Numbers Hugh Barker,2020-11-05 A readily understandable exploration of how figures are badly reported or deliberately misrepresented everywhere from political arguments and briefings to business presentations and shopping offers Praise for Hugh Barker s Million Dollar Maths Great fun A clear original and highly readable account of the curious relationship between mathematics and money Professor Ian Stewart author of Significant Figures A lively crash course in the mathematics of gambling investing and managing Hugh Barker makes deep ideas fun and profitable William Poundstone author of How to Predict the Unpredictable Politicians economists scientists journalists all of them have been known to bend the truth and to twist the facts from time to time But surely the numbers and statistics they rely on are cold hard objective facts that tell the real story Of course the truth is much murkier than that Figures can be misinterpreted misunderstood misconstrued and misused in hundreds of different ways This book takes a look at the many ways that statistical information can be badly reported or deliberately misused in all walks of life from political arguments to business presentations to more local concerns such as shopping offers and utility bills A polemical guide to how numbers are used to mislead which is intended to help the reader through the minefield of dubious stats and lying numbers **Numbers Don't Lie** Yago

Colás,2020-11 A typical NBA game can yield approximately 2 800 statistical events in thirty two different categories In Numbers Don t Lie Yago Col s started with a simple question How did basketball analytics get from counting one stat the final score to counting thousands He discovered that what we call basketball rules equipment fundamental skills techniques tactics strategies has changed dramatically since its invention and today encompasses many different forms of play from backyards and rec leagues to the NBA Finals Numbers Don t Lie explores the power of data to tell stories about ourselves

and the world around us As advanced statistical methods and big data technologies transform sports we now have the power to count more things in greater detail than ever before These numbers tell us about the past present and future that shape how basketball is played on the floor decisions are made in front offices and the sport is marketed and consumed But what is the relationship between counting and what counts between quantification and value In *Numbers Don't Lie* Col s offers a three part history of counting in basketball First he recounts how big data basketball emerged in the past twenty years examines its current practices and analyzes how it presents itself to the public Col s then situates big data within the deeper social cultural and conceptual history of counting in basketball and beyond and proposes alternative frameworks of value with which we may take fuller stock of the impact of statistics on the sport Ultimately Col s challenges the putative objectivity of both quantification and academic writing by interweaving through this history a series of personal vignettes of life at the intersection of basketball counting and what counts
