Arner, 2016-11-11 This is the first study of the life and career of Thomas Dobson arguably the most prominent American printer publisher and bookseller between the years 1785 and 1822 whose accomplishments included publication of the first American edition of the Hebrew Bible and the first American edition of the Encyclopaedia Britannica *Edna Boies Hopkins* Dominique H. Vasseur, 2007 Edna Boies Hopkins 1872-1937 is best known for her floral woodblock prints that range from delicate Japanese inspired stylizations to boldly colored and progressively modernist works In her brief twenty year career Hopkins produced seventy four known woodblock prints including figurative work and landscapes as well as floral compositions This catalogue raisonné is the first in depth study of this once well known American artist It illustrates all of Hopkins's known prints related drawings and studies Born in Hudson Michigan Hopkins attended the Art Academy of Cincinnati from 1895 to 1898 In 1899 she took classes with the influential artist Arthur Wesley Dow an advocate of Japanese art Following her marriage in 1904 Hopkins and her husband

settled in Paris where they remained until the outbreak of World War I. After returning to America, Hopkins became part of a small group of artists in Provincetown whose innovations in woodblock printmaking have come to be known as the Provincetown print or the white line woodcut. In 1917 a visit to the Cumberland Falls region of Kentucky provided the inspiration for some of Hopkins's most important prints which predate the work of American regionalist painters and printmakers by a decade or more. In addition to the catalogue raisonné, Edna Boies Hopkins includes much new biographical research along with a census of her prints and a comprehensive list of her exhibitions.

John Mills Van Osdel, Architect, and his Chicago by Burtram Collver Hopkins II. There is no question that Chicago is an architecturally significant city. But before Louis Henry Sullivan, John Wellborn Root, and Frank Lloyd Wright, before modernism, there lived a man whose designs built it from the ground up. Written by his descendant, retired architect Burtram C. Hopkins II, more than a century later, this book traces the incredible mark left on Chicago by architect John Mills Van Osdel, a mark tragically largely wiped out by the Great Fire of 1871. From the time he arrived in 1837 to his death in 1891, Van Osdel watched the city swell from a village of around a thousand people to a bustling metropolis of hundreds of thousands. Though his name is little known today, he played a crucial role in establishing architecture as a discipline in Chicago, drafting the Chicago Architect's Code, one of the first of its kind, laying the groundwork for the skyscrapers that would become the hallmark of the First Chicago School of Architecture and contributing hundreds of architecturally significant structures to the growing urban landscape, as well as countless more, some still surviving in other parts of Illinois, Iowa, Indiana, Michigan, and Arkansas. Van Osdel's impact would reverberate in large part through his family, many of whom themselves pursued architectural and artistic careers, including his nephew and business partner, John Mills Van Osdel II. This truly encyclopedic book traces this inheritance with a section on Van Osdel II, doubling as both an architectural history and a work of family genealogy. Vast in scope and exhaustively detailed, it is sure to make an invaluable addition to the shelves of anyone interested in this powerhouse of American architecture and his influential family who helped transform Chicago from a frontier town on Lake Michigan to the capital of industry it is today.

Rounded Up in Glory by Michael Grauer, 2016-08-15

Frank Reaugh, 1860–1945, pronounced Ray, was called the Dean of Texas artists for good reason. His pastels documented the wide open spaces of the West as they were vanishing in the late nineteenth century, and his plein air techniques influenced generations of artists. His students include a Who's Who of twentieth-century Texas painters: Alexandre Hogue, Reveau Bassett, and Lucretia Coke, among others. He was an advocate of painting by observation and encouraged his students to do the same by organizing legendary sketch trips to West Texas. Reaugh also earned the title of Renaissance man by inventing a portable easel that allowed him to paint in high winds and developing a formula for pastels which he marketed. A founder of

the Dallas Art Society which became the Dallas Museum of Art Reaugh was central to Dallas and Oak Cliff artistic circles for many years until infighting and politics drove him out of fashion He died isolated and poor in 1945 The last decade has seen a resurgence of interest in Reaugh through gallery shows exhibitions and a recent documentary Despite his importance and this growing public profile however *Rounded Up in Glory* is the first full length biography Michael Grauer argues for Reaugh's importance as more than just a longhorn painter Reaugh's works and far reaching imagination earned him a prominent place in the Texas art pantheon Department of State Publication ,1948 **Anarchist Modernism** Allan Antliff,2001-04-15 Reveals that during the World War I era modernists participated in a wide ranging anarchist movement that encompassed lifestyles literature and art as well as politics **Illuminated Paris** S. Hollis Clayson,2019-05-31 The City of Light For many these four words instantly conjure late nineteenth century Paris and the garish colors of Toulouse Lautrec's iconic posters More recently the Eiffel Tower's nightly show of sparkling electric lights has come to exemplify our fantasies of Parisian nightlife Though we reflect longingly on such scenes in *Illuminated Paris* Hollis Clayson shows that there's more to these clichés than meets the eye In this richly illustrated book she traces the dramatic evolution of lighting in Paris and how artists responded to the shifting visual and cultural scenes that resulted from these technologies While older gas lighting produced a haze of orange new electric lighting was hardly an improvement the glare of experimental arc lights themselves dangerous left figures looking pale and ghoulish As Clayson shows artists' representations of these new colors and shapes reveal turn of the century concerns about modernization as electric lighting came to represent the harsh glare of rapidly accelerating social change At the same time in part thanks to American artists visiting the city these works of art also produced our enduring romantic view of Parisian glamour and its Belle époque
