L. Stevenson,2018-06-06 An analysis of novelistic explorations of modernism in mathematics and its cultural interrelations Lionel Robbins Susan Howson,2011-09-30 By the time of his death the English economist Lionel Robbins 1898 1984 was celebrated as a renaissance man He made major contributions to his own academic discipline and applied his skills as an economist not only to practical problems of economic policy with conspicuous success when he served as head of the economists advising the wartime coalition government of Winston Churchill in 1940 45 and of higher education the Robbins Report of 1963 but also to the administration of the visual and performing arts that he loved deeply He was devoted to the London School of Economics from his time as an undergraduate following active service as an artillery officer on the Western Front in 1917 18 through his years as Professor of Economics 1929 62 and his stint as chairman of the governors during the troubles of the late 1960s This comprehensive biography based on his personal and professional correspondence and other papers covers all these many and varied activities *Interpretive Political Science* R. A. W. Rhodes,2017-06-30 Interpretive Political Science is the second of two volumes featuring a selection of key writings by R A W Rhodes Volume II looks forward and explores the interpretive turn and its implications for the craft of political science especially public administration and draws together articles from 2005 onwards on the theme of the interpretive turn in political science Part I provides a summary statement of the interpretive approach and Part II develops the theme of blurring genres and discusses a variety of research methods common in the humanities including ethnographic fieldwork life history and focus groups Part III demonstrates how the genres of thought and presentation found in the humanities can be used in political science It presents four examples of such blurring at work with studies of applied anthropology and civil service reform women s studies and government departments and storytelling and local knowledge The book concludes with a summary of what is edifying about an interpretive approach and why this approach matters and revisits some of the more common criticisms before indulging in plausible conjectures about the future of interpretivism The author seeks new and interesting ways to explore governance high politics public policies and the study of public administration in general Volume I collects in one place for the first time the main articles

written by Rhodes on policy networks and governance between 1990 and 2005 and explores a new way of describing British government focusing on policy making and the ways in which policy is put into practice **Family Experiments** Shelley Richardson, 2016-11-30 Family Experiments explores the forms and undertakings of family that prevailed among British professionals who migrated to Australia and New Zealand in the late nineteenth century Their attempts to establish and define family in Australasian suburban environments reveal how the Victorian theory of separate spheres could take a variety of forms in the new world setting The attitudes and assumptions that shaped these family experiments may be placed on a continuum that extends from John Ruskin's concept of evangelical motherhood to John Stuart Mill's rational secularism Central to their thinking was a belief in the power of education to produce civilised and humane individuals who as useful citizens would individually and in concert nurture a better society Such ideas pushed them to the forefront of colonial liberalism The pursuit of higher education for their daughters merged with and in some respects influenced first wave colonial feminism They became the first generation of colonial middle class parents to grapple not only with the problem of shaping careers for their sons but also and more frustratingly what graduate daughters might do next The State as Cultural Practice Mark Bevir, R. A. W. Rhodes, 2010-04-08 The State as Cultural Practice offers a fully worked out account of the authors distinctive interpretive approach to political science It challenges the new institutionalism probably the most significant present day strand in both American and British political science It moves away from such notions as bringing the state back in path dependency and modernist empiricism Instead Bevir and Rhodes argue for an anti foundational analysis ethnographic and historical methods and a decentred approach that rejects any essentialist definition of the state and espouses the idea of politics as cultural practice The book has three aims to develop an anti foundational theory of the state to develop a new research agenda around the topics of rule rationalities and resistance by exploring empirical shifts and debates about the changing nature of the state to show how anti foundational theory leads us to see them differently Bevir and Rhodes argue for the idea of the stateless state or the state as meaning in action So the state is neither monolithic nor a causal agent It consists solely of the contingent actions of specific individuals of diverse beliefs about the public sphere about authority and power which are constructed differently in contending traditions Continuity and change are products of people inheriting traditions and modifying them in response to dilemmas A decentred approach explores the limits to the state and seeks to develop a more diverse view of state authority and its exercise In short political scientists need to bring people back in to the study of the state *Historical Dictionary of Australia* Norman Abjorensen, James C. Docherty, 2014-12-05 Australia's development from the most unpromising of beginnings as a British prison in 1788 to the prosperous liberal democracy of the present is as remarkable as is its success as a country of large scale immigration Since 1942 it has been a loyal ally of the United States and has demonstrated this loyalty by contributing troops to the war in Vietnam and by being part of the coalition of the willing in the U S invasion of Iraq in 2003 and in operations in Afghanistan In recent years it has also been

more willing to promote peace and democracy in its Pacific and Asian neighbors This fourth edition of Historical Dictionary of Australia covers its history through a chronology an introductory essay appendixes and an extensive bibliography The dictionary section has over 500 cross referenced entries on important personalities politics economy foreign relations religion and culture This book is an excellent access point for students researchers and anyone wanting to know more about Australia

The Craft of Governing R.A.W. Rhodes, 2020-08-02 Bargaining and puzzling power and thought dealing and agonising compromise and commitment These are two sides of political practitioners whether politician public servant or campaigner Understand the interplay and we can just sometimes make sense of the real world we seek to interpret Patrick Weller's observation comes from half a century of contemplating politics in action The question of how government works lies at the heart of political science and it has also been the career focus of this pioneer in the field The Craft of Governing offers a tribute to the contribution of Patrick Weller to Australian political science with chapters from leading political commentators including Michelle Grattan Peter Shergold Bob Jackson and James Walter Contributors consider the role of the prime minister approaches to studying executive government the continuing significance of senior public servants and the nature of leadership in public bureaucracies They also reflect on how insights from the study of domestic public policy can be applied to international organisations challenges faced by Westminster democracies and approaches to political biography The Craft of Governing is an invaluable resource for readers interested in approaches to studying politics and the development of political science as a discipline
