## **Managing To Care Case Management And Service System Reform:**

**Managing to Care** Ann Dill, 2017-09-04 The point of departure for *Managing to Care* is widespread concern that the present delivery of health and social welfare services is fragmented uncoordinated inefficient costly wasteful and ultimately detrimental to clients health and wellbeing Dill traces the evolution of case management from its start as a tool for integrating services on the level of the individual client to its current role as a force behind the most significant trends in health care Those trends include the entrenchment of bureaucracy the challenges of once dominant professions and the rise of corporate control The author's purpose in adopting this analysis is to invite further scrutiny of the case management profession and at the same time to identify new possibilities for its application This volume brings together thoughts developed over many years of observing and participating in case management programs It provides a multilayered perspective of case management showing linkages among its social and historical contexts and the ways it is practiced today in diverse service settings The author emerged convinced about the essential need for care coordination and that present ways of providing care can work against our highest objectives in doing so The paradoxes and contraindications embedded in case management practice became a major theme of the book *Managing to Care* is highly critical of the ways case management has come to absorb and reflect the organizational flaws of the very service systems it was intended to reform Too often management of the case comes to dominate care The author does not call for a rejection of professional systems in favor of a resurrected informal community While much can and should be done to strengthen our ties to one another there will always be people whose problems require more expert help Dill argues here that case management can provide such help and provide it well but only if it is grounded in the human dimension of a caring relation

**Managing to Care** Ann E. P. Dill, 2001 The point of departure for *Managing to Care* is widespread concern that the present delivery of health and social welfare services is fragmented uncoordinated inefficient costly wasteful and ultimately detrimental to clients health and wellbeing Dill traces the evolution of case management from its start as a tool for integrating services on the level of the individual client to its current role as a force behind the most significant trends in health care Those trends include the entrenchment of bureaucracy the challenges of once dominant professions and the rise of corporate control The author's purpose in adopting this analysis is to invite further scrutiny of the case management profession and at the same time to identify new possibilities for its application This volume brings together thoughts developed over many years of observing and participating in case management programs It provides a multilayered perspective of case management showing linkages among its social and historical contexts and the ways it is practiced today in diverse service settings The author emerged convinced about the essential need for care coordination and that present ways of providing care can work against our highest objectives in doing so The paradoxes and contraindications embedded in case management practice became a major theme of the book *Managing to Care* is highly critical of the ways case management has come to absorb and reflect the

organizational flaws of the very service systems it was intended to reform Too often management of the case comes to dominate care The author does not call for a rejection of professional systems in favor of a resurrected informal community While much can and should be done to strengthen our ties to one another there will always be people whose problems require more expert help Dill argues here that case management can provide such help and provide it well but only if it is grounded in the human dimension of a caring relationship Ann E P Dill associate professor of sociology and gender studies at Brown University is a medical sociologist and social gerontologist Her research examines issues affecting the long term provision of health care and social services both in the United States and in countries formerly part of Yugoslavia *The Practice of Case Management* Peter Camilleri, 2020-07-16 Case management is used across a diverse range of organisational settings from child protection to aged care disability services acute and community health courts and correctional services employment services veteran services education and immigration programs However case management is not always successfully implemented and practitioners often feel they are not given sufficient support The Practice of Case Management draws on extensive practice research to identify the key characteristics of successful case management organisational support developing delivery models to suit individual client needs preparation of staff at all levels and affirmation of the central and active role of the client The authors outline the challenges and complexities faced by case managers acknowledging that their role is often poorly conceptualised and articulated They demonstrate that true engagement enables effective service provision and offer practical strategies for everyone involved in the case management process to facilitate negotiation accountability and the achievement of positive outcomes *The Oxford Handbook of Inter-organizational Relations* Steve Cropper, 2008 Inter organizational relations IOR the study of Strategic Alliances Joint Ventures Partnerships Networks and other forms of relationship between organizations is a field of study that has burgeoned over the last four decades but is fragmented drawing contributions from a wide variety of disciplines theoretical bases and sectoral interests The Oxford Handbook of Inter Organizational Relations provides a structured overview of the field With contributions from leading international experts on their particular areas of expertise it is an authoritative introduction to its research findings The material is organized in three main sections The first relates to research that focuses on particular manifestations of IORs such as industry supply policy and project networks public and voluntary sector partnerships strategic alliances and so on The second section relates to research that stems from distinct disciplinary or theoretical bases including institutional theory social networks evolutionary theory transaction cost economics management process psychology critical theory political theory economic geography and the legal perspective The third section focuses on key topics in contemporary IOR topics or those that will become so in the future These include trust power development interventions social capital learning and knowledge dynamics and change and evaluation *Social Work Practice with the Elderly* Marvin David Feit, Michael J. Holosko, 2004 The third edition describes significant practice issues and challenges facing gerontological social workers

working with the fastest growing demographic cohort in North America Insightful and creative practitioners provide current accounts and case examples from their work in a variety of settings The material includes both micro and macro practice and offers a focus on advanced specialty practice while also providing an advanced generalist model All the chapters have been rewritten and updated by adding related additional readings and websites Six new chapters have been added on sensory impairment HIV AIDS elder abuse community assisted living rural elderly retirement and volunteerism Social Work Practice with the Elderly offers an exciting collection of well crafted readings and will be useful for any social work student at the undergraduate or graduate level It will also be a valuable resource for those in other helping professions who work side by side with social workers in this field nurses physiotherapists music and art therapists psychologists physicians recreational therapists speech and language therapists and clergy

*Comprehensive Care for HIV/AIDS* Teresa L. Scheid, 2014-08-07 A comprehensive health care system consists of services that are coordinated and integrated along the full continuum of care For HIV patients this includes physical health care infectious disease management crisis care mental health care substance abuse counseling and social support services including housing transportation subsistence and supports for dealing with multiple sources of stigma This book highlights the dilemmas faced in providing comprehensive integrated care to individuals living with HIV providing both an understanding of existing efforts to integrate diverse systems of care as well as insight into ways in which systems of care must be challenged in order to meet the needs of people living with HIV Comprehensive Care for HIV AIDS is the result of collaborative work with the county Health Department numerous community based organizations and several planning boards in a metropolitan area which have sought to provide integrated care to people living with HIV It will be a valuable resource to the diverse community of HIV researchers advocates and providers

**Entitlement Politics** David G. Smith, 2017-07-28 Entitlement Politics describes partisan attempts to shrink the size of government by targeting two major federal health care entitlements Efforts to restructure or eliminate entitlements as such and to privatize and decentralize programs along with more traditional attempts to amend and reform Medicare and Medicaid have radically transformed policymaking with respect to these programs However they have failed to achieve fundamental or lasting reform Smith combines historical narrative and case studies with descriptions of the technical aspects and dynamics of policymaking to help the consumer understand how the process has changed evaluate particular policies and outcomes and anticipate future possibilities His account intentionally goes at some length into the substance of the programs the policies that are involved and the views of different protagonists about the major issues in the dispute One unhealthy consequence of politicizing Medicare and Medicaid policy has been to separate public debate from the technical and organizational realities underlying issues of cost containment or program structure Smith considers this development unfortunate since it leaves even informed citizens unable to evaluate the claims being made Ironically strife over Medicare has complicated the political and policy issues in American life Only a serious and genuine bipartisan effort bringing forth the best efforts of both political parties and some of the best industry leaders and policy experts in the field is likely to achieve genuine reform The more people and parties know about the history politics and policies of these programs the better our prospects for devising workable equitable and lasting solutions This volume leads the way toward that understanding

**Ties That Enable** Teresa L. Scheid, S. Megan Smith, 2021-08-13 Communities are the primary source of social solidarity and given the diversity of communities solutions to the problems faced by individuals living with severe mental health problems must start with community level initiatives Ties that Enable examines the role of a faith based community group in providing a sense of place and belonging as well as reinforcing a valued social identity Nowhere to Grow Les B. Whitbeck, Danny R. Hoyt, Les B Whitbeck and Dan R Hoyt begin their report on street children in the Midwest with the statement If you live in or have visited even a medium sized city recently you have seen runaway and homeless young people They congregate in certain downtown areas and hang out in malls during inclement weather Mostly they look like the other

kids The difference is that they won't be going home tonight This book draws on a study of over six hundred runaway and homeless adolescents and over two hundred of their caretakers from cities in four Midwestern states It focuses on the family histories of these young people and on the developmental impact of early independence Street social networks subsistence strategies sexuality and street victimization are all considered as well as their effect on adolescent behaviors and emotional health Relying on interviews and data from survey research and working in partnership with street outreach agencies Whitbeck and Hoyt lead the reader through the various risk factors associated with precocious independence beginning in the family and extending to external environments and behaviors Nowhere to Grow is an emotional account of the cumulative consequences for young people with few good options at the outset and even fewer once they are on their own **The**

**Encyclopedia of Aging** Richard Schulz, 2006 Print CourseSmart **Medical Careers and Feminist Agendas** Elianne Riska, 2017-07-05 The increasing proportion of women in the medical profession has been followed keenly both by conservative and feminist observers during the past three decades Statistics both in Europe and in the United States tend to confirm that women work mainly in niches of the health care system or medical specialties characterized by relatively low earnings or prestige The segregation of medical work has become increasingly recognized as a sign of inequality between female and male members of the medical profession Medicine as a social organization is not a universal structure Health care systems vary in the extent to which physicians work in the private or public sector and in the extent to which they have as a corporate body been able to influence their numbers and the character of their work The aim of this book is not only to review and to provide an account of women's position in medicine but also to provide an analytical framework The text revolves around three key issues that illuminate this argument numbers medical practice and feminist agendas of women physicians The issues are addressed in all the chapters but highlighted as central analytical themes in a cross cultural context Challenging previous studies of the medical profession which have assumed for the most part a gender neutral stance Riska's text provides a unique focus **Medical Careers and Feminist Agendas** presents a comprehensive cross national analysis of the current status of women in three societies where the economics of medical practice vary considerably a market society a welfare state and a formerly communist society in transition Aimed at a wide audience this book will be useful for years to come in medical sociology the sociology of professions and women's studies Its historical breadth current data and trenchant probing will furnish practitioners and policy makers alike with a needed analytical tool **INNOVATION AND CHANGE**

**IN THE HUMAN SERVICES** Nicholas D. Richie, Diane E. Alperin, 2002-01-01 This second edition of *Innovation and Change in the Human Services* considerably updates and expands the previous volume An overview of the development of human services over the course of the twentieth century culminates in an evolutionary model which illustrates how human services generally progress from an initial individual problem stage to one of considerable governmental involvement and media attention Eight specific human services are discussed in detail hospices for those with life limiting illness continuing care

retirement communities services for those with HIV AIDS domestic assault services day care for children services for the homeless lifelong occupational counseling and services for Alzheimer s patients A full chapter is devoted to some of the major events of the last decade of the twentieth century the Clinton Health Care Plan the Welfare Reforms of 1996 and the Oregon Death with Dignity Act The chapter on human services education compares degree programs in human services and social work and suggests a functional approach which would allow the human services worker to move easily from one setting to another due to having mastered a common core curriculum with universal applicability The last chapter deals with human services issues of considerable importance at the start of the twenty first century including the corporatization of human services the privatization of human services Social Security reform and healthcare reform This material is expected to be of use not only to educators and students in the human services but also to policy analysts and health services administrators practitioners who face everyday the challenge of refining adapting the programs they administer study and support
