Manipulating The Ether The Power Of Broadcast Radio In Thirties America:

Manipulating the Ether Robert J. Brown, 2004-11-09 Franklin D Roosevelt was the first politician to recognize the power of radio He appealed directly to the American people for support of his New Deal and for his foreign policy Roosevelt's speeches and fireside chats were broadcast over networks only recently equipped with newsrooms Listeners immediately learned of events they earlier would not have heard about for days In those newsrooms commentators began to interpret the news for average listeners sometimes slanting it to reflect their own view But it fell to a young star to demonstrate the full power of the medium On October 30 1938 Orson Welles War of the Worlds broadcast brought widespread panic with its fictional newscast of an alien invasion How Roosevelt used radio how the news was reported and the changes Welles caused are all detailed

Broadcast Hysteria A. Brad Schwartz, 2015-05-05 In Broadcast Hysteria A Brad Schwartz examines the history behind the infamous radio play Did it really spawn a wave of mass hysteria Schwartz is the first to examine the hundreds of letters sent directly to Welles after the broadcast He draws upon them and hundreds more sent to the FCC to recapture the roiling emotions of a bygone era and his findings challenge conventional wisdom Relatively few listeners believed an actual attack was under way But even so Schwartz shows that Welles's broadcast prompted a different kind of mass panic as Americans debated the bewitching power of the radio and the country's vulnerability in a time of crisis

Schwartz's original research gifted storytelling and thoughtful analysis make Broadcast Hysteria a groundbreaking work of media history

Science on the Air Marcel Chotkowski LaFollette, 2009-08-01 Mr Wizard's World Bill Nye the Science Guy NPR's Science Friday These popular television and radio programs broadcast science into the homes of millions of viewers and listeners But these modern series owe much of their success to the pioneering efforts of early twentieth century science shows like Adventures in Science and Our Friend the

Atom Science on the Air is the fascinating history of the evolution of popular science in the first decades of the broadcasting era Marcel Chotkowski LaFollette transports readers to the early days of radio when the new medium allowed innovative and optimistic scientists the opportunity to broadcast serious and dignified presentations over the airwaves But the exponential growth of listenership in the 1920s from thousands to millions and the networks recognition that each listener represented a potential consumer turned science on the radio into an opportunity to entertain not just educate Science on the Air chronicles the efforts of science popularizers from 1923 until the mid 1950s as they negotiated topic content and tone in order to gain precious time on the air Offering a new perspective on the collision between science s idealistic and elitist view of public communication and the unbending economics of broadcasting LaFollette rewrites the history of the public reception of science in the twentieth century and the role that scientists and their institutions have played in both encouraging and inhibiting popularization By looking at the broadcasting of the past Science on the Air raises issues of concern to all those who seek to cultivate a scientifically literate society today
