Information and Revolutions in Military Affairs Emily O. Goldman, 2013-09-13 Like the industrial revolution before it the information technology revolution appears to be creating a new ruling class a new economy and a new society Information technology is also transforming military operations and warfare A vast literature on the revolution in military affairs or RMA cites the important indeed dominant role of information technology in enabling a new military revolution This volume challenges conventional wisdom not by claiming that information's impact on military operations is not positive or transformative but by claiming its impact is not new Previous periods of military revolution can also be characterized as information revolutions Through the close examination of six case studies of military transformation during the industrial age the contributors to this volume demonstrate how the employment of emerging information systems was critical to realizing a major boost in military effectiveness The most successful adaptations to the new environment were made by the most skillful users of information This volume draws upon the expertise of leading military historians political scientists and defense practitioners to craft a set of original essays that provide the first retrospective examination of how information affects the process of military revolution This book was previously published as a special issue of the Journal of Strategic Studies

Carter, William J. Perry, 2000-09-01 William J Perry and Ashton B Carter two of the world's foremost defense authorities draw on their experience as leaders of the U S Defense Department to propose a new American security strategy for the twenty first century After a century in which aggression had to be defeated in two world wars and then deterred through a prolonged cold war the authors argue for a strategy centered on prevention Now that the cold war is over it is necessary to rethink the risks to U S security The A list threats to U S survival is empty today The B list the two major regional contingencies in the Persian Gulf and on the Korean peninsula that dominate Pentagon planning and budgeting pose imminent threats to U S interests but not to survival And the C list such headline grabbing places as Kosovo Bosnia Somalia Rwanda and Haiti includes important contingencies that indirectly affect U S security but do not directly threaten U S interests Thus the United States is enjoying a period of unprecedented peace and influence but foreign policy and defense leaders cannot afford to be complacent The authors preventive defense strategy concentrates on the dangers that if mismanaged have the potential to grow into true A list threats to U S survival in the next century These include Weimar Russia failure to establish a self

The Military Revolution and Revolutions in Military Affairs Mark Fissel, 2022-12-05 The Military Revolution and Revolutions in Military Affairs updates two central debates in military history the one surrounding the concept of military revolution and the one on military affairs whilst advancing original research in both fields Only a handful of publications consider the military revolution and the RMA in tandem This book breaks new ground conceptually and appeals to an exceptionally large and diverse readership Comparative revisionist studies of the military revolution and RMA better enable us to comprehend the historical continuum and reveal the new RMA for what it is And for what it is shortly to become This book presents original contributions within the epicentre of the military revolution debate the 1500s with an emphasis on gunpowder revolution offensively and defensively The connections with the Revolution in Military Affairs are then made explicit by scholars a practitioner and an analyst with an emphasis on airborne lethal autonomous weapons systems This is a chronologically broad and unique methodological approach to a historical debate that begs for clarification as we enter an era where killer robots will almost certainly take from humans their monopoly on violence
