreneurial firm's chances of making the right business decisions for the future, enable the firm to manage its available financial and non-financial resources in the most optimal manner, ensure that the necessary capital is secured to progress the development of the firm to its desired development level and build value. While financial considerations are important, the field of strategic entrepreneurial finance represents a fusion of three disciplines: strategic management, financial management and entrepreneurship. This orientation represents a natural evolution of scholarship to combine specific domains and paradigms of naturally connected business disciplines and reflects the need to simultaneously examine business topics from different perspectives which may better encapsulate actual entrepreneurial practices. and innovation **Earnings quality and earnings management** Sanjay Wikash Bissessur,2005 **The Entrepreneur's Guide to Managing Growth and Handling Crises** Theo J. van Dijk,2007-12-30

Everyone knows the typical entrepreneurial success story A couple of entrepreneurs have a great idea work their tails off to establish the business and before long they are set for life Right Hardly Turnaround artist Theo van Dijk knows two things First young businesses that have survived the start up years will face periods of stagnation Second every venture at some point reaches a complacent plateau owners take their eyes off the ball and wham a crisis charges through the door Entrepreneurs can avoid that fate by watching for signs of trouble and taking the action steps van Dijk outlines And it's worth the effort because troubles and crises all have a silver lining they position the company for greater long term growth Entrepreneurs predictably become overconfident just when they think they have it made A crisis of leadership and or direction then occurs and it usually has to do with mismanaged growth Suddenly the company can't fill orders or customers complain about service and delivery Or family bickering slows momentum just when the company is poised to take off Theo van Dijk has seen it all and he knows what the real problem is During the start up years everyone is focused on creating a product and building a list of customers Informality and flexibility are the rule But at some point what used to work no longer does Survival is once again at stake and the odds are once again very much against the survivors of the early entrepreneurial phase It's right at this point van Dijk argues that the structure of the organization needs to become more formal and built to last He shows many ways companies in crisis can overcome challenges by changing the way they handle customers putting new processes and procedures in place and managing employees in a more professional manner This work is painful but it's necessary if the company is to survive trouble and set a course for long term growth
