Nitrogen Metabolism in Plants Leonard Beevers, 1976 *Nitrogen Metabolism in Plants* George Calvin Webster, 1959
Nitrogen nutrition Amino acid metabolism Biosynthesis of amides and peptides Protein and nucleic acid metabolism Nitrogen metabolism in the intact plant **Plant Physiology 8** F.C. Steward, 2012-12-02 *Plant Physiology A Treatise Volume VIII*
Nitrogen Metabolism focuses on the physiological aspects of nitrogen metabolism in plants This book considers the descriptive biochemistry by which nitrogen compounds and their reactions are recognized the way the feasible reactions are assembled into metabolic pathways and cycles that give meaningful purpose and direction to the course of metabolism and the ongoing fate of nitrogen compounds in relation to ontogeny growth and development This volume is organized into four chapters and begins with an introduction to developments in basic and applied biological nitrogen fixation focusing on the agriculturally important mechanisms by which atmospheric nitrogen is converted to plant protein The biology and biochemistry of nitrogen fixing associations and their practical application in agriculture are discussed along with nitrogen metabolism in the context of various actual situations in which cells divide and grow and specific plants develop mature and reproduce The next chapter deals with the metabolism and turnover of proteins citing specific proteins the enzymes ribulosebiphosphate carboxylase and nitrate reductase and seed protein as the type cases to illustrate the fate of special proteins through their formation and turnover The mechanisms and biological settings of protein degradation as distinct from breakdown during protein turnover are also covered in detail This book is intended for teachers research workers and students with specific interest in plant physiology *Fundamental, Ecological and Agricultural Aspects of Nitrogen Metabolism in Higher Plants* J.T. Lambers, G. Stulen, J.J. Neeteson, 2012-12-06 Rinie Hofstra has been a member of the Department of Plant Physiology University of Groningen the Netherlands for 24 years The nearer we came to 31 March 1985 her 65th birthday the more we all realized how we would miss her not only scientifically but also socially She left her mark on both research and teaching always with an open mind and willing to change After her PhD Thesis on Nitrogen Metabolism in Tomato Plants she first continued working in that field but soon started a joint project with the Department of Plant Ecology on hemiparasites She then became involved in carbon metabolism which resulted in her giving a Biotrop Course on C C metabolism in 3 4 Indonesia Her own research group originally working on Nitrogen Metabolism soon embraced Energy and Nitrogen Metabolism as the research on respiration became more and more important In running her group she showed all sides of her person She used to stimulate and encourage everyone around her and to integrate the various lines of research At the same time she always had an open mind for the opinion of all members of her group And together they regularly criticized and evaluated the various projects and decided how to continue **Intermediary Nitrogen Metabolism**, 2012-12-02 This volume covers the most significant advances of the last ten years in understanding intermediary nitrogen metabolism in plants The eight chapters comprise aspects of nitrate and nitrogen assimilation symbiotic nitrogen fixation

glutamine and glutamate enzymology amino acid biosynthesis ureides and polyamine and sulfur metabolism The volume emphasizes molecular and genetic advances as well as biochemistry and physiology Intermediary Nitrogen Metabolism will be of interest to all plant biochemists and molecular geneticists who study nitrogen metabolism enzymology and amino acids

Nitrogen Metabolism in Plants L. Beevers, 1979-01-01 Nitrogen nutrition Amino acids Amino acid metabolism Purines pyrimidines nucleosides and nucleotides Nucleic acids Proteins Nitrogen metabolism in seeds Nitrogen metabolism in the whole plant Nitrogen metabolism during fruit ripening and leaf senescence **Nitrogen Metabolism of Plants** Konrad Mengel, D. J. Pilbeam, 1992 Of all the advances in agriculture it is the use of nitrogen fertilizers that has provided the greatest increase in crop yield The study of nitrogen metabolism is thus of vital importance Additionally because nitrogen is a constituent of such a wide range of plant metabolites the study of their chemistry and biochemistry engages the attention of many plant scientists This book covers recent developments in this field Topics include the study of root nodules the uptake assimilation and transport of ammonium and nitrate amino acid metabolism the distribution and synthesis of seed proteins and recent research on polyamines cyanogenic glycosides and alkaloids There are also chapters on denitrification and the impact of nitrogen on agricultural productivity and the environment With contributions from international experts this volume will interest all plant physiologists and phytochemists as well as biochemists interested in the behavior of nitrogen compounds **Annual Plant Reviews, Nitrogen Metabolism in Plants in the Post-genomic Era** Christine

Foyer, Hanma Zhang, 2011-06-09 The field of plant nitrogen metabolism continues to be a compelling focus for basic research activities because there is a strong demand for immediate solutions particularly in key areas such as improving plant nitrogen use efficiency which are crucial to future agricultural sustainability and the future economic success of agriculture The 13 reviews which comprise this excellent and carefully edited new volume bring together the expertise and enthusiasm of an international team of leading researchers Topics covered include nitrogen sensing and signalling uptake and membrane systems nitric oxide primary nitrogen assimilation and C N balance and interactions and regulation of root and plant architecture Together these reviews provide an insight into how plants sense uptake and assimilate nitrogen into the organic compounds required for growth co ordinate nitrogen and carbon metabolism and regulate growth and development according to nitrogen availability The transcription factors that act to integrate environmental nutrient nitrogen signals to co ordinate primary and secondary metabolism are discussed together with new concepts of cross talk transport and signalling and how such molecular networks influence nitrogen and carbon cycling processes in the environment Annual Plant Reviews Volume 42 Nitrogen Metabolism in Plants in the Post genomic Era is an essential purchase for advanced students researchers and professionals in plant sciences biochemistry physiology molecular biology genetics and agricultural sciences working in the academic and industrial sectors Libraries in all universities and research establishments where these subjects are studied and taught will need copies of this excellent volume on their shelves **Advances in Plant Nitrogen**
