Unconscious Logic Eric Rayner,2003-09-02 While the theories of Matte Blanco about the structure of the unconscious and the way in which it operates are generally recognised to be the most original since those of Freud for many people the ways in which his ideas are expressed including the use of terminology from mathematics and logic make them difficult of access Eric Rayner has written the first clear introduction to Matte Blanco's key concepts for psychotherapists and psychoanalysts and all those concerned with moving psychoanalytic thinking forward He sets out the central ideas in a way which is easy to understand and then shows with examples how they relate to clinical practice He also describes how the ideas are related to those of people in other disciplines mathematics logic psychology specifically Piaget and anthropology among others Drawing on the work of a group of people who have been inspired by Matte Blanco's thinking to extend their own ideas and test them out in the consulting room this book reveals the significance of Matte Blanco's thought for future research

Thinking, Feeling, and Being

Madness and Creativity

Ann Belford Ulanov,2013-03-20 Analyst and author Ann Belford Ulanov draws on her years of clinical work and reflection to make the point that madness and creativity share a kinship an insight that shakes both analysand and analyst to the core reminding us as it does that the suffering places of the human psyche are inextricably and often inexplicably related to the fountains of creativity service and even genius She poses disturbing questions How do we depend on order when chaos is a necessary part of existence What are we to make of evil both that surrounding us and that within us Is there a myth of meaning that can contain all the differences that threaten to shatter us Ulanov s insights unfold in conversation with themes in Jung s Red Book which according to Jung present the most important experiences of his life themes he explicated in his subsequent theories In words and paintings Jung displays his psychic encounters from 1913 1928 describing them as inner images that burst forth from the unconscious and flooded me like an enigmatic stream and threatened to break me

Responding to some of Jung s more fantastic encounters as he illustrated them Ulanov suggests that our problems and compulsions may show us the path our creativity should take With Jung she asserts that the multiplicities within and around us are paradoxically pieces of a greater whole that can provide healing and unity as in her words every part of us and of our world gets a seat at the table Taken from Ulanov s addresses at the 2012 Fay Lectures in Analytical Psychology Madness and Creativity stands as a carefully crafted presentation with many clinical examples of human courage and fulfillment
