Moralizing The Environment Philip Lowe,Judy Clark,Susanne Seymour,Neil Ward,2023-03-24 First published in 1997 There was a time when pollution was equated with the urban and the industrial But things have changed What were previously mutually exclusive categories of agriculture and pollution have been brought together in a new morally charged atmosphere Moralizing the environment is a study of how this shift came about It examines the emergence of the farm pollution problem in Britain in the 1980s It draws upon a study of the regulation of farm wastes cattle slurry silage effluent and the dirty water from farmyards conducted between 1989 and 1995 Detailed surveys and ethnographic fieldwork were carried out in the south west of England among dairy farmers pollution inspectors agricultural advisers and environmentalists In trying to get to grips with farm pollution they were pursuing different notions not only of sound agricultural practice but also of nature morality and the law What ultimately was at stake was who could be trusted to safeguard the countryside

Democracy and Global Water Politics in Historical Perspective Jose Esteban Castro,2024-12-23 This book addresses water privatization from a historical sociological perspective and argues against the unrelenting imposition of neoprivatist water politics worldwide Water is essential for life

but it is also a source of economic and political power Prevailing water politics continues to erode the conditions of dignified living conditions of millions of human beings around the world including many living in Western capitalist democracies The book revisits water related myths fake truths and authoritarian practices promoted or employed by International Financial Institutions governments and other powerful actors to keep enforcing long failed policies grounded on ideological dogmas and short term interests and argues for the substantive democratization of water politics and management It rejects claims of scientific neutrality from academics and other actors across the political spectrum who are co responsible for the perpetuation of these conditions interrogating the ethics of scientific political pragmatism **City of Flows** Maria Kaika, 2005 First Published in 2005 Routledge is an imprint of Taylor Francis an informa company *The Politics of Water in Post-War Britain* Glen O'Hara, 2017-05-10 This is the first book to cover the British people's late twentieth century engagement with water in all its domestic national and international forms and from bathing and household chores to controversies about maritime pollution The British Isles a relatively wet and rainy archipelago cannot in any way be said to be short of liquid resources Even so it was the site of highly contentious and revealing political controversies over the meaning and use of water after the Second World War A series of such issues divided political parties pressure groups government and voters and form the subject matter of this book problems as diverse as flood defence to river and beach cleanliness from the teaching of swimming to the installation of hot and cold running water in the home from international controls over maritime pollution and from the different housework duties of men and women to the British state's proposals to fluoridise the drinking water supply **Wolf and Stanley on Environmental Law** Susan Wolf, Neil Stanley, 2012-10-02 Wolf and Stanley on Environmental Law provides law students non law students and professionals such as Environmental Health Officers with detailed but accessible coverage of environmental law in England and Wales Water Resources in the Built Environment Colin A. Booth, Susanne M. Charlesworth, 2014-03-31 Water management is a key environmental issue in controlling of floods and reducing droughts This book provides analysis of the main issues offering solutions and describing good practice Water Resources for the Built Environment management issues and solutions develops an appreciation of the diverse complex and current themes of the water resources debate across the built environment urban development and management continuum The integration of physical and environmental sciences combined with social economic and political sciences provide a unique resource useful to policy experts scientists engineers and subject enthusiasts By taking an interdisciplinary approach water resources issues and impacts on the built environment are presented in the inventive and strategic setting of considering the constraints of delivering potable water to an ever demanding society who at the same time are increasingly aware of living in an urban landscape where excessive surface water creates a flood threatened environment hence the need to portray a balance between too little vs too much This unique approach to the water resources debate presents a multifaceted collection of chapters that address the contemporary concomitant issues of water shortage

and urban flooding and proffers solutions specifically for the built environment The book is structured into three parts the first part Sections 2 3 and 4 addresses management issues and solutions to minimise water shortages and provide water security for society whilst the second part of the book Sections 5 and 6 addresses management issues and solutions to control excessive rainfall and minimise flooding impacts The third part Section 7 contextualises the issues of the earlier sections within international case studies from the developing world *Town and Country Planning in the UK* J. B.

Cullingworth,Vincent Nadin,2002 This thirteenth edition has been completely revised to take into account all the changes that have occurred in British planning including the policies introduced by the Labour government devolution innovations and the European Union **Environmental Regulation Through Financial Organisations:Comparative Perspectives**

on the Industrialised Nations Benjamin Richardson,2002-02-13 This book takes a comparative perspective of practice in the European Union North America Japan and Australasia arguing that existing legal reforms to promote sustainable development are unlikely to be successful unless environmental policy can be diffused and embedded in the financial services sector This sector plays a crucial role in creating the financial conditions that allow much economic development to proceed Financial markets are already highly regulated in pursuance of various public policy objectives and there is scope to adapt existing regulation to incorporate environmental aspects into the financial services sector In terms of specific reforms the book focuses on the role of corporate environmental reporting economic instruments and liability rules to provide a proper context for engaging financial organisations with the environment as well as reforms to the system of prudential regulation that currently governs this sector Beyond the focus on the financial services sector the book raises complex questions regarding the relationship between the state and market institutions in environmental policy and will appeal to scholars from a wide range of disciplines interested in problems of environmental governance *Telecommunications Regulation* Clare

Hall,Christopher Hood,Colin Scott,2005-08-02 Using unprecedented access to the key actors inside the UK Office of Telecommunications OFTEL and supporting interviews this book explores how telecommunications regulation works from the inside Drinking Water Supply and Agricultural Pollution G.J. Schrama,2012-02-02 Agricultural pollution with nitrates and pesticides is one of the biggest threats to drinking water resources At many places regional and local water authorities together with the water supply industry are involved in preventive action aimed at farming practices Three national case studies Germany The Netherlands and the United Kingdom analyse these efforts within the context of problematical national agricultural policy and the need to implement EU directives on water quality Additional case studies cover the role of the European Union while the same problem in a different setting is analysed for the United States The central question of how national and European governments can reinforce the control capacity of the actors at the regional and local level is treated from the theoretical perspective of the policy network approach
