own Websites using HTML and CSS I've blogged with WordPress for many years However I'm always fighting with it to get things formatted my way I figured if I created my own blogging system I wouldn't have to do that So I created my Radical Blogging Method You can use it too I used HTML for the webpage and CSS for the styling I also used my very easy to use Javascript Library to make my webpage more expressive and to save me a few steps This can all be done without any Javascript if you wish First I had to figure out what a blogging system does Then I had to replicate it well at least the important steps My blogging method uses HTML and CSS just like my webpages do So I just write my posts like I write my webpages The theme is the same as the other pages of my website with a few extra features for the Posts In addition to the posts there's a list of all the posts I made that's very simple to maintain And there's a Feed This Feed File tells others sites about your posts and it lets readers subscribe to your post I've set things up so that it's easy to maintain this feed file In this book I explain why I did this how I did it and how you can use it too Then I let you draw your own conclusion Using my Radical Blogging Method saves me time and makes blogging a joy again
