**Man-eater** Edward Hodges-Hill, 1992      *Cincinnati Magazine*, 1993-02 Cincinnati Magazine taps into the DNA of the city exploring shopping dining living and culture and giving readers a ringside seat on the issues shaping the region

*Crooked Cats* Nayanika Mathur, 2021-07-12 Big cats tigers leopards and lions that make prey of humans are commonly known as man eaters Anthropologist Nayanika Mathur reconceptualizes them as cats that have gone off the straight path to become crooked Building upon fifteen years of research in India this groundbreaking work moves beyond both colonial and conservationist accounts to place crooked cats at the center of the question of how we are to comprehend a planet in crisis There are many theories on why and how a big cat comes to prey on humans with the ecological collapse emerging as a central explanatory factor Yet uncertainty over the precise cause of crookedness persists *Crooked Cats* explores in vivid detail the many lived complexities that arise from this absence of certain knowledge to offer startling new insights into both the governance of nonhuman animals and their intimate entanglements with humans Through creative ethnographic storytelling *Crooked Cats* illuminates the Anthropocene in three critical ways as method as a way of reframing human nonhuman relations on the planet and as a political tool indicating the urgency of academic engagement Weaving together beastly tales spun from encounters with big cats Mathur deepens our understanding of the causes consequences and conceptualization of the climate crisis

**Frontiers of Fear** Peter Boomgaard, 2008-10-01 For centuries reports of man eating tigers in Indonesia Malaysia and Singapore have circulated shrouded in myth and anecdote This fascinating book documents the big cat human relationship in this area during its 350 year colonial period re creating a world in which people feared tigers but often came into contact with them because these fierce predators prefer habitats created by human interference Peter Boomgaard shows how people and tigers adapted to each other's behavior each transmitting this learning from one generation to the next He discusses the origins of stories and rituals about tigers and explains how cultural biases of Europeans and class differences among indigenous populations affected attitudes toward the tigers He provides figures on their populations in different eras and analyzes the factors contributing to their present status as an endangered species Interweaving stories about Malay kings colonial rulers tiger charmers and bounty hunters with facts about tigers and their way of life the book is an engrossing combination of environmental and micro history

**Blood Rites** Barbara Ehrenreich, 2020-01-07 A New York Times Notable Book An ALA Notable Book Original and illuminating The Washington Post What draws our species to war What makes us see violence as a kind of sacred duty or a ritual that boys must undergo to become men Newly reissued in paperback *Blood Rites* takes readers on an original journey from the elaborate human sacrifices of the ancient world to the carnage and holocaust of twentieth century total war Ehrenreich sifts deftly through the fragile records of prehistory and discovers the wellspring of war in an unexpected place not in a killer instinct unique to the males of our species but in the blood rites early humans performed to reenact their terrifying experiences of predation by

stronger carnivores Brilliant in conception and rich in scope Blood Rites is a monumental work that continues to transform our understanding of the greatest single threat to human life

**Monster of God: The Man-Eating Predator in the Jungles of History and the Mind** David Quammen,2004-09-17 Rich detail and vivid anecdotes of adventure A treasure trove of exotic fact and hard thinking New York Times Book Review For millennia lions tigers and their man eating kin have kept our dark scary forests dark and scary and their predatory majesty has been the stuff of folklore But by the year 2150 big predators may only exist on the other side of glass barriers and chain link fences Their gradual disappearance is changing the very nature of our existence We no longer occupy an intermediate position on the food chain instead we survey it invulnerably from above so far above that we are in danger of forgetting that we even belong to an ecosystem Casting his expert eye over the rapidly diminishing areas of wilderness where predators still reign the award winning author of The Song of the Dodo and The Tangled Tree examines the fate of lions in India s Gir forest of saltwater crocodiles in northern Australia of brown bears in the mountains of Romania and of Siberian tigers in the Russian Far East In the poignant and troublesome ferocity of these embattled creatures we recognize something primeval deep within us something in danger of vanishing forever

**Wildlife in Asia** John Knight,2004-07-31 Drawing on anthropological and historical data this book examines human wildlife relations in China Tibet Japan Bhutan Indonesia the Philippines Malaysia India Thailand and Vietnam The volume initially focuses on the various ways in which wild animals are exploited as a resource for food medicine and crop picking labour before examining animals termed as pests or predators that are deemed to be harmful and dangerous Bringing together anthropologists and historians this book analyses the range variability and historical mutability of human sensibilities towards animals in Asia and will be of interest to Asianists and anthropologists alike
