Mesarovic, 1974      **Mankind at the Turning Point: the Second Report of the Club of Rome**, 1975      *Hearings, Reports and Prints of the House Committee on Interstate and Foreign Commerce* United States. Congress. House. Committee on Interstate and Foreign Commerce, 1976      *From Malthus to the Club of Rome and Back* Paul Neurath, 2017-07-05 This collection of articles on population growth spans 20 years of the author's thinking and research on a wide range of issues The book opens with a presentation of the early history of demography before Thomas Malthus wrote his essay on the principles of population 1798 that marked the beginnings of modern demography as a science The author follows up with a chapter on the estimates made at various times in the past hundred years about the maximum number of people who could live on earth Four papers deal with the debates about global models of population growth and the limits to growth Sharp swings in population policy in China from the Communist Revolution under Mao in 1949 to the one child per family rule in 1979 are also considered Another chapter compares population policy in Japan China and India A chapter is devoted to the role of oil and the soaring price of this basic input into agriculture as a constraint on food production and as a result on population growth A closing chapter considers the great migrations of the 19th and 20th centuries including the transatlantic and transpacific movements the mass migrations after World Wars I and II and those of recent decades This book will interest scholars and students in economics and other social sciences dealing with the issues of demography population growth and economic development      *The Struggle for the Long-Term in Transnational Science and Politics* Jenny Andersson, Eglė Rindzevičiūtė, 2015-04-10 This book reconsiders the power of the idea of the future Bringing together perspectives from cultural history environmental history political history and the history of science it investigates how the future became a specific field of action in liberal democratic state socialist and post colonial regimes after the Second World War It highlights the emergence of new forms of predictive scientific expertise in this period and shows how such forms of expertise interacted with political systems of the Cold War world order as the future became the prism for dealing with post industrialisation technoscientific progress changing social values Cold War tensions and an emerging Third World A forgotten problem of cultural history the future re emerges in this volume as a fundamentally contested field in which forms of control and central forms of resistance met as different actors set out to colonise and control and others to liberate The individual studies of this book show how the West European African Romanian and Czechoslovak long term was constructed through forms of expertise computer simulations and models and they reveal how such constructions both opened up new realities but also imposed limits on possible futures      *Politics as*

*Leadership* Robert C. Tucker, 1995-10-01 Robert C Tucker begins this invaluable book with an analytical look at politics leadership and the effect each has on the other Aligning himself with Plato's view of politics as leadership Tucker argues that politics is more usefully defined from this perspective than from the more familiar stance of the exercise of power He maintains leaders must define collective problems prescribe actions or policies and finally seek support for their diagnoses and policy prescriptions Tucker contends that political science must take account not only of leadership by those in state authority but also of sociopolitical movements for change as vehicles of attempted leadership of political communities Dividing such movements into those for reform and those for revolution he illustrates this distinction with examples including Martin Luther King Jr as a reform leader and Lenin as a revolutionary one Finally Tucker raises a central question of his study how can leadership save humankind from itself in the troubled world of today In an insightful and moving discussion of what he calls the crisis syndrome Tucker analyzes problems such as population growth resource depletion and environmental degradation with respect to leadership He argues that the current political process has focused on the immediate present while ignoring crises with far reaching implications that require tough solutions In the epilogue to this revised edition Tucker draws on his expertise as a Russian specialist extending the book's discussion of leadership by viewing Mikhail Gorbachev as a reform leader in Soviet Russia and Boris Yeltsin as a post Soviet Russian leader Tucker also readdresses the crisis syndrome by examining leaders' responses in the 1980s and early 1990s Tucker's incisive reasoning original insights and commentary on the theory and practice of politics should make this revised edition of *Politics as Leadership* equally valuable and fascinating for experts in the field of political science and for concerned citizens **Disciplining the Undisciplined?**

*The Death of Industrial Civilization* Joel Jay Kassiola,1990-01-01 The Death of Industrial Civilization explains how the contemporary ecological crisis within industrial society is caused by the values inherent in unlimited economic growth and competitive materialism Kassiola shows that the limits to growth critique of industrial civilization is the most effective stance against what seems to be a dominant and invincible social order He prescribes the social changes that must be implemented in order to transform industrial society into a sustainable and more satisfying one

**Resources Society and the Future** Sam Stuart,2013-09-03 Resources Society and the Future

*Can Russia Change?* Walter Clemens,2011 First published in 1990 this ground breaking book sought to determine whether contemporary Russia had the capacity to change and if in so doing it could alter the complex web of East West relations from a zero sum struggle to a state of peaceful competition and mutual security In order to answer this question the author compares advances and setbacks in arms control and security affairs with co operation on less politically salient issues such as environmental degradation He finds that in the nearly seventy years preceding Mikhail Gorbachev s rise to power the Kremlin relied on several basic approaches to foreign relations These policies isolated the Soviet Union from those nations whose co operation it needed to cope with the escalating interdependencies of the time Gorbachev Clemens argues was the first Soviet leader to recognise both the problems and potential benefits of global interdependence and to explore the possibilities for co operation between East and West to advance mutual security Can Russia Change is unique in its comparative approach and historical perspective and this reissue will prove invaluable to all those interested in the history of Soviet security and foreign policy as well as US Soviet relations
