Auto-Segmentation for Radiation Oncology Jinzhong Yang,Gregory C. Sharp,Mark J. Gooding,2021-04-19 This book provides a comprehensive introduction to current state of the

art auto segmentation approaches used in radiation oncology for auto delineation of organs at risk for thoracic radiation treatment planning. Containing the latest cutting edge technologies and treatments, it explores deep learning methods, multi-atlas based methods, and model based methods that are currently being developed for clinical radiation oncology applications. Each chapter focuses on a specific aspect of algorithm choices and discusses the impact of the different algorithm modules on the algorithm performance as well as the implementation issues for clinical use, including data curation challenges and auto contour evaluations. This book is an ideal guide for radiation oncology centers looking to learn more about potential auto segmentation tools for their clinic, in addition to medical physicists commissioning auto segmentation for clinical use.

**Features:** Up to date with the latest technologies in the field. Edited by leading authorities in the area with chapter contributions from subject area specialists. All approaches presented in this book are validated using a standard benchmark dataset established by the Thoracic Auto Segmentation Challenge, held as an event of the 2017 Annual Meeting of the American Association of Physicists in Medicine.
