Murder in Miniature Agnes Norman, Detective Sophie Lane is not your typical detective She s sharp observant and possesses a keen eye for detail a skill honed not only by years on the force but also by a lifelong fascination with art and design When a renowned miniature artist is found murdered within her own

creation a breathtakingly detailed dollhouse Sophie finds herself immersed in a world of intricate artistry and cutthroat competition The miniature mansion a seemingly innocent work of art becomes the primary crime scene a canvas on which the killer has staged their gruesome masterpiece The investigation takes Sophie into a hidden world of skilled artisans each with their own secrets rivalries and potential motives This isn't simply a case of murder it's a meticulously crafted puzzle box its pieces hidden within the walls of tiny rooms beneath miniature furniture and behind cleverly disguised objects Sophie must learn to navigate this world to see beyond the exquisite detail and uncover the sinister truths that lie beneath the surface The dollhouses themselves become characters in the story silent witnesses that hold the key to unlocking the killer's identity and their complex twisted motivations Prepare to enter a world where the line between art and crime blurs where the smallest detail may hold the biggest clue and where even the most perfect miniature can conceal a dark and deadly secret The journey begins within the walls of a meticulously crafted dollhouse but the destination lies far beyond its tiny intricately designed rooms

Lost Maps of the Caliphs Yossef Rapoport, Emilie Savage-Smith, 2018-12-11

About a millennium ago in Cairo an unknown author completed a large and richly illustrated book In the course of thirty-five chapters this book guided the reader on a journey from the outermost cosmos and planets to Earth and its lands islands features and inhabitants This treatise known as The Book of Curiosities was unknown to modern scholars until a remarkable manuscript copy surfaced in 2000 Lost Maps of the Caliphs provides the first general overview of The Book of Curiosities and the unique insight it offers into medieval Islamic thought Opening with an account of the remarkable discovery of the manuscript and its purchase by the Bodleian Library the authors use The Book of Curiosities to re-evaluate the development of astrology geography and cartography in the first four centuries of Islam Their account assesses the transmission of Late Antique geography to the Islamic world unearths the logic behind abstract maritime diagrams and considers the palaces and walls that dominate medieval Islamic plans of towns and ports Early astronomical maps and drawings demonstrate the medieval understanding of the structure of the cosmos and illustrate the pervasive assumption that almost any visible celestial event had an effect upon life on Earth Lost Maps of the Caliphs also reconsiders the history of global communication networks at the turn of the previous millennium It shows the Fatimid Empire and its capital Cairo as a global maritime power with tentacles spanning from the eastern Mediterranean to the Indus Valley and the East African coast As Lost Maps of the Caliphs makes clear not only is The Book of Curiosities one of the greatest achievements of medieval mapmaking it is also a remarkable contribution to the story of Islamic civilization that opens an unexpected window to the medieval Islamic view of the world
