On the Backs of Tortoises Elizabeth Hennessy,2019-10-29 An insightful exploration of the iconic Gal pagos tortoises and how their fate is inextricably linked to our own in a rapidly changing world The Gal pagos archipelago is often viewed as a last foothold of pristine nature For sixty years conservationists have worked to restore this evolutionary Eden after centuries of exploitation at the hands of pirates whalers and island settlers This book tells the story of the islands namesakes the giant tortoises as coveted food sources objects of natural history and famous icons of conservation and tourism By doing so it brings into stark relief the paradoxical and impossible goal of conserving species by trying to restore a past state of prehistoric evolution The tortoises Elizabeth Hennessy demonstrates are not prehistoric but rather microcosms whose stories show how deeply human and nonhuman life are entangled In a world where evolution is thoroughly shaped by global history Hennessy puts forward a vision for conservation based on reckoning with the past rather than trying to erase it

**Indigenous Water and Drought Management in a Changing World** Miguel Sioui,2022-05-19 Indigenous Water and Drought Management in a Changing World presents a series of global case studies that examine how different Indigenous groups are dealing with various water management challenges and finding creative and culturally specific ways of developing solutions to these challenges With contributions from Indigenous and non Indigenous academics scientists and water management experts this volume provides an overview of key water management challenges specific to Indigenous peoples proposes possible policy solutions both at the international and national levels and outlines culturally relevant tools for assessing vulnerability and building capacity In recent decades global climate change particularly drought has brought about additional water management challenges especially in drought prone regions where increasing average temperatures and diminishing precipitation are leading to water crises Because their livelihoods are often dependent on the land and water Indigenous groups native to those regions have direct insights into the localized impacts of global environmental change and are increasingly developing their own adaptation and mitigation strategies and solutions based on local Indigenous knowledge IK Many Indigenous groups around the globe are also faced with mounting pressure from extractive industries like mining and forestry which further threaten their water resources The various cases presented

in Indigenous Water and Drought Management in a Changing World provide much needed insights into the particular issues faced by Indigenous peoples in preserving their water resources as well as actionable information that can inform future scientific research and policymaking aimed at developing more integrated region specific and culturally relevant solutions to these critical challenges Includes diverse case studies from around the world Provides cutting edge perspectives about Indigenous peoples water management issues and IK based solutions Presents maps for most case studies along with a summary box to conclude each chapter
