that affect the daily lives of all citizens This handbook examines current trends and reforms in public policy and administration such as financial regulation risk management public health e government and many others at the local national and international levels The two themes of the book are that public policy and administration have acquired an important global aspect and that a critical role for government is the regulation of capital The handbook is organized into three thematic sections Contemporary Challenges Policy and Administration Responses and Forging a Resilient Public Administration to allow readers to quickly access knowledge and improve their understanding of topics The opening chapter introductions to sections and extensive glossary aid readers to most effectively learn from the book Each chapter provides a balanced overview of current knowledge identifying issues and discussing relevant debates The book is written by authors from Europe Asia North and South America Africa and Australia

Leading Issues in Competition, Regulation, and Development Paul Cook, 2004-01-01 The promotion of liberalized and deregulated markets by bilateral and multilateral aid donors and by global institutions such as the WTO has led to significant attention being paid to competition and regulatory reforms in developing economies The process of reform involves the transfer and diffusion of market models derived from practice and theory in developed countries However in developing countries regulation needs to do more than simply promote competitiveness and consumer interests it also needs to ensure that the market nurtures development By rigorously examining the numerous impacts of regulation this book will help to fill a significant gap in the literature on economic and social development The book now available in paperback draws together contributions from leading experts across a range of disciplines including economics law politics and governance public management and business management The authors begin with an extensive overview of the issues of regulation and competition in developing countries and carefully illustrate the important themes and concepts involved Using a variety of country and sector case studies they move on to focus on the problems of applicability and adaptation that are experienced in the process of transferring best practice policy models from developed to developing countries The book presents a clear agenda for further empirical research and is notable for its rigorous exploration of the links between theory and practice Although there is substantial interest in competition and regulation as yet there has been relatively little investigation of these issues in developing economies This book redresses the balance and will be a valuable resource for researchers academics teachers and students interested in development economics and development studies It will also be of great relevance for practitioners and policymakers working in the fields of competition policy and regulatory reform

Infrastructure in Latin America and the Caribbean Marianne Fay, Mary Morrison, 2007 This book reviews Latin America's experience with infrastructure reform over the last fifteen years It argues that the region's infrastructure has suffered from public retrenchment and unrealistic expectations about private involvement Poor infrastructure now hampers productivity growth and poverty reduction Addressing this requires more and better spending and acceptance that governments remain central to infrastructure provision and supervision although the

private sector still has an important role to play Political Economy of Energy in the Southern Cone Anil Hira,2003-03-30 Hira explores the impact of the neoliberal revolution in Latin America which claims the superiority of markets that are freed from government intervention and restrictions on trade and investment He examines changes in the energy policy of the Southern Cone Argentina Bolivia Brazil Chile Paraguay and Uruguay and finds that contrary to what is claimed and expected there is a great deal of state intervention that continues through regulatory policy All around the world economic markets are in flux Policies to change these markets are part of the neoliberal revolution that claims the superiority of markets freed from government intervention and restrictions on trade and investment The general conclusion among most academic and policy analysts who study developing countries is that market liberalization is a foregone conclusion Developing countries choices are constrained by two primary factors first the burden of massive external debt that forces them to court international finance and second the need to gain access to the world s largest markets in Europe and or the United States optimally through free trade agreements The effects of market liberalization including deregulation privatization and integration require further scrutiny Hira examines the effects of international market pressures on energy policy at the national regional and sectoral levels in Latin America s Southern Cone Argentina Bolivia Brazil Chile Paraguay and Uruguay who belong to the MERCOSUR common market Contrary to what is claimed and expected he finds that a great deal of state intervention continues through regulatory policy He also provides an thorough set of comparative political economy case studies along with a discussion of the MERCOSUR process with regards to energy His analysis of the political economy of electricity and natural gas deregulation is especially relevant in the wake of the California energy crisis the Enron debacle and international discussions about energy deregulation This book is of particular interest to scholars students and other researchers involved with Latin American economic development and energy policy *Granting and Renegotiating Infrastructure Concessions* J. Luis Guasch,2004-01-01 During the 1990s infrastructure concessions were hailed as the solution to Latin America s endemic infrastructure deficit by combining private sector efficiency with rent dissipation brought about by competition This publication examines the design and implementation of over 1 000 examples of concession contracts in order to identify the problems that have occurred in the process It goes on to highlight lessons to be learned for the future in order to realise the potential benefits of infrastructure reform and to contribute to economic growth and poverty reduction *Regulatory Governance and Sector Performance* Luis Andres,Jose Luis Guasch,Sebastian Lopez Azumendi, **Regulatory Governance in Infrastructure Industries** Bernardo Mueller,2006-01-01 This paper assesses and measures regulatory governance in 21 infrastructure regulators in Brazil Regulatory Governance is decomposed into four main attributes autonomy decision rules means and tools and accountability A ranking is proposed and the main areas for improvement identified A comparison of the proposed regulatory governance index and other indexes internationally available is performed Section 2 sets up the analytical framework for the report identifying key components of regulatory
