to watch professional committees craft standards for treatments case management and professional ethics At industry sponsored meetings he observes company representatives who train some experienced doctors on their technologies while deterring others who they think might injure patients Using an innovative ethnographic approach tying individual actions and their collective consequences he considers how stakeholders ally across the various venues of medicine even as they are sometimes pressed into competition within those venues Menchik finds that these alliances and rivalries strengthen the authority of medicine as a whole From place to place and group to group we see how a medical specialty renews and reinvigorates itself Beginning within the walls of the hospital and moving to the professional and commercial venues that shape it Managing Medical Authority offers an agenda setting take on the social organization of medical authority
