RECOVERING LIFE AFTER A STROKE
ROBERT MCCRUM

My Year Off Recovering Life After A Stroke

Jacqueline H. Hinckley

My Year Off Recovering Life After A Stroke:

My Year Off Robert McCrum, 1998 *My Year Off* is a story of hope written with the sort of candor and detail that has been missing in the literature of strokes up to this time. It is as well a grown up love story of the most realistic and hence inspiring kind.

My Year Off Robert McCrum, 1998-09 A frank and moving memoir of the stroke that felled the author at his peak of vigor and achievement. *May Day: Recovering Humor from a Stroke* Anna Marie Porter, 2015-09-11 Less than two months past her fifty third birthday Anna Marie Porter suffered a stroke caused by the rupture of a cerebral cavernous malformation. She was suddenly paralyzed on her right side unable to use any of her appendages save three fingers. In the wake of such a life altering event and faced with months of rehab she found comfort in poking fun at her situation. Humor became her survival mechanism. What's so funny about having a stroke? Not much unless you have a healthy sense of humor or even an unhealthy one. And if you're going to take a death defying leap into the world of serious illness, what good is sitting alone in your room? So she didn't. She invited her friends, family and colleagues in to her virtual hospital room through an online blog. That blog became the basis for this book. *May Day: Recovering Humor From a Stroke* is sometimes poignant, often funny and always an enlightening look into the world of recovering from a serious setback.

My Year Off Robert McCrum, 2011-11-30 A Publishers Weekly Best Book of 1998. To all concerned, this book is meant to send a ghostly signal across the dark universe of ill health that says you are not alone. Robert McCrum. On July 29, 1995, Robert McCrum, 42, married only ten weeks, suffered a paralyzing stroke. Overnight, his life shifted irrevocably. But this admired novelist and former editorial director of the London publishing house Faber and Faber decided to chronicle what became a remarkable journey into that mysterious, unexplored territory: the neighbourly world of the unwell, as well as a deeply moving love story.

The Stroke Book June Biermann, Barbara Toohey, 2005-03-03 An indispensable sensitive guide for stroke sufferers and those who care for them. According to the U.S. Centers for Disease Control, an American suffers a stroke every forty-five seconds. More than 700,000 Americans each year find themselves struggling to recover from this affliction, and many hundreds of thousands more are there to help them mend. June Biermann, a stroke survivor, and her coauthor and caregiver Barbara Toohey, authors of the bestselling *Diabetic's Total Health and Happiness Book*, offer this essential source for those recovering from a stroke and those providing them with support. *The Stroke Book* offers readers clear explanations of the science of this often misunderstood condition. Information on what to expect at the hospital and in rehabilitation. Analyses of encouraging new developments in stroke therapy, including basic and alternative therapies and traditional and cutting edge medications. Advice on coping with complex rehabilitation needs, including adjustments for nutrition, mobility and everyday living, and on understanding after stroke emotional and cognitive changes. Suggestions for preventing future strokes. Information on how people recovering from a stroke can reclaim their independence and quality of life, and how caregivers can manage their own stresses and sorrows. Heartening words on keeping hope alive with patience and fortitude and the curative power of humor.

Inspiring stories of the stroke and recovery experiences of well known individuals With stroke now the leading cause of serious long term disability in the United States Biermann and Toohey s optimistic user friendly guide to living well after an attack is a vital tool for recovery *Psychotherapy for Families after Brain Injury* Pamela S. The Companion also features in depth explorations of current research areas in stylistics in the form of new studies by established researchers in the field. The broad interdisciplinary scope of stylistics is reflected in the wide array of approaches taken to the linguistic study of texts, drawing on traditions from linguistics, literary theory, literary criticism, critical theory and narratology and in the diverse group of internationally recognised contributors.

A Different Perspective After Brain Injury Christopher Yeoh, 2017-07-14 Whilst preparing for his travel adventures into a world he had yet to explore, Christopher Yeoh was involved in a road traffic accident and experienced something few others would be privileged to witness. Eight days in a coma, more than a year in and out of hospital and a gradual re-introduction to the world of work. *A Different Perspective After Brain Injury: A Tilted Point of View* is written entirely by the survivor, providing an unusually introspective and critical personal account of life following a serious blow to the head. It charts the initial insult, early rehabilitation, development of understanding, the return of emotion, moments of triumph and regression into depression, the exercise of reframing how a brain injury is perceived and a return to work. It also describes the mental adjustments of awareness and acceptance alongside the physical recovery process. Readily accessible to the general public, this book will also be of particular interest to professionals involved in the care of people who have had significant brain injuries.

injury survivors their families and friends and also those who fund and organise health and social care This unique author account will provide a degree of understanding of what living with a hidden disability is really like **The Strands of Speech and Language Therapy** Katy James, 2020-09-16 This book is written by a team of speech and language therapists from The Wolfson Neurorehabilitation Centre It is intended for practitioners working with patients who have acquired communication disorders resulting from brain injury aphasia cognitive communication disorder dysarthria apraxia The authors believe that a therapeutic programme should have its foundations in the linguistic non verbal neurological and neuropsychological perspective of the patient's difficulties The approach the team has developed consists of several different strands of therapy with each strand representing an element of the rehabilitation process assessment goal planning specific individualised treatment education friends and family and psychosocial adjustment This book describes these strands illustrates in a user friendly way how each one relates to therapy and gives some practical ideas of how practitioners might work within them Each chapter begins with the guiding principles and evidence bases that underlie the rationale for one particular strand of therapy They then follow examples of practice and case studies of a real life example of each strand This book describes a speech and language therapy service that aims to be responsive to patients needs and develops tailor made intervention programmes that are unique to each individual It includes downloadable resources containing assessments and practical tools
