analysis on the basis of biological common sense is beginning to be appreciated And the following papers will be found I think to contain all those qualities which so sharply differentiate Mr Crawley s work from that of most other students in the same fields

Joseph C. Pitt, 2012-12-06 In this essay I am concerned with the problem of conceptual change There are needless to say many ways to approach the issue But as I see it the problem reduces to showing how present and future systems of thought are the rational extensions of prior ones This goal may not be attainable Kuhn for example suggests that change is mainly a function of socio economic pressures taken broadly But there are some who believe that a case can be made for the rationality of change especially in science Wilfrid Sellars is one of those While Sellars has developed a full account of the issues involved in solving the problem of conceptual change he is also a very difficult philosopher to discuss The difficulty stems from the fact that he is a philosopher in the very best sense of the word First he performs the tasks of analyzing alternative views with both finesse and insight dialectically laying bare the essentials of problems and the inadequacies of previous proposals Secondly he is a systematic philosopher That is he is concerned to elaborate a system of philosophical thought in the grand tradition stretching from Plato to Whitehead Now with all of this to his credit it would appear that there is no difficulty at all one should simply treat him like all the others if he indeed follows in the footsteps of past builders of philosophic systems      **American Historical Explanations**

Gene Wise, 1980 American Historical Explanations was first published in 1980 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions In this new edition of American Historical Explanations Gene Wise expands his examination of historical thinking to include the latest work in American Studies the new social history ethnography and psychohistory Wise asserts that historians address their subjects through an intervening set of assumptions or what he calls explanation forms similar to the philosophical paradigms that Thomas Kuhn has found in scientific inquiry Through analysis of historical cultural texts including the work of V L Parrington Lionel Trilling and Perry Miller he defines the forms used by several groups of American historians and traces the process by which an old form breaks down and is replaced by a new set of assumptions Throughout he aims to study the process of change in the history of ideas His conclusions extend beyond historiography and will be useful for those interested in literature social sciences and the arts
