**Real-Time Digital Signal Processing from MATLAB® to C with the TMS320C6x DSPs, Second Edition** Thad B. Welch, Cameron H.G. Wright, Michael G. Morrow, 2011-12-22

From the Foreword There are many good textbooks today to teach digital signal processing but most of them are content to teach the theory and perhaps some MATLAB simulations This book has taken a bold step forward It not only presents the theory it reinforces it with simulations and then it shows us how to actually use the results in real time applications This last step is not a trivial step and that is why so many books and courses present only theory and simulations With the combined expertise of the three authors of this text the reader can step into the real time world of applications with a text that presents an accessible path
