Managing Organizational Behavior Henry L. Tosi, Massimo Pilati, 2011-01-01 This newly and completely revised edition of *Managing Organizational Behavior* covers the field of organizational behavior in a theoretical and applied way that both students and instructors will find engaging and informative. For use in introductory and advanced undergraduate courses, the book covers a broad range of topics in the field, including personality, motivation, groups, power, and leadership. It integrates the most current research in a clear and accessible manner and incorporates new thinking in the field with tried and true practices. At its heart, this book is a comprehensive introduction to the present state of knowledge in the field of organizational behavior. The authors treat a relevant and critical theme in organizational studies: the systematic and scientific analysis of individual behavior in different organized contexts. This book identifies and analyzes three distinct and interdependent perspectives on organizational behavior. Firstly, the book analyzes organizational behavior from the perspective of the individual actor, focusing on themes such as the differences in personality and their manifestations in the organization environment, attitudes, perceptions, and the evaluation of performance and problem solving, motivation to work, stress, emotions, and organizational well-being. Secondly, the authors focus on the relationships among actors. They analyze the conditions of effectiveness of workgroups, decisions, communications, and conflict, and conclude with themes tied to power and leadership. Lastly, the authors focus their attention on the wider organization and management structures, people, culture, and change. The book will be welcomed by instructors and students of organizational behavior around the world, as previous

editions have been since the first edition appeared in 1977

Managing Organizational Behavior in the African

Context David B. Zoogah, Constant D. Beugré, 2013 *Managing Organizational Behavior in an African Context* discusses management and organization science theories as they apply within the social cultural and economic contexts in which organizations operate in Africa. The first organizational behavior book to cover the entire continent, it uses the findings of OB studies to establish a conceptual foundation, then explores how those topics apply in Africa's unique business environment. This integrative framework allows students and scholars to connect organizational phenomena in Africa with those in other parts of the globe. Illustrative examples, mini cases, and self-assessment exercises all based on Africa-specific sectors, industries, and organizations round out this foundational guide to the OB field in Africa. *Management in the Human Service Organization* United States. The Effect of Military Experience on Civilian and Military Healthcare Facility CEO Leadership Development, Behaviors, and Outcomes Lawrence M. Johnson, 2001-04-23 This study examined whether the leadership experiences and leadership behaviors of United States healthcare facility Chief Executive Officers are affected by military or civilian experience. The study also investigated whether differences in leadership outcomes as perceived by key subordinates were affected by the CEO's leadership development experiences or leadership behaviors. The goal of this study was to investigate how occupationally similar yet experientially diverse military and civilian hospital CEOs differ in significant leadership experiences, behaviors, and three performance outcomes: namely, perceived effectiveness, follower satisfaction with the leader, and willingness of subordinates to put forth extra effort. Responses from a national sample of civilian and military healthcare facility CEOs affiliated with the American College of Healthcare Executives were used to address the research questions. A total of 117 healthcare facility CEOs and 190 key subordinates completed surveys designed to evaluate leadership development experiences and subordinates' perceptions of leader behaviors and outcomes. Analysis of Variance was chosen as the method for data analysis to describe quantitatively the relationship between CEO military experience and leadership development experiences, leadership styles, and leadership outcomes. Results indicated that the CEO's adult leadership development activities differed by military experience. The facility CEOs with prior military experience had unique leadership promoting and inhibiting factors. However, the prediction was not supported that the military CEOs would exhibit stronger leadership behaviors. Again, significant differences were not found between facility CEO groups in mean scores for leadership outcomes of extra effort, satisfaction, and perceived effectiveness of the leader. The study findings added to the healthcare leadership knowledge base concerning improvement of the organizational outcomes of United States healthcare facilities. In addition, the results of this study have potential for linkage with assessments of ongoing military and civilian healthcare leader development initiatives.
