Managing Leviathan Robert Paehlke, 1990-08 Environmental problems have shocked the twentieth century shaking the confidence in order and progress that had underpinned the exuberant growth of the industrial and administrative leviathan Is bureaucracy the organizational form that helped to create these problems really suited to solving them **The Promise of**

Green Politics Douglas Torgerson, 1999 An exploration of the relationship between the means and the ends in green politics

The Oxford Handbook of U.S. Environmental Policy Sheldon Kamieniecki, Michael Kraft, 2013 Prior to the Nixon administration environmental policy in the United States was rudimentary at best Since then it has evolved into one of the primary concerns of governmental policy from the federal to the local level As scientific expertise on the environment rapidly developed Americans became more aware of the growing environmental crisis that surrounded them Practical solutions for mitigating various aspects of the crisis air pollution water pollution chemical waste dumping strip mining and later global warming became politically popular and the government responded by gradually erecting a vast regulatory apparatus to address the issue Today politicians regard environmental policy as one of the most pressing issues they face The Obama administration has identified the renewable energy sector as a key driver of economic growth and Congress is in the process of passing a bill to reduce global warming that will be one of the most important environmental policy acts in decades The Oxford Handbook of U S Environmental Policy will be a state of the art work on all aspects of environmental policy in America Over the past half century America has been the world's leading emitter of global warming gases However environmental policy is not simply a national issue It is a global issue and the explosive growth of Asian countries like China and India mean that policy will have to be coordinated at the international level The book will therefore focus not only on the U S but on the increasing importance of global policies and issues on American regulatory efforts This is a topic that will only grow in importance in the coming years and this will serve as an authoritative guide to any scholar interested in the issue

Managed Annihilation Dean Bavington, 2011-01-01 The commercial cod fishery in Newfoundland and Labrador was once the most successful fishery in the world When it collapsed in 1992 causing the largest single day layoff in Canadian history and irrevocable ecological damage fishermen scholars and scientists pointed to failures in management such as uncontrolled harvesting as likely culprits Examining the history of commercial cod fisheries in the region from the mid nineteenth century *Managed Annihilation* makes the case that the very idea of natural resource management caused the death of the cod The collapse occurred when the fisheries were ostensibly managed by the state and the fishery has still not recovered nearly two decades later Although the collapse raised doubts among policy makers about their ability to understand predict and control

nature their ultimate goal of control through management has not wavered it has simply been transferred onto new targets

Forest Ecosystem Management, 1993 **Surviving Democracy** Chien-Yi Lu, 2020-04-22 Is democracy in its neoliberalized form responsible in part for bringing us to the brink of self destruction and the policy inertia that is doing away with our chances of survival *Surviving Democracy* probes the way democracy became neoliberalized and the role neoliberalized democracy plays in our dealings with causing understanding denying and mitigating climate change Defining neoliberalism as the art of exclusion through inclusion Chien Yi Lu treats climate change as collateral damage of the neoliberal order established to ensure upward power and wealth redistribution Highlighting the role money played in the free competition of ideas between Keynes and Hayek she investigates the resulting global structure wherein the wealthy and powerful sit above the market and democracy and the way this structure fundamentally contradicts with honest climate mitigation Central to the structure is neoliberal elites leveraging of the fluid relationship between the market and the state Merging citizen power with consumer and investor powers is therefore imperative to the success of climate action While expediting the bursting of the carbon bubble is an obvious answer it is the discussion of the meat bubble that brings the book full circle linking our survival to neoliberalism inclusion and democracy *Surviving Democracy* probes the role democracy plays in our dealings with causing understanding denying and hopefully mitigating climate change **Community Forestry** Ryan C. L. Bullock, Kevin S. Hanna, 2012-06-28 An incisive examination of community forestry in a pan national context highlighting both the possibilities and challenges associated with its implementation **The Nature of the State** Mark Whitehead, Rhys Jones, Martin Jones, 2007-01-11 The complex relationships between the state and nature remain under theorized and relatively unexplored Combining original research and theoretical insights *The Nature of the State* challenges the ways in which social scientists approach questions of socio environmental power and offers new insights into the history of state nature relations *The Gods of the Sea* Fynn Holm, 2023-08-24 Japan is often imagined as a nation with a long history of whaling In this innovative new study Fynn Holm argues that for centuries some regions in early modern Japan did not engage in whaling In fact they were actively opposed to it even resorting to violence when whales were killed Resistance against whaling was widespread especially in the Northeast among the Japanese fishermen who worshiped whales as the incarnation of Ebisu the god of the sea Holm argues that human interactions with whales were much more diverse than the basic hunter prey relationship as cetaceans played a pivotal role in proto industrial fisheries The advent of industrial whaling in the early twentieth century however destroyed this centuries long equilibrium between humans and whales In its place communities in Northeast Japan invented a new whaling tradition which has almost completely eclipsed older forms of human whale interactions This title is also available as Open Access [International Encyclopedia of Public Policy and Administration Volume 1](#) Jay Shafritz, 2019-03-01 This is the first volume of a four volume encyclopaedia which combines public administration and policy and contains approximately 900 articles by over 300 specialists This Volume covers entries
