Nukes Are Not Forever:

The Nuclear Express Thomas Reed, Danny Stillman, 2010-11-10 This is a political history of nuclear weapons from the discovery of fission in 1938 to the nuclear train wreck that seems to loom in our future It is an account of where those weapons came from how the technology surprisingly and covertly spread and who is likely to acquire those weapons next and most importantly why The authors examination of post Cold War national and geopolitical issues regarding nuclear proliferation and the effects of Chinese sponsorship of the Pakistani program is eye opening The reckless nuclear weapons programs for sale exporting of technology by Pakistan is truly chilling as is the on again off again North Korean nuclear weapons program

The Challenge of Abolishing Nuclear Weapons David Krieger, 2017-07-05 In the more than sixty years since the advent of nuclear weapons there has been little meaningful progress toward nuclear disarmament Some countries have nuclear weapons while other states are forbidden to acquire them a status quo that lacks rational basis and cannot be sustained In this remarkable collection scholars and policy analysts argue that humankind has a choice either allow nuclear weapons to continue to proliferate throughout the world or move toward their complete elimination The vast majority of people on the planet would surely opt to abolish nuclear weapons But decisions about nuclear weapons are not made by the public but by small groups of political elites Consequently in a world with nuclear weapons the fate of humanity rests in the hands of a small number of individuals whose perceptions communications and judgment determine whether there is to be a future The contributors to this volume provide historical perspective on nuclear weapons policy explore the role of international law in furthering the prospects of nuclear weapons abolition consider the obstacles to abolition present a path to achieving a nuclear weapons free world and look beyond abolition to consider issues of post abolition sovereignty and general and complete disarmament The goal of a nuclear weapons free world can be awakened by an engaged citizenry bringing pressure from below in demanding action from political leaders This book contributes to this awakening and engagement

Bulletin of the Atomic Scientists , 1997-03

New Nukes Praful Bidwai, Achin Vanaik, 2000 Nuclear tests in India and Pakistan brought the threat of nuclear war back to the world s centre stage The tests and nuclear moves have raised regional tension increased poverty in already impoverished nations and could possibly have fuelled an arms race which goes beyond the borders of the two countries This text examines the causes and consequences of India and Pakistani nuclear tests The book provides a framework for understanding the global context of these tests and looks at approaches for nuclear abolition in Asia and the West

South Asian Cultures of the Bomb Itty Abraham, 2009-03-26 Since their founding as independent nations nuclear issues have been key elements of nationalism and the public sphere in both India and Pakistan Yet the relationship between nuclear arms and civil society in the region is seldom taken into account in conventional security studies These original and provocative essays examine the political and ideological components of national drives to possess and test nuclear weapons Equal coverage for comparable issues in each country frames the volume

as a genuine dialogue across this contested boundary

No Nukes Anna Gyorgy,1979 A classic A comprehensive and accessible presentation of the ins and outs of nuclear power It includes explanations of nuclear plant operation the fuel cycle health and safety hazards the economics and politics of nuclear power international anti nuclear programs and alternative energy sources
