Does the World Exist? Anna-Teresa Tymieniecka,2012-12-06 Does the World exist There would be no reason to resurrect this question of modernity from its historical oblivion were it not for the fact that recent evolution in science and technology impregnating culture makes us wonder about the nature of reality of the world we are living in and of our status as living beings within it Thus great metaphysical subjacent queries are forcefully revived calling for new investigations to proceed in the light of the innumerable novel insights of science This collection presents a wealth of material toward an elaboration of a new metaphysical groundwork of the ontopoiesis phenomenology of life sought to effect such investigations The classic postulates of the metaphysics of reality those of necessity and certainty here find a new formulation Away from sclerotized ontological and cognitive assumptions and congenial with the views of contemporary science the understanding of reality of our world of life and of ourselves within it is to be sought in the existential ontopoietic ciphering of life Tymieniecka The Self and The Other Anna-Teresa Tymieniecka,2013-06-29 Logos and Life: The Three Movements of the Soul Anna-Teresa Tymieniecka,1988-10-31 PART I THE CRITIQUE OF REASON CONTINUED FROM LOGOS TO ANTI LOGOS 1 THE NEW CRITIQUE OF REASON A new critique of reason is the crucial task imposed on the philosophy of our times as we emerge more and more from so called modernism into a historical phase which will have to take its own paths and find its own determination It may be considered that the main developmental line of modern times in its philosophy as well as in its culture at large was traced by the Cartesian cogito The unfolding of Occidental philosophy has culminated in reason or intellect s being awarded the central place This is its specific trait We can see a direct line of progression from the cogito to Kant s Critique It is no wonder that this work is the landmark of modern philosophy Kant s Critique was concerned with the foundation of the sciences Edmund Husserl launched a second major renewed critique of reason one which addresses not only the critical situation of the sciences but extends the critique even to the situation of Occidental culture as its malaise is diagnosed by this great thinker Edmund Husserl voiced in fact the conviction that Occidental humanity has reached in our age the peak of its unfolding His identifying this peak with the formulation of phenomenological philosophy strikes at the point in which the significant and novel developments of Occidental culture and philosophy phenomenology that is coincide

Ontopoietic Expansion in Human Self-Interpretation-in-Existence Anna-Teresa Tymieniecka,1998 Papers from the Second World Phenomenology Congress convened September 12 18 1995 in Guadalajara Mexico articulate the four main tenets of the ontopoiesis of life the priority of the creative act over the cognitive intentional act the revelation that the human creative condition is pivotal in tracing specifically human powers that the creative act of the human being is the meeting ground for all human endeavors and the ontopoietic self individualization of life No index Annotation copyrighted by Book

Tymieniecka,2012-12-06 It is rare that we feel ourselves to be participating in history Yet as Bertrand Russell observed philosophy develops in response to the challenges of socio cultural problems and situations The present day philosophical endeavor is prompted not by one or two but by a conundrum of problems and controversies in which the forces carrying life are set against each other The struggles in which contemporary mankind is fiercely engaged are not confined as in the past to economic territorial or religious rivalries nor to the quest for power but extend to the primary conditions of human existence They under mine man s primogenital confidence in life and shatter the intimacy of his home on earth Philosophical reflection today cannot fail to feel the pressure of the current situation within which it unfolds Since this situation now involves the ultimate conditions of human existence its demands have at last given to philosophy the impetus and direction needed for conceiving that the first and last of its concerns should be life itself *The Phenomenology of Man and of the Human Condition* Anna-Teresa Tymieniecka,2012-12-06

Paideia Anna-Teresa Tymieniecka,2000-08-31 The education of humanity is the key to the next century s culture its social and practical life The main concerns of education are perennial but the continuous flood of inventions the technological innovations that re shape life calls for a radically new appraisal of the situation such as only philosophy can provide Answering the call of humanity for the measure sense of proportion and direction that could re orient present and future education the phenomenology of life integral and scientific in a dialogue with the arts the sciences and the humanities proposes an ontopoietic model of life s unfolding as the universal paradigm for this re orientation Taking the Human Creative Condition as its Archimedean point it offers a unique context for a fresh investigation of the concerns of education both perennial and immediate **Memory in the Ontopoiesis of Life**

Anna-Teresa Tymieniecka,2009-09-30 From Aristotle to the present memory has been grasped as a trace or impression of lost reality bridging physiological experience and consciousness Philosophers have vainly sought the nature of this bridge The present day physiologizing naturalizing of consciousness is not resolving their congenital continuity in which the very existence and practice of life is rooted We have to change our approach Erwin Straus The Aristotelian congenital ties between memory and temporality acquire crucial significance in our primogenital ontopoiesis of life Tymieniecka It reveals memory to be the factor that carries this coalescence and the becoming of life itself This can be the fruit only of the generative springs of life first phenomenology philosophy the ontopoietic logos of life In this collection we explore memory in the constitution of reality remembering and interpretation consciousness action facts imagination history myths self realization metamorphosis **Creative Virtualities in Human Self-Interpretation-in-Culture** Anna-Teresa

Tymieniecka,2012-12-06 It would seem that modern humanity has unthroned the human spirit undercutting the very foundation of the validity of truth moral values and principles There appears to be no attempt to discern what is beautiful and true it is functional and pragmatic usefulness that seem to dominate human evaluations and transactions with other humans

and indeed animals Humanity is becoming detached from the higher aesthetic moral and intellectual works of the human spirit and thus the life of the spirit is often situated on the other side of a gulf opposed to science with its rationality Culture is in danger of becoming reduced to science In other words the great metaphysical questions those of telos of sense often are answered in terms of scientific conceptions But these are at least incomplete if not fragmentary and in principle hypothetical which still leaves the questions unanswered But it is culture that is the manifestation of the human spirit being the historical process of human self interpretation in existence All manifestations of the creative force of the human being find a role in the fabric of culture which involves progressively widening circles of the human community demanding an integration and attunement with others in their changing conditions of life This consideration of culture involves all areas of philosophical reflection moral aesthetic metaphysical epistemological semiological cognitive and more *Life After Literature* Zoltán Kulcsár-Szabó, Tamás Lénárt, Attila Simon, Roland Végső, 2020-04-24 This book offers innovative investigations of the concept of life in art and in theory It features essays that explore biopoetics and look at how insights from the natural sciences shape research within the humanities Since literature works of art and other cultural products decisively shape our ideas of what it means to be human the contributors to this volume examine the question of what literature literary and cultural criticism and philosophy contribute to the distinctions or non distinctions between human animal and vegetal existence Coverage combines different methodological aspects and addresses a wide field of comparative literary studies The essays consider the question of language as a distinctive feature of human existence in a number of different contexts which range from Aristotle's works through several historical layers of the philosophical discourse on the origins of speech to modern anthropology and 20th century continental philosophy In addition the volume includes concrete case studies to the current post humanism debate and provides literary art historian and philosophical perspectives on animal studies The historical multiplicity of the various cultural representations of biological existence be that human animal vegetal or mixed might serve as a productive foundation for discussing the nature and forms of literature's critical contributions to our understanding of these fundamental categories This volume opens up this subject to students and scholars of literature art philosophy ethics and cultural studies and to anyone with a theoretical interest in the questions of life The Moral Sense in the Communal Significance of Life Anna-Teresa Tymieniecka, 2012-12-06 **Husserl's Legacy in Phenomenological Philosophies** Anna-Teresa Tymieniecka, 2012-12-06 **The Moral Sense and its Foundational Significance: Self, Person, Historicity, Community** Anna-Teresa Tymieniecka, 2012-12-06 **Foundations of Morality, Human Rights, and the Human Sciences** Anna-Teresa Tymieniecka, Calvin O. Schrag, 1983-04-30 The essays in this volume constitute a portion of the research program being carried out by the International Society for Phenomenology and the Human Sciences Established as an affiliate society of the World Institute for Advanced Phenomenological Research and Learning in 1976 in Arezzo Italy by the president of the Institute Dr Anna Teresa Tymieniecka this particular society is devoted to an exploration of the

relevance of phenomenological methods and insights for an understanding of the origins and goals of the specialised human sciences The essays printed in the first part of the book were originally presented at the Second Congress of this society held at Purdue University West Lafayette Indiana 12 14 July 1979 The second part of the volume consists of selected essays from the third convention the Eleventh International Congress of Phenomenology of the World Phenomenology Institute held in Cambridge Massachusetts in 1981 With the third part of this book we pass into the Human Rights issue as treated by the World Phenomenology Institute at the Interamerican Philosophy Congress held in Tallahassee Florida also in 1981 The volume opens with a monograph by Anna Teresa Tymieniecka on the foundations of ethics in the moral practice within the life world and the social world shown as clearly distinct The main ideas of this work had been presented by Tymieniecka as lead lectures to the three conferences giving them a tight research project consistency

Passion for Place Book II

Anna-Teresa Tymieniecka, 2013-06-29 Among the multiple subliminal passions that inspire our life in innumerable ways literature shows us one that seems to play a particularly penetrating role in human concerns This passion which Tymieniecka calls an esoteric passion finds its projection and crystallization in space it is the esoteric passion for space This subliminal passion investigated through literature allows the philosopher to reach beneath the fallacious separations of nature humanness and the cultural world restoring the wholeness of experience that has become lost in the artificial one sidedness of contemporary approaches confined to language as they are The elemental passion for place is investigated here in the literary fruits of creative imagination Unravelling from the very depths of the primogenital onto poietic unfolding of life the passion for place is revealed as projecting into the flux of life it is a station of life significance This collection presents papers from two conferences of the International Society of Phenomenology and Literature held in Cambridge MA in 1993 4

Phenomenology World-Wide Anna-Teresa Tymieniecka, 2014-11-14 Phenomenology is the philosophy of our times Through the entire twentieth century this philosophy unfolded and flourished following stepwise the intrinsic logic and dynamism of its original project as proposed by its founder Edmund Husserl Now its seminal ideas have been handed over to a new era The worldwide contributors to this volume make it manifest that phenomenological inspiration knows no cultural barriers It penetrates and invigorates not only philosophical disciplines but also most of the sectors of knowledge transforming our way of seeing the world our actions toward others and our lives Phenomenology's universal spread has however oftentimes diluted its original sense even beyond recognition and led to a weakening of its dynamics There is at present an urgent need to retrieve the original understanding of phenomenology to awaken its dormant forces and redirect them This is the aim of the present book resourcement and reinvigoration It is meant to be not only a reference work but also a guide for research and study To restore the authentic vision of phenomenology we propose returning to its foundational source in Husserl's project of a universal science unpacking all its creative capacities In the three parts of this work there are traced the stages of this philosophy's progressive uncovering of the grounding levels of reality ideal structures constitutive

consciousness the intersubjective lifeworld and beyond The key concepts and phases of Husserl's thought are here exfoliated Then the thought of the movement's classical figures and of representative thinkers in succeeding generations is elucidated Phenomenology's geographic spread is reviewed We then proceed to the culminating work of this philosophy to the phenomenological life engagements so vigorously advocated by Husserl to the life significant issues phenomenology addresses and to how it has enriched the human sciences Lastly the phenomenological project's new horizons on the plane of life are limned horizons with so powerful a draw that they may be said not to beckon but to summon Here is the movement's vanguard This collection has 71 entries Each entry is followed by a relevant bibliography There is a helpful Glossary of Terms and an Index of Names Impetus and Equipose in the Life-Strategies of Reason Anna-Teresa Tymieniecka, 2000-12-31 Employing her original concept of the onto-poiesis of life the author uncovers the intrinsic law of the primogenital logos that which operates in the working of the indivisible dyad of impetus and equipose This is the crucial intrinsically motivated device of logoic constructivism This key instrument is engaged is at play at every stage of the advance of life In a feat unprecedented in the history of western philosophy the emergence and unfolding of the entire orbit of the human universe is shown to bear out this insight Furthermore the intrinsic rhythms of impetus and equipose are taken as a guide in uncovering the workings of the logos all at once in contrast to the piecemeal exposition of a single line of argument In a schema covering the entire career of beingness in becoming between the infinities of origin and destiny an historically unprecedented harmonizing all sectors of rationality is accomplished in a span of reflection comparable to Spinoza's Ethics The work draws on interdisciplinary investigations in both science and the arts All of the history of Occidental philosophy finds summary in it even as feelers guidelines leitmotifs are thrown out for its future development A landmark of Occidental philosophy at the turn of the millennium
