Resources in Education, 1999-10 *Transforming University Biochemistry Teaching Using Collaborative Learning and Technology* Penny J. Gilmer, 2010-03-10 One aim of Gilmer's captivating text on university pedagogy is to show that biochemistry or any science does not consist solely of facts to be learned but is a way of thinking about the world Her purpose both in this book and in her classroom is to make her students into critical thinkers rather than passive learners The

chapters cast a critical eye over research into enhanced education techniques such as collaborative learning Gilmer describes the action research she conducted in her own biochemistry undergraduate classroom into ways of improving the learning environment She offers various perspectives on the make up of her classroom including an analysis of ethnographic data The tools Gilmer employs as she hones her teaching skills include collaborative learning and technology She views the classroom through various theoretical perspectives social constructivism cultural historical activity theory and a theory that involves the dialectic between the structure of the learning environment and the agency of the learners a group among whom she includes herself She provides a wealth of autobiographical detail as well as the results of her action research which followed up on its original subjects after an interval of 11 years to see what impact her course had on their professional growth Above all this volume is proof of what can be achieved in education when teachers are as interested in the process of learning as they are in their subject itself *Teacher and Student Evaluation* Alyson Leah Lavigne, Thomas L.

Good, 2013-09-05 Following the recent major school reform of Race to the Top schools teachers and students are increasingly evaluated through high stakes achievement test scores In six concise chapters *Teacher and Student Evaluation* explores the historical rise and modern landscape of accountability in American education and the current models of teacher evaluation The authors provide realistic and useful suggestions for responding to current accountability demands The authors explore the methodological concerns and policy implications of using value added and observational measures to make high stakes decisions After reaching the conclusion that these contemporary evaluation practices are flawed Alyson Lavigne and Thomas Good offer possible solutions that inform current and future teacher evaluation This book is a valuable resource for students of educational assessment as well as policy makers administrators and teachers who are currently building accountability plans The book is written in an accessible but authoritative fashion that practitioners policymakers and scholars will find useful **Teaching Secondary Mathematics** David Rock, Douglas K.
