From the Ground Up Efrat Eizenberg,2016-04-22 Little known and hidden between skyscrapers and wide avenues some 650 community gardens dot New York City Set within one of the densest and most expensive real estate markets these gardens are attended by some of the least advantaged residents of the city Urban residents use these spaces for horticulture recreation social gatherings and artistic and cultural events They

manage the gardens collectively and with relative independence from top down control Despite continuous threats from market forces the gardens have been able to thrive as significant community spaces since the 1970s This book shows how in the process of attempting to protect these highly contested spaces residents developed as community leaders and urban activists Taking an interdisciplinary approach to follow the political development of urban residents the book examines how everyday spatial practices social interactions the production of alternative urban space and the generation of new urban knowledge render community gardeners into important social actors in the urban scene The book argues that with this process of production of space a new type of organic resident evolves These urbanites constantly engage with their urban environment find ways to make the city more supportive for their collective needs and produce the city in their own image Community gardeners as organic residents claim their right to the city act to materialize their vision of the city and utilize the special potential of the locale to constitute themselves as powerful social actors on the urban scene
